Utilitarianism and the Ethics of War William H. Shaw, 2016-02-15 This book offers a detailed utilitarian analysis of the ethical issues involved in war Utilitarianism and the Ethics of War addresses the two basic ethical questions posed by war when if ever are we morally justified in waging war and if recourse to arms is warranted how are we permitted to fight the wars we wage In addition it deals with the challenge that realism and relativism raise for the ethical discussion of war and with the duties of military personnel and the moral challenges they can face In tackling these matters the book covers a wide range of topics from pacifism to armed humanitarian intervention from the right of national defense to pre emptive or preventive war from civilian immunity to the tenets of just war theory and the moral underpinnings of the rules of war But what is distinctive about this book is that it provides a consistent and thorough going utilitarian or consequentialist treatment of the fundamental normative issues that war occasions Although it goes against the tide of recent work in the field a utilitarian approach to the ethics of war illuminates old questions in new ways by showing how a concern for well being and the consequences of our actions and policies shape the moral constraints to which states and other actors must adhere This book will be of much interest to students of the ethics of war just war theory moral philosophy war and conflict studies and IR

The Use of Force in Humanitarian Intervention John Janzekovic, 2017-11-30 Humanitarian intervention is a many layered and complex concept While moral society has an obligation to stop deliberate and persistent serious human rights abuse the direct use of force remains a contentious option alongside other strategies employed by the international community This study analyzes the various ethical positions particularly consequentialism welfare utilitarianism and just war theory to unravel this intricate topic Uniquely the book goes beyond previous philosophical or ethical treatments of the subject to provide a more rounded and practical reflection on the lessons learned from the revival of humanitarian intervention as a tool of conflict resolution

Calhoun, 2013-02-04 Calhoun examines the centuries old paradigm of just war theory to determine whether modern just war rationalizations constitute sound justifications or pro military propaganda Her work reveals how the practice of modern war contradicts the most basic values and principles of modern Western democracies

Marque and Reprisal Kenneth B. Moss, 2019-04-22 Letters of marque might suggest privateers of the Elizabethan era or the American

Revolution But such conventions are duly covered in the US Constitution and the private military instruments they sanction are very much at work today in the form of mercenaries and military contractors A history of such practices up to the present day *Marque and Reprisal* by Kenneth B Moss offers unique insight into the role of private actors in military conflicts and the reason they are increasingly deployed in our day Along with an overview of mercenaries and privateers *Marque and Reprisal* provides a comprehensive history of the marque and reprisal clause in the US Constitution reminding us that it is not as arcane as it seems and arguing that it is not a license for all forms of undeclared war Within this historical context Moss explains why governments and states have sought control over warfare and actors and why private actors have reappeared in force in recent conflicts He also looks ahead to the likelihood that cyberwar will become an important venue for private warfare Moss wonders if international law will be up to the challenges of private military actors in the digital realm Is international law in fact equipped to meet the challenges increasingly presented in our day by such extramilitary activity A government makes no more serious decision than whether to resort to military force and war and when doing so Moss suggests it should ensure that such actions are accountable not on the sly and not decided in the marketplace *Marque and Reprisal* should inform future deliberations and decisions on that count

Educational Challenges Regarding Military Action Hubert Annen, Wolfgang Royl, 2010 The essays presented in this issue provide an international overview of military pedagogical thinking and acting They reflect the sometimes close correspondence between the answers provided by military scholars to questions related to the content and function of military ethics and morale These answers are so comprehensive as to suggest themselves as a starting point for further deliberations on military pedagogy but also in the fields of other applied pedagogic specialties The authors who have contributed to this book make it clear as a group how the national defence of peace and freedom may be transformed into a pertinent international responsibility and competence for the safeguarding of world peace

Peacekeeping and the Just War Tradition Tony Pfaff, Major Tony Pfaff a former Assistant Professor of Philosophy at the United States Military Academy addresses an important source of much of the confusion that currently surrounds many of the Operations Other Than War OOTW that the military finds itself participating in with increasing frequency The author points out that though the source of this confusion is primarily ethical it has important operational implications as well In the Just War Tradition as well as the Law of War there has always been a tension between winning and fighting well and the peacekeeping environment does not change this Commonly the resolution of this tension is expressed in the maxim always use the least amount of force necessary to achieve the military objective This maxim applies regardless of what environment one is in The author's contention is however that the understanding of necessary is radically different in the peacekeeping environment than it is in more conventional operations Failure to understand this results in a great deal of confusion as soldiers try to apply an ethic designed for dealing with enemies in environments where there are none
