Ethics Economics And Freedom:

Ethics, Economics and Freedom Timothy P. Roth, 1999 Outcomes based procedurally detached social welfare theory is found to be indeterminate irreconcilable with the moral force of rights and non accommodative of alternative understandings of justice The author argues therefore for an explicitly normative contractarian approach to economic theory and institutional appraisal The Ethical Basis of Economic Freedom Ivan Hill, 1976 *The Ethics of Economic Freedom* Herbert Giersch, 1989 **Law, Economics, and Morality** Eyal Zamir, Barak Medina, 2010 This work examines the possibility of combining economic methodology and deontological morality through explicit and direct incorporation of moral constraints into economic models **Philosophy of the Economy** Ricardo F. Crespo, 2013-11-27 This book develops a philosophical analysis of economic reality and economic science from an Aristotelian point of view It is the result of many years of thinking and philosophical study about these topics It differs from other philosophy of economics books as it also deals with economic reality not only the science and approaches its subject from an Aristotelian perspective It differs from other Aristotelian studies about economics as it covers the whole of philosophy of the economy This book argues why Aristotle's thinking guarantees an appropriate interdisciplinary synthesis **Economic Freedom and Social Responsibility** Frank Hyneman Knight, 1952 Gunton's Magazine of American Economics and Political Science, 1904 Freedom's Progress? Gerard Casey, 2021-10-04 In *Freedom's Progress* Gerard Casey argues that the progress of freedom has largely consisted in an intermittent and imperfect transition from tribalism to individualism from the primacy of the collective to the fragile centrality of the individual person and of freedom Such a transition he argues neither automatic nor complete nor are relapses to tribalism impossible The reason for the fragility of freedom is simple the importance of individual freedom is simply not obvious to everyone Most people want security in this world not liberty Libertarians writes Max Eastman used to tell us that the love of freedom is the strongest of political motives but recent events have taught us the extravagance of this opinion The herd instinct and the yearning for paternal authority are often as strong Indeed the tendency of men to gang up under a leader and submit to his will is of all political traits the best attested by history The charm of the collective exercises a perennial magnetic attraction for the human spirit In the 20th century Fascism Bolshevism and National Socialism were Casey argues each of them a return to tribalism in one form or another and many aspects of our current Western welfare states continue to embody tribalist impulses Thinkers you would expect to feature in a history of political thought feature in this book Plato Aristotle Machiavelli Locke Mill and Marx but you will also find thinkers treated in *Freedom's Progress* who don't usually show up in standard accounts Johannes Althusius Immanuel Kant William Godwin Max Stirner Joseph Proudhon Mikhail Bakunin Pyotr Kropotkin Josiah Warren Benjamin Tucker and Auberon Herbert *Freedom's Progress* also contains discussions of the broader social and cultural contexts in which politics takes its place with chapters on slavery Christianity the universities cities Feudalism law kingship the Reformation the English Revolution and what Casey calls Twentieth

Century Tribalisms Bolshevism Fascism and National Socialism and an extensive chapter on human prehistory **The Individual and the Other in Economic Thought** Ragip Ege, Herrade Igersheim, 2018-07-27 The Philosophy of Economics primarily considers the economic agent as a moral subject Economics however has long overlooked the agent's moral that is to say reasonable dimension to focus instead on the strictly rational This volume seeks to address this neglected topic through exploring the Individual and the Other The economic agent refers to himself herself in terms of his desire and passions yet also refers to others besides himself For the rational economic agent what is the nature of this relationship with the Other Should it not be understood as undergoing a transformation once we come to consider the economic agent as a reasonable being Through what process does the Other pass from being an instrument at the disposal of a rational agent to being an end in itself for a moral subject In other words how does another become an Other These questions are behind the re-examination of certain fundamental notions which takes place in this book an examination which involves a re-reading of certain great authors With contributions from authors around the world this work is divided into three main parts The first deals with individuals from the history of economic thought such as Adam Smith Karl Marx and Hannah Arendt this is then followed by a thematic section in which the concepts of recognition and subjectivity are questioned in a market context Finally the third part offers an analysis of the issue of the Individual and the Other in different fields of the recent economic analysis including game theory decision theory or social choice The Individual and the Other in Economic Thought aims to help the reader better understand how the relationship between the Individual and the Other has been conceived conceptualized and framed in economic analysis It will be of great use to graduate students scholars and any reader interested in this crucial issue **The Ethics and Economics of Agrifood Competition** Harvey S. James, Jr., 2013-03-19 This edited volume presents ethical and economic analyses of agrifood competition By systematically examining fairness and openness in agricultural markets it seeks to answer the question of whether there is adequate competition in the agrifood industry and whether the system is fair to all participants It outlines ethical and economic principles important for understanding agrifood competition presents arguments for and against consolidation globalization and the integration of agrifood industries and looks at the implications of globalization on the nature of competition in specific agricultural contexts

The Political Economy of Economic Freedom Alan T. Peacock, 1997-01-01 The captivating nature of these contributions to political economy which were all published between 1976 and 1996 but mostly in the last decade is a clear reflection of Sir Alan's authoritative standing both as an academic economist and a government economic advisor the book addresses a wide range of philosophical questions and practical policy issues thus offering plenty of stimulating material for both the theoretical and applied economist as well as other social scientists M Teresa Lunati The Economic Journal many of the papers are worth reading and each paper has a useful introduction explaining the context in which it was written The best part of the book is the selection of papers in the last part especially his Alan Peacock's discussions of the regulation of

broadcasting There is much for an economist to learn from these papers the role economists can play in public policy debates the inner workings of committees the role of information control in policy decisions William Sjostrom *Kyklos* The Political Economy of Economic Freedom brings together a timely selection of Sir Alan Peacock's views on economic freedom its philosophy its influence on the critique of economic policy and the problems encountered in expanding it *Supreme Court Economic Review, Volume 23* Todd J. is introduced in accordance with the categories of Concordian economics Lastly the book develops a theory of economic justice by defining a set of economic rights and responsibilities that guide economic behavior and policy This book appeals to scholars and students of economics and related fields as well as anyone interested in reintegrating economics into the social context

Economics as a Moral Science Peter Rona,Laszlo Zsolnai,2017-04-13 The book is reclaiming economics as a moral science It argues that ethics is a relevant and inseparable aspect of all levels of economic activity from individual and organizational to societal and global Taking ethical considerations into account is needed in explaining and predicting the behavior of economic agents as well as in evaluating and designing economic policies and mechanisms The unique feature of the book is that it not only analyzes ethics and economics on an abstract level but puts behavioral institutional and systemic issues together for a robust and human view of economic functioning It sees economic facts as interwoven with human intentionality and ethical content a domain where utility calculations and moral considerations co determine the behavior of economic agents and the outcomes of their activities The book employs the personalist approach that sees human persons endowed with free will and conscience as the basic agents of economic life and defines human flourishing as the final end of economic activities The book demonstrates that economics can gain a lot in meaning and also in analytical power by reuniting itself with ethics
