Ethnic Conflicts Explained By Ethnic Nepotism:

Ethnic Conflicts Explained by Ethnic Nepotism Tatu Vanhanen, 1999-11-22 Aims to investigate to what extent it is possible to explain the emergence of ethnic conflicts and the variation in the degree of ethnic conflicts by our assumed predisposition to ethnic nepotism not to find explanations for all ethnic conflicts Ethnic conflicts : their biological roots in ethnic nepotism Tatu Vanhanen, 2012 **Welfare, Ethnicity and Altruism** Frank Salter, 2013-03-07 Welfare Ethnicity and Altruism applies the controversial theory of Ethnic Nepotism first formulated by Iren us Eibl Eibesfeldt and Pierre van den Berghe to the modern welfare state both are authors in this volume This theory states that ethnic groups resemble large families whose members are prone to cooperate due to kin altruism Recent empirical findings in economics and political science offer confirmatory evidence The book presents two separate studies that compare welfare expenditures around the world both indicating that the more ethnically mixed a population becomes the greater is its resistance to redistributive policies These results point to profound inconsistencies within ideologies of both left and right regarding ethnicity

Civil Society in Central and Eastern Europe Sabine, 2014-04-15 As well as promoting debates about liberal democracy the dramatic events of 1989 also brought forth a powerful revival in the interest of the notion of civil society This revival was reflected mainly in two broad tracts of literature The first was primarily focused on the events surrounding the Solidarity movement in Poland and the tumultuous events of 1980-81 The second was concerned with the Velvet Revolutions more broadly Following the events of 1989 there appeared a number of works sharing the common central argument that civil society played a key role in the overthrow of these Communist regimes in 1989 Challenging the centrally accepted wisdom that dissent in totalitarian regimes was representative of civil society Civil Society and Communism posits the argument that the totalitarian public sphere a new theoretical typology presents a more robust and rigorous way by which to understand dissent and opposition in totalitarian Czechoslovakia Poland and the GDR

Re-Reading Pareto on Elite Power and Societal Bipolarisation Alasdair J. Marshall, 2025-08-22 Assessing Vilfredo Pareto's sociological reworkings of Machiavelli's Fox and Lion animal spirits as friend enemy codings this book offers a unique insight into the growing division today between relatively liberal elites and relatively conservative non elites Re Reading Pareto on Elite Power and Societal Bipolarisation utilises key ideas common to Pareto's elite theory general sociology and theory of demagogic plutocracy and fleshes out a unique perspective for making sense of contemporary societal bipolarisation in terms of friend enemy codings The first part of the book explores what Pareto's core ideas are and outlines why they matter today The second part considers how we might elaborate and apply Pareto's concept of open elites to reverse contemporary societal bipolarisation and build safer and more mature democracies The third part explains how we can apply Pareto to predict further deterioration towards fundamental social conflict such that Pareto's sociological imagination becomes risk imagination we desperately need today For academics and students across the domains of sociology political science and social science in general the book warns of widespread elite institutional bias in their research and points to Pareto's neutral and balanced

approach as a corrective offering a uniquely Paretian view of minimal criteria for democracy as well as a uniquely balanced analytical perspective for making sense of our culture war — *New Culture, New Right* Michael O'Meara, 2013 *New Culture*

