

Ethical Dilemmas

Modern health care advances have created many ethical dilemmas for health care providers:

- Should a person have the right to euthanasia (assisted death) if they are terminally ill & in excruciating pain?
- Should a patient be told if a health care provider has AIDS?
- When should life support be discontinued?
- Can a hospital refuse to provide expensive treatment such as a bone marrow transplant if a patient can not pay?
- Should aborted embryos be used to obtain stem cells for research to cure diseases?

Health Promotion and Professional Ethics Alan Cribb, Peter Duncan, 2009-02-12 Health promotion is an increasingly important part of the work of most health professionals Yet health promotion is qualitatively different from traditional health care activities This book will be a focused introduction to and exploration of ethical issues in health promotion It aims to provide a rationale for the underlying value of health promotion and for resolving value conflicts To what extent should an individual be obliged to contribute to the collective health of a society Should a society be more concerned to promote health than to treat existing disease and illness Indeed can a society be said to have a responsibility for the health of its members The first part of the book addresses the theoretical context of ethics and health promotion The second part focuses on examples relating to nursing and other health professionals using a case study approach The book will be invaluable in helping professionals understand and respond to ethical challenges in practical ways

Health Promotion Ethics Ruth Cross, Louise Warwick-Booth, James Woodall, 2023-10-31 Health Promotion Ethics A Framework for Social Justice critically considers the ethical dimensions of promoting health with individuals and communities encouraging a nuanced understanding of health promotion in the context of fairness empowerment and social justice The concept of social justice indeed is central The book explores how health promotion should be considered in relation to moral social and legal issues from individual responsibility to government intervention as well as the possibility that existing practice maintains rather than alleviates existing health inequalities by stigmatising certain groups It also questions the rights of those who promote health to use particular strategies for example using fear to encourage behaviour change The ethics of health promotion practice and research are considered introducing several important debates Case studies international material and opportunities to reflect on practice are used throughout to bring the important issues under discussion to life engaging both students and practitioners alike The book provides a fascinating route to reflect on what it really means to promote health for all in a more equitable way
