

Myrdal's Theory of circular causation

- Professor Gunnar Myrdal maintains that economic development results in a circular causation process whereby the rich are awarded more favours and the efforts those who lag behind are thwarted.
- In UDC a circular and cumulative process known as vicious circle of poverty operates downwards and being unregulated increases inequalities
- The profit motive results in the development of those regions where expectations of profit are high while others remain underdeveloped.

Dumett, Lawrence J. Brainard, 2021-12-06 **Development Economics in the Twenty-First Century** Claudia Sunna, Davide Gualerzi, 2015-12-14 Development Economics has been identified as a homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an international contributor team in order to explore the origins and evolution of development economics This book highlights the different elements of high development theory through a precise reconstruction of the different theoretical approaches that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and Stiglitz The chapters situate development economics within current debates among economists and historians of economic thought providing a platform for future research This book is suitable for researchers and students with an interest in Development Economics the History of Economic development and the Economics of Developing Countries The Rise of Asia Frank B. Tipton, 1998-05-29 The shifting balance of economic power away from Western Europe and the United States and towards East and Southeast Asia firstly Japan then the small Tiger economies and now the larger nations of Southeast Asia and China the potential Dragons has provoked anger dismay and a search for the secrets of growth and for lessons to be learned The Rise of Asia brings together recent scholarship analysing the process of economic social and political development in East and Southeast Asia from the mid nineteenth century to the present day **Contextual Development Economics** Matthias

P. Altmann, 2010-11-16 Poverty still persists in today's low income countries despite decades of international aid and extensive research on the determinants of growth and development. The book argues that meeting this challenge requires a holistic understanding of the context specific factors that influence economic behavior and structures in poor countries. Contextual Development Economics approaches this task by offering a methodology that allows analysing the dynamic interrelations between economic, cultural and historical determinants of economic life in low income countries. The book starts with an empirical inquiry into the economic characteristics of low income countries that create the context by which the specific forms of organising economic activity in these countries are determined. It then looks at how different generations of development economists sought to explain economic realities in low income countries from the 1940s through today. The book finally synthesises the results from this empirical and methodological analysis with insights from an inquiry into contributions of the German Historical School from which it borrows the concept of the economic style as a methodological alternative to the universal and hence often irrelevant models of mainstream development economics. This book offers a promising perspective for the future of development economics that will be of interest to researchers and development practitioners alike. It will also be relevant for academics and students with an interest in applications of the method and concepts of the Historical School to contemporary problems. **Evolutionary Economics: v. 2** Marc R.

Tool, 2019-07-12 This is part of a two volume work intended to map the theoretical heartland of the institutionalist perspective on political economy. Volume II considers basic economic processes, institutions for stabilizing and planning economic activities, the role of power and accountability and emerging global interdependence. Marc R Tool is the editor of Journal of Economic Issues. Economic Development of Caricom Winston H. Griffith, 2021-10-12 The early pioneers of development attributed the poor economic and social conditions in less developed nations to cultural and environmental elements. Some argued that their small size was also a contributing element. In the latter decades of the twentieth century, proponents of the neoclassical counterrevolution shifted the focus to the dirigiste policies of governments. Taking a heterodox approach, however, this study argues that the persistent low level of development in CARICOM nations is due to their being utilized as global agricultural and manufacturing production platforms, their enduring colonial economic and social structures that have slowed down economic transformation, the negative attitudes of classes, the anti development policies of some governments and since the human element provides the motor forces that ultimately drive development, their failure to accumulate an adequate pool of knowledge, skills that are now dominating production processes in the new global economy.
