Routledge Handbook of Differentiation in the European Union Benjamin Leruth, Stefan Gänzle, Jarle

Trondal, 2022-05-11. The Routledge Handbook of Differentiation in the European Union offers an essential collection of groundbreaking chapters reflecting on the causes and consequences of this complex phenomenon. With contributions from key experts in this subfield of European Studies, it will become a key volume used for those interested in learning the nuts and bolts of differentiation as a mechanism of disintegration in the European Union, especially in the light of Brexit. Organised around five key themes, it offers an authoritative encyclopaedia of differentiation and addresses questions such as: How can one define differentiation in the European Union in the light of the most recent events? Does differentiation create more challenges or opportunities for the European Union? Is Europe moving away from an ever closer Union and heading towards an ever more differentiated Union, especially as leading political figures across Europe favour the use of differentiation to reconcile divergences between member states? This handbook is essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in and actively concerned about research in the study of European integration. As European differentiation is multifaceted and involves a wide range of actors and policies, it will be of further interest to those working on countries and/or in policy areas where differentiation is an increasingly relevant feature. The Introduction and chapters 13, 21, 30 and 35 of this book are available for free in PDF format as Open Access from the individual product page at www.routledge.com. Is the European Union Capable of Integrating Diverse Models of Capitalism? Alison Johnston, Aidan Regan, 2021-03-30 The 2009 European sovereign debt crisis and the EU's policy response to it have prompted scholars to re think whether diverse national models of capitalism can thrive within the European Union EU Are some national economic systems better suited to adapt to European integration than others and if so why Contributions within this volume provide a qualified yes to these questions raised concluding that the EU favors export led growth models while it penalizes and discourages domestic consumption oriented growth paths particularly those that are financed by debt accumulation The book questions whether the EU is capable of integrating these diverse capitalist regimes This volume adds a comparative capitalism perspective to EU integration scholarship in order to demonstrate that ever closer union is not capable of accommodating diversity in

national economic institutions Chapters in this volume provide an innovative framework for understanding what factors related to European integration impede the economic and political integration of diverse European market economies While recent comparative capitalism literature highlights that European monetary integration has favored export led growth regimes contributions in this volume outline that the EU's prioritization of export led growth over domestic demand led growth is present in other facets of integration including EU accession financial integration the free movement of people fiscal governance and the Europe 2020 growth strategy The chapters in this book were originally published as a special issue of *New Political Economy* **Sustainable Development of Water and Environment** Han-Yong Jeon, 2025-01-02 This book
