Ethics And Cultural Policy In A Global Economy:

Ethics and Cultural Policy in a Global Economy Sarah Owen Vandersluis, 2003-10-16 Sarah Owen Vandersluis critically examines approaches to cultural policy within the global economy. This study taps into the growing debate on ethical theory and International Political Economy. It challenges the normative positions of nationalists and welfare economists before developing an alternative communitarian ethics for cultural policy in a global economy. The study concludes with an examination of the practical implications of this ethics in several case studies.

Creating Cultural Capital Olaf Kuhlke, Annick Schramme, Rene Kooyman, 2015-06-12 In recent years the global creative economy has experienced unprecedented growth. Considerable research has been conducted to determine what exactly the creative economy is, what occupations are grouped together as such, and how it is to be measured. Organizations on various scales from the United Nations to local governments have released creative or cultural economy reports, developed policies for creative urban renewal, and directed attention to creative placemaking, the purposeful infusion of creative activity into specific urban environments. Parallel to these research and policy interests, academic institutions and professional organizations have begun a serious discussion about training programs for future professionals in the creative and cultural industries. We now have entire colleges offering undergraduate and graduate programs leading to degrees in arts management, arts entrepreneurship, cultural management, cultural entrepreneurship, or cultural economics. And many professional organizations offer specialized training and certificates in cultural heritage, museums studies, entertainment, and film. In this book, we bring together over fifty scholars from across the globe to shed light on what we collectively call cultural entrepreneurship: the training of professionals for the creative industries who will be change agents and resourceful visionaries that organize cultural financial, social, and human capital to generate revenue from a cultural and creative activity. Part I of this volume begins with the observation that the creative industries and the cultural entrepreneurship generated within them are a global phenomenon. An increasingly mobile international workforce is moving cultural goods and services across national boundaries at unprecedented rates. As a result, the education of cultural professionals engaged in global commerce has become equally internationalized. Part II looks into the emergence of cultural entrepreneurship as a new academic discipline and interrogates the theoretical foundations that inform the pedagogy and training for the creative industries. Design thinking, humanities poetics, risk strategy, and the artist-entrepreneur dichotomy are at the heart of this discussion. Part III showcases the design of cultural entrepreneurship curricula and the pedagogies employed in teaching artists and culture industry specialists. Our authors examine pedagogy and curriculum at various scales and in national and international contexts, from the creation of entire new schools to undergraduate graduate programs. Part IV provides case studies that focus on industry or sector-specific training, skills-based courses, information technology, social media, entrepreneurial competitions, and more. Part V concludes the book with selected examples of practitioner training for the

cultural industries as it is offered outside of academia In addition this section provides examples of how professionals outside of academia have informed academic training and course work Readers will find conceptual frameworks for building new programs for the creative industries examples of pedagogical approaches and skillsbased training that are based on research and student assessments and concrete examples of program and course implementation *Thinking About Schools* Aimee Howley, Craig Howley, 2012-11-12 As its title implies this book has a deceptively simple mission to prepare would be school leaders to draw upon a variety of theoretical perspectives when thinking about schools and schooling It shows how theories can function as cognitive tools to be mastered carefully stored in one s intellectual toolbox and used to interpret and resolve real world problems Beneath this goal lies the belief that the most effective leaders are those who are able to construct their own well grounded interpretations of events and their own responses to those events Key features of this exciting new text include the following Focus on Alternative Theories The functionalist theoretical views that have dominated administrator preparation programs for the last half century are reviewed early in the book and are shown to be inadequate to the task of understanding and coping with the complex realities of modern day schooling The remainder of the book presents alternative views of schooling that taken together can be thought of as a theoretical repertoire from which to construct interpretations and solutions to everyday real world problems Focus on Diversity Diversity is examined from a variety of viewpoints Chapter 6 looks at the cultural bases of leadership Chapter 7 at comparative and international contexts and Chapter 8 at gender and sexual orientation Illustrative Cases Each chapter contains a case with an embedded dilemma similar to those that real world administrators confront While illustrating the particular theoretical view presented in the chapter these cases are sufficiently complex that they lend themselves to interpretation by any of the other theories considered in the book This book is appropriate for graduate level courses with titles such as Organizational Theory Theory of School Leadership or Introduction to Educational Administration It might also be used as one of several texts in advanced courses on leadership theory

Rules for the Global Economy Horst Siebert, 2016-06-28 Rules for the Global Economy is a timely examination of the conditions under which international rules of globalization come into existence enabling world economic and financial systems to function and stabilize Horst Siebert a leading figure in international economics explains that these institutional arrangements such as the ones that govern banking emerge when countries fail to solve economic problems on their own and cede part of their sovereignty to an international order Siebert demonstrates that the rules result from a trial and error process and usually after a crisis in order to prevent pointless transaction costs and risks Using an accessible and nonmathematical approach Siebert links the rules to four areas international trade relations factor movements financial flows and the environment He looks at the international division of labor in the trade of goods and services flow of capital diffusion of technology migration of people including labor and human capital protection of the global environment and stability of the monetary financial system He discusses the role of ethical norms and human rights in defining international regulations and

