Roessingh, 1996 In the last five years fifteen new European states have been created on the basis of claims by previously little known ethnonational groups This book explains this development It examines the cases of four European states Bulgaria the former Czechoslovakia Belgium and Finland and focuses particularly on the impact of political systems on the development of ethnonational relations **A State of Tension** Martijn Anton Roessingh, 1995 European Political Cultures Roger Eatwell, 2002-09-11 This comparative study of the political cultures of the major European nations explores the notion of nationhood as it applies in different political contexts *The Roots of Ethnic Cleansing in Europe* H. Zeynep Bulutgil, 2016-09-15 Using a new approach to ethnicity that underscores its relative territoriality H Zeynep Bulutgil brings together previously separate arguments that focus on domestic and international factors to offer a coherent theory of what causes ethnic cleansing The author argues that domestic obstacles based on non ethnic cleavages usually prevent ethnic cleansing whereas territorial conflict triggers this policy by undermining such obstacles The empirical analysis combines statistical evaluation based on original data with comprehensive studies of historical cases in Central and Eastern Europe as well as Bosnia in the 1990s The findings demonstrate how socio economic cleavages curb radical factions within dominant groups whereas territorial wars strengthen these factions and pave the way for ethnic cleansing The author further explores the theoretical and empirical extensions in the context of Africa Its theoretical novelty and broad empirical scope make this book highly valuable to scholars of comparative and international politics alike **The European Union and the Rise of Regionalist Parties** Seth Kincaid Jolly, 2015-08-27 Using a cross national quantitative study and a detailed case study of the pro independence Scottish National Party demonstrates that supranational integration and subnational fragmentation are related in theoretical and predictable ways Posits that the EU makes smaller states more viable and politically attractive by diminishing the relative economic and political advantages of larger sized states *Conflict and Peace in Central Eurasia* Babak Rezvani, 2015-01-27 Conflict and Peace in Central Eurasia combines theory with in depth description and systematic analyses of ethnoterritorial conflict and coexistence in Central Eurasia Central Eurasia is at the heart of the Eurasian continent around the Caspian Sea Much of this macro region is made up of the post Soviet republics in Central Asia and the Caucasus but it also covers other areas such as parts of Russia and Iran Central Eurasia is subject to a number of ethnoterritorial conflicts Yet at the same time a large number of ethnic groups speaking different languages and following different religions coexist peacefully in this macro region Babak Rezvani explains

ethno territorial conflicts not only by focusing on these conflicts but also by comparing all cases of conflict and coexistence in post Soviet Central Asia the Caucasus and Fereydan the so called Iranian little Caucasus Aiming at formulating new theories this book makes use of qualitative comparative analysis QCA as well as case studies and statistical analyses It provides an innovative and interesting contribution to Eurasian Studies and Conflict Analysis and at the same time demonstrates a detailed knowledge of the relevant literature Based on thorough research the study offers a deep and insightful history of the areas and conflicts concerned

Regionalism after Regionalisation Frans Schrijver, 2025-10-01 Throughout Europe regionalist movements claim more autonomy for their region pointing at cultural and historical distinctiveness and the demands of their populations In some places violence is used to put pressure on the state and in many states in Europe and elsewhere the issue of regional minorities figures prominently on political agendas Over the last few decades many states have introduced regional governments and parliaments often as an answer to regionalist demands with a view of making regionalist movements redundant and satisfying most of their supporters Others have warned that this was a step towards fragmentation and even the break up of nation states Regionalism after Regionalisation presents a response to this debate Concentrating on three

countries Spain France and the United Kingdom and three regional case studies of Galicia Brittany and Wales this book offers an analysis of the development of political regionalism after regionalisation It examines the ways in which regionalisation influences the institutionalisation of a region and the establishment of regional identities It explains how the introduction of regional governments and elections alters the conditions in which claims for a regionalist project are put forward and in which ways it effects public demands for regional autonomy This study analyses whether regionalisation is accepted as a sufficient answer to those demanding political and cultural autonomy and how political actors from regionalist and mainstream political parties deal with new regional political institutions as opportunities to mobilise support

Multicultural Policies and Modes of Citizenship in European Cities Alisdair Rogers,Jean Tillie,2001 Globalization is a dominant feature of the end of the 20th century One phenomenon characterizing the contemporary world is the increase in international population movements

Pro-Russian Organizations in Poland after 1986 Przemysław Witkowski,2025-11-13 This book shows how for 35 years Russia has been supporting its

agents of influence and allies in a seemingly highly hostile society Poland Conspiracy narratives ideological harmony and old alliances from the period of the Eastern Bloc are primarily the glue that binds the Russian network of influence In depth journalistic investigations spy trials and embarrassing email leaks here you can find many answers to how Moscow works when it wants to influence the political situation in third countries in this case Poland The Polish case study of the pro Russian camp shows how the Kremlin operates in NATO s eastern flank wanting to increase political polarization supporting radicalism and strengthening the message of extremists from both the right and the left This book tells us what political circles Moscow s Polish allies come from their goals and their beliefs It also shows their international alliances outlining the Russian network of influence in the European Union and more broadly The author also tries to impose on this set of political entities a network of concepts doctrines and theories the Moscow center uses to show permanent mechanisms of action As a result this book ceases to be just a case study of Poland and becomes a much more helpful study allowing the use of patterns obtained from many years of research summarized in this publication to understand Russia s influence in other regions Having examined the reasons for cooperation with Russia ideological geopolitical and historical in a country as reluctant to form alliances as Poland and understanding the mechanisms of selection and influence on such actors by the Kremlin we can transfer this knowledge to understand the pattern to other countries It will be of interest to researchers of Russian and Polish politics right wing nationalism and hybrid warfare
