Ethics For Educational Leaders:

Ethical Leadership Robert J. Starratt, 2004-07-20 In *Ethical Leadership* Robert Starratt one of the leading thinkers on the topic of ethics and education shows educational leaders how to move beyond mere technical efficiency in the delivery and performance of learning. He challenges educators to become ethical leaders who understand the learning process as a profoundly moral activity that engages the full humanity of the school community. Starratt explains that educational leadership requires a moral commitment to high quality learning for all students, a commitment based on three essential virtues: proactive responsibility, personal and professional authenticity, and an affirming, critical, and enabling presence to the workers and the work involved in teaching and learning. He clarifies how essential these virtues are for leadership in the pressure cooker of high stakes schooling. He provides vivid illustration by beginning and ending the book with a morality play: the narrative of a principal who struggles to do the right thing for his students and teachers as they are pressured and often punished by state mandated tests. Starratt concludes by offering practical suggestions for working leaders as well as preservice and inservice courses in educational leadership. This book is a volume in the Jossey Bass Leadership Library in Education, a series designed to meet the demand for new ideas and insights about leadership in schools. **Ethical Leadership and Decision Making in Education** Joan Poliner Shapiro, Jacqueline A. Stefkovich, 2016-01-08 The fourth edition of the best selling text *Ethical Leadership and Decision Making in Education* continues to address the increasing interest in ethics and assists educational leaders with the complex dilemmas in today's challenging and diverse society. Through discussion and analysis of real life moral dilemmas that educational leaders face in their schools and communities, authors Shapiro and Stefkovich demonstrate the application of the four ethical paradigms: the ethics of justice, care, critique, and profession. After an illustration of how the Multiple Ethical Paradigm approach may be applied to real dilemmas, the authors present a series of cases written by students and academics in the field representing the dilemmas faced by practicing educational leaders in urban, suburban, and rural settings in an era full of complications and contradictions. Following each case are questions that call for thoughtful, complex thinking and help readers come to grips with their own ethical codes and apply them to practical situations. New in the Fourth Edition: A new chapter on technology versus respect focusing on ethical issues such as cyber bullying and sexting; New cases on teachers with guns, the military and education, children of undocumented immigrants, homeless students, videos in bathrooms, incentive pay, first responders, private alternative high schools, verbal threats, and gaming etiquette. Updates throughout to reflect contemporary issues and recent scholarship in the field of ethical leadership. This edition adds teaching notes for the instructor that stress the importance of self-reflection, use of new technologies, and global appeal of ethical paradigms and dilemmas. Easily adaptable to a variety of uses, this book is a critical resource for a wide range of audiences including both aspiring and practicing administrators, teacher leaders, and educational policy makers. **Ethics in Educational Leadership Programs** Lynn G. Beck, Joseph Murphy, 1994-12-12 In

Ethics in Educational Leadership Programs Lynn Beck and Joseph Murphy examine the educational administration programs of 42 universities regarding their policies on ethical concerns for administrators. The authors open with a discussion of the different philosophies of moral leadership followed by a historical overview of research and of the ebb and flow of past interest in ethics in administration. Beck and Murphy then select 13 of the 42 universities and present an in depth evaluation of their survey findings describing and comparing the goals and objectives, themes, activities and philosophies of the courses taught. Ethics in Educational Leadership Programs is a unique book that argues resolutely for inquiry and for the acceptance of scientific approaches to the study of ethical issues in educational administration.

Working Through Ethics in Education and Leadership J. Kent Donlevy, Keith D. Walker, 2011-10-21 This book although targeting educational leaders, teachers, school based administrators, superintendents, board members, policy makers and education students is also addressed to those interested in the topic of ethics and those who seek the development of an ethical awareness and an appropriate intellectual processes when facing ethical issues. In particular the book uses both deductive and inductive methods to provide the reader with a progressive experience of ethical discernment and analysis in order to deal with and prepare the reader to address ethical issues in the public square, a task which requires that such decisions are rational, defensible and clearly articulated. Institutional leaders' diligence and integrity requires no less in attaining and sustaining the support of those they must lead in and through the institutional decisions and policies which effect constituents' lives. Through the use of clearly stated definitions, the presentation of ethical schools of thought, cases, original plays within which readers are encouraged to engage while in a safe learning environment and references to poems, movie and video clips the book provides a lively and challenging approach to studying the topic of ethics.

Educational Leadership for Ethics and Social Justice Anthony H. Normore, Jeffrey S. Brooks, 2014-01-01 The purpose of this book is to examine and learn lessons from the way leadership for social justice is conceptualized in several disciplines and to consider how these lessons might improve the preparation and practice of school leaders In

particular we examine philosophy anthropology sociology economics political science public policy and psychology Our contention is that the field of educational leadership might consider taking a step backward in order to take several forward That is educational leadership researchers might re examine social justice both in terms of social and individual dynamics and as disciplinary specific multidisciplinary and interdisciplinary phenomenon By adopting this approach we can connect and extend long established lines of conceptual and empirical inquiry and thereby gain insights that may otherwise be overlooked or assumed This holds great promise for generating refining and testing theories of social justice in educational leadership and will help strengthen already vibrant lines of inquiry That is rather than citing a single or a few works out of their disciplinary context it might be more fruitful to situate educational leadership for social justice research in their respective traditions This could be carried out by extending extant lines of inquiry in educational leadership research and then incorporating lessons gleaned from this work into innovative practice For example why not more clearly establish lines of educational leadership and justice research into the Philosophy of Social Justice Economics of Social Justice Political Studies of Social Justice Sociology of Social Justice Anthropology of Social Justice and the Public Policy of Social Justice as focused and discrete areas of inquiry Once this new orientation toward the knowledge base of social justice and educational leadership is laid we might then seek to explore some of the natural connections between traditions before ultimately investigating justice in educational leadership through a free association of ideas as the worlds of practice and research co construct a new language they can use to discuss educational leadership Such an endeavor may demand reconceptualization of both the processes and products of collaborative research and the communication of findings but it will demand a breaking down of methodological and epistemological biases and a more meaningful level and type of engagement between primary and applied knowledge bases
