Ethics And The Profession Of Anthropology Dialogue For Ethically Conscious Practice:

Ethics and the Profession of Anthropology Carolyn Fluehr-Lobban, 2002-12-24 This revised second edition of *Ethics and the Profession of Anthropology* renews the challenge to anthropologists to engage in a dialogue concerning their commitment to professional ethical conduct. Containing a majority of new chapters, the authors redefine what it means to conduct anthropological research ethically in a discipline that is now less isolated from allied fields in the physical and behavioral sciences and coming to terms with the global changes that affect its practice. Fluehr-Lobban provides an overview of issues from the past 110 years, drawing attention to the need for maintaining the ethical core of the discipline and a code of professional responsibility. The contributors describe a series of crises in the discipline involving clandestine research and other questionable actions by anthropologists, including secret research and intelligence work by academics, the ethical problems of medical work among native people, the evolution of cyber ethics, and the changing relationships between indigenous people, archaeologists, and museums as a result of the 1990 NAGPRA repatriation legislation. The book offers an excellent model for integrating ethics education at all levels of instruction and for empowering and engaging communities. It will be a valuable tool for anthropological researchers, instructors, and fieldworkers as they transform their professional practice.

The book offers theoretical and practical tools to those with academic or professional interests in cultural expertise, detailing its scope, application, and impact. Throughout, cultural expertise is positioned as a vital interdisciplinary concept bridging the gap between theoretical frameworks and practical solutions for complex social problems that transcend jurisdictional boundaries, legal fields, and disciplinary categories. Schrag, 2010-09-01 A powerful indictment of the IRB regime University researchers in the United States seeking to observe survey or interview people are required first to complete ethical training courses and to submit their proposals to an institutional review board IRB Under current rules IRBs have the power to deny funding degrees or promotion if their recommended modifications to scholars proposals are not followed This volume explains how this system of regulation arose and discusses its chilling effects on research in the social sciences and humanities Zachary M Schrag draws on original research and interviews with the key shapers of the institutional review board regime to raise important points about the effect of the IRB process on scholarship He explores the origins and the application of these regulations and analyzes how the rules initially crafted to protect the health and privacy of the human subjects of medical experiments can limit even casual scholarly interactions such as a humanist interviewing a poet about his or her writing In assessing the issue Schrag argues that biomedical researchers and bioethicists repeatedly excluded social scientists from rule making and ignored the existing ethical traditions in nonmedical fields Ultimately he contends IRBs not only threaten to polarize medical and social scientists they also create an atmosphere wherein certain types of academics can impede and even silence others The first work to document the troubled emergence of today's system of regulating scholarly research Ethical Imperialism illuminates the problems caused by simple universal rule making in academic and professional research This short smart analysis will engage scholars across academia
