Peterson, Jacek Lubecki, 2019-01-14 The 2014 Ukrainian Crimean crisis has raised serious questions in the West about Russian motivations and future policy directions Now more than ever it is imperative to explore the defensive perceptions reactions and preparations of neighbouring countries the Czech Republic Hungary Poland and Slovakia Is there a convergence of their approaches along similar paths or do their different cultures and historical experiences prefigure a divergence of their defense policies While Slovakia Hungary and Czech Republic all seem to have little concern about Russia's policies in Ukraine the Polish response has been uniquely strong and militarized This book will explore reasons for the different responses to the crisis A Comparative Analysis of Political and Media **Discourses about Russia's Invasion of Ukraine** Anton Oleinik, 2024-03-19 This book explores the discursive dimension of Russia s invasion of Ukraine It analyzes how political leaders mass media social media and ordinary people in Ukraine Russia the United States the United Kingdom and France discuss the war War propaganda and counterpropaganda structure discourses about the invasion strengthening post truth conditions. The book highlights the consequences of the growing distrust in the institutional truth teller mass media Russia s invasion of Ukraine is the first social media war Social media became the principal source of information about the invasion The rise of digital media did not change the tendency of the discourses about war to be territorially segregated according to national boundaries Nationalization of discourses about war continues to prevail over their globalization The corpora containing more than 180 million words in four languages inform the analysis The data was collected during the first year and a half of Russia sall out war in Ukraine The Wartime **President** William G. Howell, Saul P. Jackman, Jon C. Rogowski, 2024-05-31 It is the nature of war to increase the executive at the expense of the legislative authority wrote Alexander Hamilton in the Federalist Papers The balance of power between Congress and the president has been a powerful thread throughout American political thought since the time of the Founding

Fathers And yet for all that has been written on the topic we still lack a solid empirical or theoretical justification for Hamilton's proposition For the first time William G Howell Saul P Jackman and Jon C Rogowski systematically analyze the question Congress they show is more likely to defer to the president's policy preferences when political debates center on national rather than local considerations Thus World War II and the post 9 11 wars in Afghanistan and Iraq significantly augmented presidential power allowing the president to enact foreign and domestic policies that would have been unattainable in times of peace But contrary to popular belief there are also times when war has little effect on a president s influence in Congress The Vietnam and Gulf Wars for instance did not nationalize our politics nearly so much and presidential influence expanded only moderately Built on groundbreaking research The Wartime President offers one of the most significant works ever written on the wartime powers presidents wield at home The Use of Force Robert J. Art, Kelly M. Greenhill, 2015-07-09 The Use of Force long considered a classic in its own right brings together enduring influential works on the role of military power in foreign policy and international politics Now in its eighth edition the reader has been significantly revised with twenty innovative and up to date selections this edition is 60 percent new Meticulously chosen and edited by leading scholars Robert J Art and Kelly M Greenhill the selections are grouped under three headings theories case studies and contemporary issues The first section includes essays that cover the security dilemma terrorism the sources of military doctrine the nuclear revolution and the fungibility of force A new subsection of Part I also deals with ethical issues in the use of force The second section includes case studies in the use of force that span the period from World War I through the war in Afghanistan The final section considers issues concerning the projection of US military power the rising power of China the spread of biological and nuclear weapons and cyberwarfare intervention in internal conflicts and insurgencies and possible future developments in terrorism nuclear abolition and robotic warfare Continuing the tradition of previous editions this fully updated reader collects the best analysis by influential thinkers on the use of force in international affairs Contributions by Bruce J Allyn Kenneth Anderson Robert J Art Mark S Bell Richard K Betts Laurie R Blank James G Blight Stephen G Brooks Seyom Brown Daniel Byman Audrey Kurth Cronin Patrick M Cronin Alexander B Downes Karl W Eikenberry John Lewis Gaddis Erik Gartke Alexander L George Avery Goldstein Kelly M Greenhill G John Ikenberry Robert Jervis Gregory Koblentz Peter R Mansoor John J Mearsheimer Nicholas L Miller Louis C Morton Barry R Posen Louise Richardson George B Samson Thomas C Schelling Jack L Snyder Paul Staniland Barbara F Walter Kenneth N Waltz Matthew Waxman David A Welch Jon Western and William C Wohlforth The Military Balance in the Middle East Anthony H. Lein, 2023-09-05 Neurodevelopmental disorders are generally influenced by genetic as well as intrauterine and extrauterine factors that affect the fetal maternal environment and or brain development that continues after birth Specific genetic polymorphisms may increase susceptibility to environmental factors that alter the trajectory of brain development via diverse molecular mechanisms In particular the pre and post natal exposure to neurotoxic metals pesticides persistent organic pollutants and other chemicals is increasingly recognized as involved in the pathogenesis of neurodevelopmental disorders such as autism deficiency attention hyperactivity disorders neurodegenerative disorders such as Parkinson s and Alzheimer s disease chronic multiple sclerosis and even fetal and infant death including SIUDS Sudden Unexplained Intrauterine Death Syndrome and SIDS Sudden Infant Death Syndrome The UN Security Council as a pivot for security management? A discussion on the Iraq Crisis Reinhard Schumacher, 2007-07-07 Essay from the year 2006 in the subject Politics Topic International Organisations grade B2 University of Limerick language English abstract Introduction In March 2003 an US led coalition declared war against the Iraq and invaded Iraq As soon as in April the resistance of the Iraqi military ended and the coalition of the willings came out as the winner But until today the situation in Iraq is far away from being peaceful Instead there are terror attacks with hundred sometimes even thousand of dead civilians and soldiers every month But there is another point that led the war appears in bad light namely that the United Nations UN and especially the Security Council of the UN never clearly backed

