H. M. Schellekens,2004-08-12 With these issues the subject of legal usability is not completely covered Enforcement is perhaps the most obvious issue that is not dealt with There fore I will indicate for what reason enforcement has been omitted as a sepa rate issue This has the following background A signature

may alleviate evidentiary burdens that may arise when enforcing a contract but enforcing a contract involves much more than evidence of the existence and contents of a contract. E-commerce has opened the possibility to engage in cross border business with a low value per transaction. Even if one has the authenticated identity of one's contracting party it may still be too complicated or expensive to commence legal proceedings against a party. A signature does not in itself result in compliance with contracts and legal rules. A digital signature may however be an important part of a more encompassing enforcement concept. The security dimension of signatures only makes sense if one is really willing to embark upon enforcement instead of accepting the loss. Enforcement in the Internet environment is not something that can be done on an ad hoc basis. The territorial division of the law hampers enforcement in the borderless Internet environment; each country has its own system for determining and administering law. Furthermore traditional courts are not as yet tailored to the enforcement needs that originate from the Internet.

The Law of Electronic Signatures and Records Jeremiah S. Buckley, Margo H. K. Tank, R. David Whitaker, John P. Kromer, 2013

Electronic Signatures M. H. M. Schellekens, 2004. The contention that the provision of European Directives on functional legal requirements for digital signature validity solves a core problem of electronic commerce can at best be called naïve. The catch phrase what holds off line holds online may be in tune with a general emotion towards the invasion of information technology into business. In this book it is made clear that there are no simple shortcuts for the lawyer who is concerned with authenticated digital transactions. The author first sets out to describe the main aspects of authentication technologies presenting the technical insights needed to get to the legal semantics of functional equivalence between traditional and digital signatures. The second part of his research focuses on the usability of authentication technology and what it entails for its users. Aspects considered are qualification as electronic signature, limitations of electronic signatures, the electronic signature as evidence, alternatives to electronic signatures, liability and the burden of proof and last but not least privacy concerns. The research for this book is based on an in depth literature study and interviews with highly qualified experts in the field. It provides valuable tools and background information not only for everyone active in or setting out on e-business in its widest concept but also for practising lawyers and students of information technology. Dr Maurice Schellekens is a senior researcher at the Center for Law, Public Administration and Informatization of Tilburg University. He specializes in technology law with a special emphasis on ICT and law. This is Volume 5 in the Information Technology and Law IT Law Series.

Signatures for B2B Contracts Aashish Srivastava,2012-08-31 The last few centuries have seen paper based documents and manuscript signatures dominate the way businesses enter into a contractual relationship with each other With the advent of Internet replacing paper based contracts with B2B electronic contracts is a possibility However an appropriate technology and an enabling legislation are crucial for this change to happen On the technology front this feature has the potential to enable business executives to sit in front of their computer and sign multi million dollar deals by using their electronic signatures On the legal front various pieces of legislation have been enacted and policies developed at both national and international levels to give legal recognition to such type of contracts This book presents the findings of an empirical study on large public listed Australian companies that examined businesses perception towards the use of electronic signatures in B2B contracts Essentially it identifies six key factors that create a disincentive to businesses to move from the practice of paper based signatures to the new technology of electronic signatures This book offers legal practitioners academics and businesses insights into issues associated with the use of electronic signatures and suggests a number of measures to promote its usage in B2B contracts

Global Sales and Contract Law Ingeborg Schwenzer,Pascal Hachem,Christopher Kee,2012-01-26 Although the 1980 United Nations Convention on Contracts for the International Sale of Goods CISG is one of the most successful international conventions to date it remains the case that those involved in the international sale of goods must refer to a multitude of laws Indeed the CISG itself does not cover all issues relating to international sales contracts so it must necessarily be supplemented by domestic law *Global Sales and Contract Law* provides a truly comparative analysis of domestic laws in over sixty countries so as to deliver a global view of domestic and international sales law The book reports on the real practice of sales law taking into account present day problems Complex questions on the obligations under a sales contract the ways in which these are established as well as the remedies following the breach of obligations are all discussed By addressing regional uniform projects like OHADA and comparing differences in domestic legal approach where the CISG would not apply the work goes beyond existing commentaries which tend to focus only on the CISG The analysis has been based on an unprecedented survey drawn from the world s top fifty companies as well as international traders lawyers advising international traders arbitral institutions arbitrators and law schools This work encompasses all aspects of a sale of goods transaction and takes a wide view of sale by including general contract law The book gives practitioners invaluable insight into judicial trends and possible solutions in different legal systems whether preparing for litigation or drafting an international contract *Global Sales and Contract Law* is the most comprehensive and thorough compilation of legal analysis in the field of the sale of goods and is a reliable source for any practitioner dealing in international commerce Electronic Evidence and Electronic Signatures Seng MASON,Stephen Mason,Daniel