New Right is the first English language study of the identitarian movements presently reshaping the contours of European politics. The study's focus is Alain de Benoist's GRECE (Groupe de Recherche et d'Etude pour la Civilisation Européenne) which Paul Piccone of Telos described as the most interesting group of continental thinkers since the existentialists of the 1950s and which elsewhere is seen as the leading school of contemporary Right wing thought. Made up of veterans from various nationalist traditionalist far Right and regionalist movements, the GRECE began as an association of French intellectuals committed to restoring the crumbling cultural foundations of European life and identity. Due to the quality of its publications and its philosophically persuasive reformulation of the Right project, it attracted an immediate audience. By the late 1970s it had recruited an impressive array of Continental thinkers to its ranks. In Italy, Germany, Belgium, and a number of other European countries, there have since emerged organizations and publishing concerns either directly linked to the Paris-based GRECE or involved in analogous endeavors. As a result of these diffusions, GRECE-style identitarianism has come to form the chief ideological alternative to the regnant liberalism. The European New Right, to which the GRECE gave birth, is new, however, not in the modernist sense of being novel, but in the traditionalist sense of reappropriating an origin whose meaningful possibilities remain open for realization. Such a revolutionary return to Europe's roots has never seemed so urgent. After a half century under the liberal democratic regimes imposed by the United States in 1945, Europeans now face extinction as a race and a culture. In opposition to the ethnocidal forces of the American Occupation and its European collaborators, New Rightists appeal to the primordial in their people's heritage, aiming to awake a spirit of resistance and renaissance in them. The result, as documented in this introduction to their ideas, is one of the most formidable critiques ever made of the liberal project.

Michael O'Meara, Ph.D., studied social theory at the Collège des Hautes Études en Sciences Sociales and modern European history at the University of California. He is the author of *Guillaume Faye and the Battle of Europe* (2013, also published by Arktos) — *War in Human Civilization* Azar Gat, 2008. Why do people go to war? Is it rooted in human nature, or is it a late cultural invention? And what of war today: is it a declining phenomenon or simply changing its shape? This book sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history.

Nations Azar Gat, 2012-12-20. What are the origins of nationalism, and why is it capable of arousing such intense emotions? In this major study, Azar Gat counters the prevailing fashionable theories according to which nations and nationalism are modern and contrived or invented. He sweeps across history and around the globe to reveal that ethnicity has always been highly political, and that nations and national states have existed since the beginning of statehood, millennia ago. He traces the deep roots of ethnicity and nationalism in human nature, showing how culture fits into human evolution from as early as our aboriginal condition, and in conjunction with kinship defines ethnicity and ethnic allegiances. From the rise of

states and empires to the present day this book sheds new light on the explosive nature of ethnicity and nationalism as well as on their more liberating and altruistic roles in forging identity and solidarity

Values and Violence Ibrahim A. Karawan, Wayne McCormack, Stephen E. Reynolds, 2008-10-11 Most books on terrorism deal with descriptions of terrorist organizations and activities some examine privacy and civil liberties issues and others treat terrorism as a series of policy choices Hardly any books deal with the foundational questions of values and violence as they relate to terrorism The two unique features of this book are that it deals with violence at the normative foundations of values and human dignity and that it includes many of the best known authors in the world from a variety of disciplines making it a paradigmatic example of cutting edge study in interdisciplinary scholarship with a focus on bringing theories and policy issues closer together Values and Violence includes chapters by a dozen of the leading scholars in the world on patterns of political violence responses to terrorism and the basic value choices inherent in them

Politics of Ethnic Nepotism Tatu Vanhanen, 1991

Sovereignty, State Failure and Human Rights Neil Englehart, 2017-05-08 This book argues that the effectiveness of the state apparatus is one of the crucial variables determining human rights conditions and that state weakness and failure is responsible for much of the human rights abuses we see today Weak states are unable to control their own agents or to police abuses by private actors resulting in less accountability and more abuse By contrast stronger

states have greater capacities to protect human rights even strong authoritarian states tend to have better human rights conditions than weak ones The first two chapters of the book develop the theoretical connections between international law sovereignty states and rights and the consequences of state failure for these relationships The empirical chapters Chapters 3 6 test the validity of these theoretical claims employing a multi method approach that combines quantitative and qualitative methods Englehart uses case studies of Afghanistan Burma Myanmar and the Indian state of Bihar to analyze types and patterns of state failure based on analysis of NGO reports archival research primary and secondary texts and interviews and field research Examining what happens to human rights when states fail the book concludes with implications for scholars and activists concerned with human rights This book will be of great use to scholars of international relations comparative politics human rights law and state sovereignty
