Ethological Studies Of Child Behaviour:

Ethological Studies of Child Behaviour N. Blurton Jones, 1972-03-09 This 1972 volume contains specially written reports by research workers in zoology psychology and psychiatry applying methods of comparative ethology in studies of human behaviour It is intended as a contrast to popular researches in animal behaviour There has been a considerable increase in the number of descriptive analytical studies of human behaviour concerned principally with the behaviour of children and their mothers and the methods have become widely used The present collection of papers assesses the value of the methods and clarifies the particular contributions which they may make to an understanding of human behaviour The papers cover a range of topics familiar from animal studies non verbal communication mother infant interaction play and aggressive behaviour but also range widely into more usual subjects for developmental psychology cross cultural studies development of skills class differences in mother infant interactions This is essentially a book for research workers teachers and students of behavioural sciences

Ethological Studies of Child Behaviour Nicholas Blurton Jones, 1976

Ethological Studies of Child Behaviour N. Blurton Jones, 1972 **Social Competence in Developmental Perspective** B.H. Schneider, Grazia Attili, Jacqueline Nadel, Roger P. Weissberg, 2012-12-06 What determines the focus of a researcher's interest the sources of inspiration for a study or the variables scrutinized If we were to examine the antecedents of these decisions they would surely emerge as accidents of circumstance the personal experiences of the researcher the inspiration of early mentors the influence of contemporary colleagues all tempered by the intellectual currents that nurture the researcher's hypotheses Among the accidents that mold the careers of researchers is geographic location The culture in which a research program emerges helps determine both its very subject and its method The primary purpose of this book is to assist those interested in the scientific study of children's social competence in transcending the boundaries imposed both by geography and by selective exposure to the highly diverse schools of thought that have led to interest in this field Most of these ideas were presented and exchanged at an Advanced Study Institute entitled Social Competence in Developmental Perspective held in Savoie France in July 1988 This Institute was attended by scholars from France England Northern Ireland Germany Italy Norway Spain Portugal Netherlands Canada the United States and Brazil Those who participated will recognize that the metamorphosis from lecture to chapter has necessitated many changes In order to accommodate the reader who may be unfamiliar with the field more attention has been paid here to identifying the theoretical contexts of the research described

Ethology and Human Development John Archer, 1992-01-01 The developmental origins of human behavior are often seen as having parallels with the natural world of animal behavior Researchers in ethology the biological study of animal behavior have amassed an enormous body of research but the psychological study of child development has often ignored the findings with the notable exception of John Bowlby's use of imprinting as a basis for a novel theory of human attachment The author of this new book a psychologist who has carried out research in ethology evaluates the impact

of several decades of ethological work on developmental psychology He views human development from the context of the natural world thereby re establishing the links begun with Charles Darwin between research on child development and animal behavior Chapters summarize important research on observational methods animal models social processes sociobiology the comparative method non verbal communication and mental processes An Ethological Study of Children's Behavior William Clement McGrew,1972 **The Ecology of Preschool Behaviour** Peter K. Smith,Kevin J. Connolly,1980 This study examines the preschool years in a child s development education and their deployment in preschool institutions

New Developments in Behavioral Research: Theory, Method and Application Barbara C. Etzel,Judith M. LeBlanc,Donald M. Baer,2020-09-10 Originally published in 1977 these examples of research and scholarly argument were collected in honor of Professor Sidney W Bijou In the language of academics they constitute a Festschrift a festival of scholarly writing performed to celebrate the career of a person who produced and stimulated others to produce exactly such contributions throughout a long valuable and productive professional history Since 1955 Dr Bijou had worked almost exclusively within the approach variously labelled as the functional analysis of behavior the experimental analysis of behavior operant conditioning or Skinnerian psychology From his point of view it seems clear the first of these labels was the correct one It was the principle of objective direct observable analysis that attracted him **Theory and Research in Behavioral Pediatrics**

Hiram Fitzgerald,2013-06-29 This volume initiates a series devoted to theory and research in behavioral pedi atrics Focusing attention on the limited scientific contributions to understanding the development of behavior will we hope stimulate further research in this vitally important area of human knowledge The ability of an individual to achieve his or her full potential as an adult is to a significant degree determined by critical variables in this development within a given society Study of this aspect of human biology therefore may have far reaching effects on the evolving human species An awareness of the complexity of the behavioral patterns in infancy is of relatively recent origin and is an obvious essential starting point for this series of publications The need to discriminate between objective observations and theo retical constructs and to design scientifically valid experiments is vital to progress in understanding early infant behavior It is easy to misinterpret apparent responses to interventions especially in infants at biological risk Preterm infants and their caretakers are particularly challenging as subjects but very difficult to assess scientifically The interactions between mother and newborn and father and newborn hold promise of substantial additional insights into the development of behavior Thus this volume provides interesting perspectives into the relationship of the evolving immature neurological system to complex behavior patterns in newborn infants which raise many new questions and exciting opportunities to extend our very limited knowledge about the newborn infant s psychosocial emo tional and cognitive development RICHARD E BEHRMAN M D Comparing Behavior D. W. Rajecki,2014-05-22 First published in 1983 The aim of this book was to get a sense of how scientists viewed their own comparative domain Using references from a variety of fields including anthropology ethology genetics philosophy

psychology and zoology It includes a diversity of approaches for discussion on how to compare behavior *Early Childhood Educational Research* Carol Aubrey, Tricia David, Ray Godfrey, Linda Thompson, 2005-12 This work focuses on the field of early years research It argues that the educational research community has blossomed in the UK in recent years with the growth of higher degrees and practitioner research within this area *Growing Points Ethology* P. P. G. Bateson, R. A.