argues that the benefits of any rules system should be direct and visible. Comprehensively supporting rules based interactions among international players, the book considers future issues of the global rules system. *Proceedings of the International Conference on Cultural Policy and Sustainable Development (ICPSD 2024)* Abdul Kadir Jaelani, Irwansyah Irwansyah, Fokke Fernhout, Adolfo Antonio Paolini, Mohd Rizal Palil, Hilaire Tegnau, Okid Parama Astirin, Sutarno Sutarno, Patricia Covarrubia, Bobur Sobirov, Robbi Rahim, 2024-12-23. This is an open access book. Cultural policy plays a crucial role in shaping societies, influencing cultural expressions and advancing sustainable development. Laws and regulations related to culture, both at the national and international levels, play a key role in regulating and protecting cultural heritage and supporting a healthy cultural ecosystem. The First International Conference on Cultural Policy and Sustainable Development (ICPSD) aims to explore the impact of cultural policies in democratic and nondemocratic regimes. This conference will serve as a platform for scholars, policymakers, and practitioners to exchange ideas, share experiences, and discuss strategies to promote cultural diversity, creativity, and sustainability in different political contexts. Internationally, various agreements such as the UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions underscore the importance of cultural policies in supporting sustainable development and promoting cultural diversity. UNESCO Convention 2005. At the national level, laws such as the Cultural Law in Indonesia establish a framework for the protection and development of culture, as well as provide a legal basis for inclusive and sustainable cultural policy making. Law Number 5 of 2017 concerning the Advancement of Culture. In democratic regimes, cultural policies are often developed through participatory processes, reflecting the values and aspirations of diverse communities. These policies aim to support cultural expression, protect cultural heritage, and promote cultural rights, thereby contributing to social cohesion and inclusive development. However, challenges such as funding limitations, cultural commodification, and the impact of digital technology require ongoing dialogue and innovation in policy approaches. On the other hand, cultural policies in nondemocratic regimes are often used as tools for political control, censorship, and the promotion of state ideology. Nevertheless, cultural practitioners and activists in these contexts demonstrate resilience and creativity in navigating restrictive environments, often using digital technology to amplify their voices and preserve cultural identity. In various countries, existing legislation greatly influences the implementation of cultural policies and sustainable development. In Indonesia, for example, Law Number 5 of 2017 concerning Culture serves as the main foundation for the development of sustainable cultural policies. This law promotes the protection, preservation, development, utilization, and fostering of culture as an integral part of national development. Law Number 5 of 2017 concerning the Advancement of Culture. Cultural Policy and Sustainable Development are interrelated concepts and are the main focus of this conference, where appropriate cultural policies can strengthen sustainable development, reinforce cultural identity, and improve the quality of life for communities. In the context of the conference theme, Cultural Policies in Democratic and Nondemocratic Regimes, it is important to consider the differences in cultural policy approaches between

these two types of regimes This forum aims to facilitate communication among Law Faculty Academics worldwide with the agenda of the 1st International Conference on Cultural Policy and Sustainable Development ICPSD Cultural Policies in Democratic and Nondemocratic Regimes

Critical Border Studies Noel Parker, Nick Vaughan-Williams, 2016-03-23 This edited collection formalises Critical Border Studies CBS as a distinctive approach within the interdisciplinary border studies literature Although CBS represents a heterogeneous assemblage of thought the hallmark of the approach is a basic dissatisfaction with the Line in the Sand metaphor as an unexamined starting point for the study of borders A headline feature of each contribution gathered here is a concerted effort to decentre the border By decentring we mean an effort to problematise the border not as taken for granted entity but precisely as a site of investigation On this view the border is not something that straightforwardly presents itself in an unmediated way It is never simply present nor fully established nor obviously accessible Rather it is manifold and in a constant state of becoming Empirically contributors examine the changing nature of the border in a range of cases including the Arctic Circle German Dutch borderlands the India Pakistan region and the Mediterranean Sea Theoretically chapters draw on a range of critical thinkers in support of a new paradigm for border research The volume will be of particular interest to border studies scholars in anthropology human geography international relations and political science Critical Border Studies was published as a special issue of Geopolitics

Persuasion and Compulsion in Democracy Jacquelyn Kegley, Krzysztof Piotr Skowronski, 2013-01-25 This collection of essays focuses on the roles that coercion and persuasion should play in contemporary democratic political systems or societies A number of the authors advocate new approaches to this question offering various critiques of the dominant classical liberalism views of political justification freedom tolerance and the political subject A major concern is with the conversational character of democracy Given the problematic and ambiguous status of the many differences present in contemporary society the authors seek to alert us to the danger that an emphasis on reasonable consensus will conceal exclusion in practice of some contending positions The voices of vulnerable peoples can be unconsciously or even deliberately silenced by various institutional processes and operating procedures and a strong media influence can change the tenor of conversations and even lead to deception To counter these factors a number of the essays in differing ways urge the fostering of local community conversations or democratic agoras so that democratic debate and conversation might maintain the vitality necessary to a strong democratic system *Handbook of Research on Ethnic and Intra-cultural Marketing*
