Johnson, Stephen McBride, Patrick J. Tales Out of School Linda Marie Arbour Mre Med, 2011-04 *Tales Out of School* presents a memoir offering a critical examination of the culture that exists with with an analysis of the unconscious and theoretical dimensions of this psychological and sociological agenda Author Linda Arbour reflects upon her experience as student teacher and

administrator in the multi racial multi ethnic public secondary Catholic schools of Toronto Ontario Arbour insists that these schools exist to transmit the counter cultural values of Jesus values of equality and inclusion where power is used to enhance the growth and flourishing of everyone not merely to duplicate the secular norms of social upward mobility and individual status Even so as viewed through the lens of a newly recognized social Catholic tradition she describes the cultural impasse she encountered while trying to realize these values Within the structure of the Catholic school system she discovered a morass of traditional male privilege and cronyism and a professional culture hostile to the flourishing of women as well as of teachers in general She challenges future teachers and administrators to gain a heightened awareness in order to address these concerns within the context of the gospel by imagining a culture that emphasizes a concern for the most disciplined and talented students

World Trade Law after Neoliberalism Andrew Lang, 2013-01-17 The rise of economic liberalism in the latter stages of the 20th century coincided with a fundamental transformation of international economic governance especially through the law of the World Trade Organization In this book Andrew Lang provides a new account of this transformation and considers its enduring implications for international law Against the commonly held idea that neoliberal policy prescriptions were encoded into WTO law Lang argues that the last decades of the 20th century saw a reinvention of the international trade regime and a reconstitution of its internal structures of knowledge In addition the book explores the way that resistance to economic liberalism was expressed and articulated over the same period in other areas of international law most prominently international human rights law It considers the promise and limitations of this form of inter regime contestation arguing that measures to ensure greater collaboration and cooperation between regimes may fail in their objectives if they are not accompanied by a simultaneous destabilization of each regime s structures of knowledge and characteristic features With that in mind the book contributes to a full and productive contestation of the nature and purpose of global economic governance