Hinde, 1976-10-07 First published in 1976 this volume is a collection of essays by some of the most prominent and active ethologists It is organized into four sections motivation and perception function and evolution development and human social relationships The first three sections reflect the four questions which are basic to ethology what were the immediate causes of a behaviour pattern what is its biological function how did it evolve and how did it develop in the individual The last section involves questions of all four types The sections are introduced and linked by editorials and the book concludes with an important statement on asking the right questions The essays are forward looking and identify areas of importance for the study of behaviour The volume is a source of formative ideas for students their teachers and research workers in a wide variety of disciplines in the biological psychological and social sciences **Behavioral Development** Klaus

Immelmann, George W. Barlow, Lewis Petrino, Mary Biggar Main, 1981-11-30 **Evolutionary Perspectives on Child Development and Education** David C. Geary, Daniel B. Psychology of Education: Social behaviour and the school peer group Peter K. Smith, Anthony D. Pellegrini, 2000

The Child at School Peter Blatchford, Anthony D. Pellegrini, Ed Baines, 2015-07-16 What is the nature of children's social

life in school How do their relationships and interactions with peers teachers and other school staff influence their development and experience of school This book written by leading researchers in educational and developmental psychology provides answers to these questions by offering an integrated perspective on children s social interactions and relationships with their peers and teachers in school Peer interactions in school have tended to be underestimated by educationalists and this book redresses the balance by giving them equal weight to teacher child interactions In this second edition the authors extensively revise the text on the basis of many years of research and teaching experience They highlight common misconceptions about children their social lives and school achievement which have often resulted in ineffective school policy The book includes a number of important topics including The significance of peer friendships at school The nature and importance of play and break times Aggression and bullying at school Peer relations and learning at school The classroom environment and teacher pupil interaction The influence of gender in how children learn at school Advantages and disadvantages of different methodological approaches for studying children in school settings Policy implications of current research findings The Child at School will be essential reading for all students of child development and educational psychology It will also be an invaluable source for both trainee and practicing teachers and teaching assistants as well as clinical psychologists and policy makers in this area Animal Models in Human Psychobiology George Serban,2012-12-06

In March 1974 an International Symposium was held at the Harmonie Club in New York to discuss a highly pertinent problem in today s research the Relevance of the Animal Psychopathological Model to the Human This meeting was sponsored by the Kittay Foundation which brought together an outstanding group of scientists involved in widely different fields of research This volume it is hoped will convey the tone of lively and cordial exchange between internationally renowned investigators including Dr I Eibl Eibesfeldt from Germany Dr Robert A Hinde from England Dr Edward F Domino from Michigan and Dr Pierre Pichot from France Chairman of the Steering Committee In his welcoming address Mr Sol Kittay reminded us that man has achieved remarkable control over his environment but not over himself and he suggested that we should reexamine our ancestral origins and search in animal behavior for clues to the understanding of normal and abnormal behavior in man **Perspectives on Social Psychology** Clyde Hendrick,2015-06-19 Originally published in 1977 this volume was intended to provide a relatively elementary and clear overview of some of the more important approaches to social psychology at the time There are a number of perspectives on this discipline but here instead of traditional theoretical approaches e g field theory role theory or S R the point of view is from the general perspective The first chapter approaches social psychology as an experimental science with the history and philosophic traditions discussed as well as the current state of the field Other chapters approach the discipline from the perspectives of symbolic interaction social development and ethology The final chapter is devoted to the uses of mathematical models in social psychology This volume was intended to serve as a helpful integration of the field and will still be useful as a text in its historical context *Nonverbal Behavior and*

Communication Aaron W. Siegman, Stanley Feldstein, 2014-01-02 First published in 1987 An attractive feature of nonverbal communication as a research area is that it has captured the interest of scholars of different disciplinary backgrounds psychologists linguists anthropologists psychiatrists and sociologists with each discipline bringing to the area its peculiar theoretical and methodological perspectives and biases Each of these disciplines also tend to have a favorite topic or problem area within the general domain of nonverbal communication Along with the varying yet overlapping topical concerns that the different disciplines bring to the area of nonverbal communication are major differences in methodology The sections into which the book is divided roughly organize the chapters in terms of their concerns with the bodily structures and zones that are involved in nonverbal behavior

Transformations Helen Schwartzman, 2012-12-06 Writing a book about play leads to wondering In writing this book I wondered first if it would be taken seriously and then if it might be too serious Eventually I realized that these concerns were cast in terms of the major dichotomy that I wished to question that is the very pervasive and very inaccurate division that Western cultures make between play and seriousness or play and work fantasy and reality and so forth The study of play provides researchers with a special arena for re thinking this opposition and in this book an attempt is made to do this by reviewing and evaluating studies of children's transformations their play in relation to the history of anthropologists transformations their theories While studying play I have wondered in the company of many individuals I would first like to thank my husband John Schwartzman for acting as both my strongest supporter and as an anthropological colleague my severest critic His sense of nonsense is always novel as well as instructive I am also very grateful to Linda Barbera Stein for her Sherlock Holmes style help in locating obscure references checking and cross checking information and patience and persistence in the face of what at times appeared to be bibliographic chaos I also owe special thanks to my teachers of anthropology Paul J Bohannon Johannes Fabian Edward T Hall and Roy Wagner whose various orientations have directly and indirectly influenced the approach presented in this book
