The Enforcement of Directors' Duties in Britain and Germany Hans-Christoph Hirt, 2004 The power to control litigation in the company's name is normally vested in the board of directors This gives rise to a conflict of interest whenever some or all of the directors breach their duties In such a situation the board's decision whether or not to litigate is potentially tainted because the wrongdoers are part of the decision making process The board as a whole is therefore an unsuitable decision making body and the following question arises who should decide whether it is in the company's interest to initiate litigation against the alleged wrongdoers There are a number of different persons and bodies in which the decision making power could be vested The British approach is the reversion of management power to the shareholders in general meeting and in certain restricted situations the availability of the derivative action brought by a shareholder on behalf of the company Both mechanisms give rise to significant difficulties This book begins by explaining the board's conflict of interest sets out a theoretical framework of legal strategies that cover the whole range of approaches to deal with it and analyses their strengths and weaknesses The analysis consists of an assessment and comparison of four models of the enforcement of directors' duties which are based on the current law and reform proposals in Britain and Germany Particular reference is made to recent case law and its practical implications

Cooley, 2009-09-28 Most philosophers still like to feel that they have a special subject matter well insulated from anything that the social scientists and scientists in general have to tell them That is not healthy for philosophy and it is all too likely to lead to an ethics that continues as of old to plead for its ultimates the fact that one is totally ineffectual being decently concealed by an impressive terminology Stevenson 1963 pp 114 5 Many so called moral theories do not even attempt to explain or justify common morality but are used to generate guides to conduct intended to replace common morality These p posed moral guides those generated by all of the standard consequentialist contractarian and deontological theories are far simpler than the common moral system and sometimes yield totally unacceptable answers to moral problems Since these philosophers who put forward these theories have usually dismissed common morality as confused they are c pletely unaware of the complexity involved in making moral decisions and judgments It is not surprising that many who take morality seriously and try to apply it to real problems faced by actual people are so critical of moral theory Bernard Gert 1998 p 6 As both Stevenson and Gert note ethics requires social and other sciences for by its very nature ethics is a practical enterprise
