*Ethics, Nuclear Deterrence, and War* Jack N. Barkenbus, 1992      **Nuclear Ethics** Joseph S. Nye, 1988-02-09 Outlining a soundly reasoned just defense doctrine for the nuclear age Nye provides a sensitive moral compass for policy choices and offers a genuine sense of hope for the future      Nuclear Deterrence Russell Hardin, 1985      **Political Realism And International Morality** Kenneth Kipnis, Diana T Meyers, 2019-06-26 It is always appropriate to ask whether an expedient foreign policy is morally justifiable just as it is always appropriate to ask whether a morally defensible policy is consistent with the national interest The ongoing dialogue between morality and realpolitik gives much of foreign policy debate its characteristic bite In this collection of essays a distinguished group of philosophers political theorists and lawyers including Russell Hardin and Marshall Cohen explore these contrasting themes In essays that are at once insightful and accessible noted political thinkers examine the tension of the conflicting demands of morality and national self interest in the context of the foundations of international order the possession and use of nuclear weapons recourse to war and the prospects for peace A final postscript addresses the question of the responsibility of intellectuals in the national foreign policy debate This book will appeal to scholars and students in any discipline dealing with international affairs as well as to lay readers who wish to explore the implications of taking morality and reason seriously in foreign policy      **Nuclear Ethics in the Twenty-First Century** Thomas E. Doyle, II, 2020-01-31 This book relates a complex ethical re assessment of the continued reliance by some states on nuclear weapons as instruments of state power This re assessment is more urgent considering the relatively recent intensification of great power conflict dynamics and the nuclear weapon states commitments to modernizing augmenting or tailoring their nuclear forces to address vital state and alliance interests And especially since the beginning of the administration of U S President Donald J Trump these commitments have accelerated the degree to which the political and moral dilemmas of the threat of nuclear use define and intensify existential risks for specific states and the international community at large To execute this re assessment this book details how strategic political legal and moral reasoning are deeply intertwined on the questions of vital state and global values Its ontological assumptions are taken from a broadly construed IR Constructivist stance and its epistemological approach applies non ideal moral principles informed by Kantian thought to selected problems of nuclear armed security competition as they evolved since President Barack Obama s 2009 Prague Declaration This non ideal moral approach employed is committed to the view that the dual imperatives of humanity s survival and the common security of states requires an international order which privileges considerations of justice over power political considerations This non ideal moral approach is a necessary element of theorizing a set of practices to effectively address the challenges and dilemmas of reordering international politics in terms of justice      *Ethics*

**New Directions in Strategic Thinking 2.0** Russell W. Glenn, 2018-07-06 The Australian National University's Strategic Defence Studies Centre SDSC is Australia's premier university based strategic studies think tank Fifty years after the Centre was founded in 1966 SDSC celebrated its continued research publications teaching and government advisory role with a two day conference entitled New Directions in Strategic Thinking 2.0 The event saw the podium graced by many of the world's premier thinkers in the strategic studies field An evening between those tours to the lectern brought together academics practitioners and other honoured guests at a commemorative dinner held beneath the widespread wings of the G for George bomber in the Australian War Memorial an event that included SDSC's own Professor Desmond Ball AO making his last public appearance Since SDSC's 25th anniversary the world has seen the collapse of the Soviet Union and the end of the Cold War Bipolarity gave way to the emergence of the United States as the world's sole superpower a status many now see as under threat Both the nature of the threats and identity of individual competitors has changed in the interim quarter century Non state actors are presenting rising challenges to national governments Meanwhile a diminished Russia and far more wealthy China seek to reassert themselves Never before has the call for reasoned innovative security studies thinking been more pronounced Rarely has a group so able to offer that thought come together as was the case in July 2016 This book encapsulates the essence of this cutting edge thinking and is a must read for those concerned with emerging strategic challenges facing Australia and its security partners      Strategy and Ethnic Conflict Laure Paquette, 2002-02-28 Ethnic conflict now presents the thorniest problems for military and civilian strategists of all stripes This book presents a new general theory of strategy encompassing studies of the relationship between values interest and strategy as these relate to ethnic conflicts It focuses on the relationship between values and strategy building a theory on the hypothesis that national values influence national strategy Paquette's research reveals that national values influence national strategy through three mechanisms cognition appreciation and evaluation Each mechanism and indeed the whole value focused approach to strategic thinking is described using a network of interrelated statements Paquette develops a methodology specific to the

issues of international security and ethnic considerations She tests this theory extensively for internal consistency before applying it to a single historical case French decision making on national strategy between 1955 and 1970 however because of its generality this same theory could easily be applied to other cases As with any theory it is possible to vary successively or simultaneously assumptions or conditions and to derive new predictions This process of deriving variations has the potential to help in the training of strategists both military and civilian *Strategic Weapons Proposals* United States. Congress. Senate. Committee on Foreign Relations,1981 [The Ashgate Research Companion to Military Ethics](#) James Turner Johnson,Eric D. Patterson,2016-03-23 This Companion provides scholars and graduates serving and retired military professionals members of the diplomatic and policy communities concerned with security affairs and legal professionals who deal with military law and with international law on armed conflicts with a comprehensive and authoritative state of the art review of current research in the area of military ethics Topics in this volume reflect both perennial and pressing contemporary issues in the ethics of the use of military force and are written by established professionals and respected commentators Subjects are organized by three major perspectives on the use of military force the decision whether to use military force in a given context the matter of right conduct in the use of such force and ethical responsibilities beyond the end of an armed conflict Treatment of issues in each of these sections takes account of both present day moral challenges and new approaches to these and the historical tradition of just war Military ethics as it has developed has been a particularly Western concern and this volume reflects that reality However in a globalized world awareness of similarities and differences between Western approaches and those of other major cultures is essential For this reason the volume concludes with chapters on ethics and war in the Islamic Chinese and Indian traditions with the aim of integrating reflection on these approaches into the broad consideration of military ethics provided by this volume **On War and Morality** Robert L. Holmes,2014-07-14 The threat to the survival of humankind posed by nuclear weapons has been a frightening and essential focus of public debate for the last four decades and must continue to be so if we are to avoid destroying ourselves and the natural world around us One unfortunate result of preoccupation with the nuclear threat however has been a new kind of respectability accorded to conventional war In this radical and cogent argument for pacifism Robert Holmes asserts that all war not just nuclear war has become morally impermissible in the modern world Addressing a wide audience of informed and concerned readers he raises dramatic questions about the concepts of political realism and nuclear deterrence makes a number of persuasive suggestions for nonviolent alternatives to war and presents a rich panorama of thinking about war from St Augustine to Reinhold Niebuhr and Herman Kahn Holmes s positions are compellingly presented and will provoke discussion both among convinced pacifists and among those whom he calls militarists Militarists we realize after reading this book include the majority of us who live a friendly and peaceful personal life while supporting a system which if Holmes is correct guarantees war and risks eventual human extinction Originally published in 1989 The Princeton Legacy