this war Furthermore the US led coalition started the invasion disregarding the international community that was majoritarian against an attack on Iraq But the fact that the US started the war by passing the UN generates the question which role plays the UN nowadays in international politics Is the UN still the only authority that has the legitimacy to decide and act in matters of international peace and security or are states paying less attention to the rules and regulations of the UN and strong states like the US act without regards to the UN and its the decisions in the future Thus can the UN and the Security Council restore and maintain their authority in matters of international dimension despite the fact that they were undermined in the Iraq war by the US and the states that supported the US led coalition Or did the unilateral Iraq War marked the end of international security system Glennon 2003 p 17 The starting point of this essay is this thesis of Thierry Tardy The ill founded war in Iraq no doubt undermined the authority of the UN Security Council apparently unable to match US security interests But it also holds true that the UN still matters for the overwhelming majority of actors in the international community and is likely to remain an inescapable pivot of security management long after the Iraq crisis is out of the headlines Tardy 2004 p 591 To discuss these points this essay starts with a short introduction about the UN system and the Security Council of the UN Afterwards I will look at the war on Iraq how the UN and its member countries especially the US acted during to and after the war Code of Federal Regulations, 2014 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries The Politics of Violence, Truth and Reconciliation in the Arab Middle East Sune Haugbolle, Anders Hastrup, 2013-10-31 This book examines the politics of political violence truth and reconciliation in the contemporary Arab Middle East It includes studies of state institutions civil society and international organizations in Algeria Morocco Sudan Iraq Lebanon and Syria **Trade in War** Mariya Grinberg, 2025-08-15 Trade in War is an urgent insightful study of a puzzling wartime phenomenon states doing business with their enemies Trade between belligerents during wartime should not occur After all exchanged goods might help enemies secure the upper hand on the battlefield Yet as history shows states rarely choose either war or trade In fact they frequently engage in both at the same time To explain why states trade with their enemies Mariya Grinberg examines the wartime commercial policies of major powers during the Crimean War the two World Wars and several post 1989 wars She shows that in the face of two competing imperatives preventing an enemy from increasing its military capabilities and maintaining its own long term security through economic exchange states at war tailor wartime commercial policies around a product s characteristics and war expectations If a product s conversion time into military capabilities exceeds the war s expected length then trade in the product can occur since the product will not have time to affect battlefield outcomes If a state cannot afford to jeopardize the revenue provided by the traded product trade in it can also occur Grinberg's findings reveal that economic cooperation can thrive even in the most hostile of times and that interstate conflict might not be as easily deterred by high levels of economic interdependence as is commonly believed Trade in War compels us to recognize

that economic ties between states may be insufficient to stave off war **World and Its Peoples** Marshall Cavendish,2006-09 Describes the geography people culture and politics of the countries of the Middle East Central Asia and North Africa
