Electronic Signatures Authentication Technology From A Legal Perspective:

Electronic Signatures M. H. M. Schellekens, 2004-08-12 With these issues the subject of legal usability is not completely covered Enforcement is perhaps the most obvious issue that is not dealt with Therefore I will indicate for what reason enforcement has been omitted as a separate issue This has the following background A signature may alleviate evidentiary burdens that may arise when enforcing a contract but enforcing a contract involves much more than evidence of the existence and contents of a contract E commerce has opened the possibility to engage in cross border business with a low value per transaction Even if one has the authenticated identity of one's contracting party it may still be too complicated or expensive to commence legal proceedings against a party A signature does not in itself result in compliance with contracts and legal rules A digital signature may however be an important part of a more encompassing enforcement concept The security dimension of signatures only makes sense if one is really willing to embark upon enforcement instead of accepting the loss Enforcement in the Internet environment is not something that can be done on an ad hoc basis The territorial division of the law hampers enforcement in the borderless Internet environment each country has its own system for determining and administering law Furthermore traditional courts are not as yet tailored to the enforcement needs that originate from the Internet

Electronic Signatures M. H. M. Schellekens, 2004 The contention that the provision of European Directives on functional legal requirements for digital signature validity solves a core problem of electronic commerce can at best be called naïve The catch phrase what holds off line holds online may be in tune with a general emotion towards the invasion of information technology into business in this book it is made clear that there are no simple shortcuts for the lawyer who is concerned with authenticated digital transactions The author first sets out to describe the main aspects of authentication technologies presenting the technical insights needed to get to the legal semantics of functional equivalence between traditional and digital signatures The second part of his research focuses on the usability of authentication technology and what it entails for its users Aspects considered are qualification as electronic signature limitations of electronic signatures the electronic signature as evidence alternatives to electronic signatures liability and the burden of proof and last but not least privacy concerns The research for this book is based on an in depth literature study and interviews with highly qualified experts in the field It provides valuable tools and background information not only for everyone active in or setting out on e business in its widest concept but also for practising lawyers and students of information technology Dr Maurice Schellekens is a senior researcher at the Center for Law Public Administration and Informatization of Tilburg University He specializes in technology law with a special emphasis on ICT and law This is Volume 5 in the Information Technology and Law IT Law Series

Electronic Signatures in Law Stephen Mason, 2012-01-26 Using case law from multiple jurisdictions Stephen Mason examines the nature and legal bearing of electronic signatures

Electronic Signatures for B2B Contracts Aashish Srivastava, 2012-08-31 The last few centuries have seen paper based

documents and manuscript signatures dominate the way businesses enter into a contractual relationship with each other. With the advent of Internet replacing paper based contracts with B2B electronic contracts is a possibility. However, an appropriate technology and an enabling legislation are crucial for this change to happen. On the technology front, this feature has the potential to enable business executives to sit in front of their computer and sign multi million dollar deals by using their electronic signatures. On the legal front, various pieces of legislation have been enacted and policies developed at both national and international levels to give legal recognition to such type of contracts. This book presents the findings of an empirical study on large public listed Australian companies that examined businesses' perception towards the use of electronic signatures in B2B contracts. Essentially, it identifies six key factors that create a disincentive to businesses to move from the practice of paper based signatures to the new technology of electronic signatures. This book offers legal practitioners, academics, and businesses insights into issues associated with the use of electronic signatures and suggests a number of measures to promote its usage in B2B contracts.

Electronic Signatures in International Contracts Carolina M. Laborde, 2010. Originally presented as the author's thesis, doctoral Freiburg Breisgau University, 2008. Basic Documents on International Trade Law Chia-Jui Cheng, 2012-04-27. Anyone involved in trade law knows the time consuming nature of obtaining primary source material and consulting each of the main trade laws. Now in its fourth edition, *Basic Documents in International Trade Law* solves this problem by assembling in a single, easy to use resource, a very comprehensive collection of the most important and frequently used documents on the law of international trade. In addition to its obvious practical value, this work reveals much about the process of harmonization in international trade law and the operation of the key international trade bodies. This makes the book a helpful reference for international business lawyers, researchers, legislators, and government officials in the field. Since the successful publication of the previous editions of the book, the appearance of new conventions and model laws has considerably enriched the law of international trade, and the present edition contains a wealth of new material. The book has been substantially revised, and several new instruments have been included. Among the most significantly important improvements to this new edition are new chapters added to different parts of the book, a redesigned and thoroughly revised Part 6 reflecting the expansion of intellectual property rights under the framework of treaties administered by World Intellectual Property Organization, and bibliographies and other research resources updated and enlarged to include an extraordinarily rich collection of books and articles in many trading languages besides English, including for the first time major Chinese works in the international trade law field. As the late Prof. Clive M. Schmitthoff commented on the first edition, the book is not only of practical usefulness but has also considerable jurisprudential value and reveals the methodology of the harmonization process in the area of international trade law. The International Business Lawyer first commented in 1987 that the book can only be described as a *vade mecum* for every international business lawyer; an assessment that now seems more merited than ever.

Managing Records in Global Financial Markets Lynn

Coleman,2011 Although there are a number of publications covering records management generically very few are focused on the specific challenges of particular sectors and fewer still on current regulatory legal and governance issues associated with managing records in global banking and finance businesses This timely book fills this gap by exploring these complex issues fully and offers strategies and examples of best practice to meet the recordkeeping challenges to which they give rise in corporate and commercial banking enterprises operating in global capital markets The examples and cases studies encompass recordkeeping in investment banking asset management brokerage and other financial services which serve global markets and the book will be of particular significance to the financial sector However covering as it does the issues that arise from operating across borders and jurisdictions it will also be of relevance to multi national businesses in other sectors The key chapters cover setting the scene background and concepts regulatory and legal compliance common trends in financial services balancing risk and return litigation related issues recordkeeping approaches Whilst the expert team of authors are careful to ensure that the book reflects recognized records management principles the accessible language used will assure its value to information professionals and others without a formal records management background Readership This much needed textbook will be essential reading for records managers archivists and information professionals who manage records in the financial sector It will also be invaluable for individuals engaged in a wide range of disciplines who rely on records to meet the increasing number of legal and regulatory obligations to which institutions engaged in global banking and finance are now subject These include compliance professionals data protection officers governance professionals regulators and risk managers senior managers and directors chief operating officers and IT specialists *The SAGE Encyclopedia of the Internet* Barney Warf,2018-05-16 The Internet needs no introduction and its significance today can hardly be exaggerated Today more people are more connected technologically to one another than at any other time in human existence For a large share of the world s people the Internet text messaging and various other forms of digital social media such as Facebook have become thoroughly woven into the routines and rhythms of daily life The Internet has transformed how we seek information communicate entertain ourselves find partners and increasingly it shapes our notions of identity and community The SAGE Encyclopedia of the Internet addresses the many related topics pertaining to cyberspace email the World Wide Web and social media Entries will range from popular topics such as Alibaba and YouTube to important current controversies such as Net neutrality and cyberterrorism The goal of the encyclopedia is to provide the most comprehensive collection of authoritative entries on the Internet available written in a style accessible to academic and non academic audiences alike *Electronic Government and the Information Systems Perspective* Andrea Kó,Enrico Francesconi,Gabriele Kotsis,A Min Tjoa,Ismail Khalil,2020-09-05 This book constitutes the refereed proceedings of the 9th International Conference on Electronic Government and the Information Systems Perspective EGOVIS 2020 held in Bratislava Slovakia in September 2020 The 15 full and one short papers presented were carefully reviewed and selected from
