Human Dimensions of Ecological Restoration Dave Egan,Evan E. Hjerpe,Jesse Abrams,2012-09-26 When it comes to implementing successful ecological restoration projects the social political economic and cultural dimensions are often as important as and sometimes more important than technical or biophysical knowledge Human Dimensions of Ecological Restoration takes an interdisciplinary look at the myriad human aspects of ecological restoration In twenty six chapters written by experts from around the world it provides practical and theoretical information analysis models and guidelines for optimizing human involvement in restoration projects Six categories of social activities are examined collaboration between land manager and stakeholders ecological economics volunteerism and community based restoration environmental education ecocultural and artistic practices policy and politics For each category the book offers an introductory theoretical chapter followed by multiple case studies each of which focuses on a particular aspect of the category and provides a perspective from within a unique social political cultural setting Human Dimensions of Ecological Restoration delves into the often neglected aspects of ecological restoration that ultimately make the difference between projects that are successfully executed and maintained with the support of informed engaged citizens and those that are unable to advance past the conceptual stage due to misunderstandings or apathy The lessons contained will be valuable to restoration veterans and greenhorns alike scholars and students in a range of fields and individuals who care about restoring their local lands and waters

Climate Consciousness and Environmental Activism in Composition Joseph R. Lease,2020-02-18 Now more than ever in a time when Americans still do not believe that humans are the primary cause of Earth s climate change crisis the burden on educators to inform challenge and motivate students about sustainability is greater than it ever has been On college campuses writing intensive courses often located within First Year or General Education curricula are an ideal place to take up this charge because of the flexibility of their content and the high volume of students that they reach In this volume a varied group of composition instructors with wide ranges and types of experiences provides best practices for

bringing issues surrounding climate change into the writing classroom From literature based composition and creative writing courses to design thinking workshops to seminars against sustainability the authors in this volume lay out a multitude of possibilities for blending writing and environmental concerns that fellow practitioners can easily adopt or modify for their own use

Ecology and Justice—Citizenship in Biotic Communities David R. Keller, 2019-03-30 This is the first book to outline a basic philosophy of ecology using the standard categories of academic philosophy metaphysics axiology epistemology aesthetics ethics and political philosophy The problems of global justice invariably involve ecological factors Yet the science of ecology is itself imbued with philosophical questions Therefore studies in ecological justice the sub discipline of global justice that relates to the interaction of human and natural systems should be preceded by the study of the philosophy of ecology This book enables the reader to access a philosophy of ecology and shows how this philosophy is inherently normative and provides tools for securing ecological justice The moral philosophy of ecology directly addresses the root cause of ecological and environmental injustice the violation of fundamental human rights caused by the inequitable distribution of the benefits economies and costs diseconomies of industrialism Philosophy of ecology thus has implications for human rights pollution poverty unequal access to resources sustainability consumerism land use biodiversity industrialization energy policy and other issues of social and global justice This book offers an historical and interdisciplinary exegesis The analysis is situated in the context of the Western intellectual tradition and includes great thinkers in the history of ecological thinking in the West from the natural sciences social sciences and humanities Keller asks the big questions and surveys answers with remarkable detail Here is an insightful analysis of contemporary classical and ancient thought alike in the ecological sciences the humanities and economics the roots and fruits of our concepts of nature and of being in the world Keller is unexcelled in bridging the is ought gap bridging nature and culture and in celebrating the richness of life its pattern process and creativity on our wonderland Earth Holmes Rolston III University Distinguished Professor Colorado State University Author of *A New Environmental Ethics The Next Millennium for Life on Earth* 2012 Mentored by renowned ecologist Frank Golley and renowned philosopher Frederick Ferré David Keller is well prepared to provide a deep history and a sweeping synthesis of the idea of ecology including the metaphysical epistemological and ethical aspects of that idea as well as the scientific J Baird Callicott University Distinguished Research Professor University of North Texas Author of *Thinking Like a Planet The Land Ethic and the Earth Ethic* 2013

of more than seven billion people who mostly reside in cities and towns the Baltimore Ecosystem Study is recognized as a pioneer in modern urban social ecological science After two decades of research education and community engagement there are insights to share generalizations to examine and research needs to highlight This timely volume synthesizes the key findings melds the perspectives of different disciplines and celebrates the benefits of interacting with diverse communities and institutions in improving Baltimore s ecology These widely applicable insights from Baltimore contribute to our understanding the ecology of other cities provide a comparison for the global process of urbanization and inform establishment of urban ecological research elsewhere Comprehensive interdisciplinary and highly original it gives voice to the wide array of specialists who have contributed to this living urban laboratory Routledge Handbook of Ecocriticism and Environmental Communication Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2019-02-01 Ecocriticism and environmental communication studies have for many years co existed as parallel disciplines occasionally crossing paths but typically operating in separate academic spheres These fields are now rapidly converging and this handbook aims to reinforce the common concerns and methodologies of the sibling disciplines The Routledge Handbook of Ecocriticism and Environmental Communication charts the history of the relationship between ecocriticism and environmental communication studies while also highlighting key new paradigms in information studies diverse examples of practical applications of environmental communication and textual analysis and the patterns and challenges of environmental communication in non Western societies Contributors to this book include literary film and religious studies scholars communication studies specialists environmental historians practicing journalists art critics linguists ethnographers sociologists literary theorists and others but all focus their discussions on key issues in textual representations of human nature relationships and on the challenges and possibilities of environmental communication The handbook is designed to map existing trends in both ecocriticism and environmental communication and to predict future directions This handbook will be an essential reference for teachers students and practitioners of environmental literature film journalism communication and rhetoric and well as the broader meta discipline of environmental humanities **Remaking Wormsloe Plantation** Drew A. Swanson, 2012-04-01 Why do we preserve certain landscapes while developing others without restraint Drew A Swanson s in depth look at Wormsloe plantation located on the salt marshes outside of Savannah Georgia explores that question while revealing the broad historical forces that have shaped the lowcountry South Wormsloe is one of the most historic and ecologically significant stretches of the Georgia coast It has remained in the hands of one family from 1736 when Georgia s Trustees granted it to Noble Jones through the 1970s when much of Wormsloe was ceded to Georgia for the creation of a state historic site It has served as a guard post against aggression from Spanish Florida a node in an emerging cotton economy connected to far flung places like Lancashire and India a retreat for pleasure and leisure and a carefully maintained historic site and green space Like many lowcountry places Wormsloe is inextricably tied to regional national and global

environments and is the product of transatlantic exchanges Swanson argues that while visitors to Wormsloe value what they perceive to be an authentic undisturbed place this landscape is actually the product of aggressive management over generations He also finds that Wormsloe is an ideal place to get at hidden stories such as African American environmental and agricultural knowledge conceptions of health and disease the relationship between manual labor and views of nature and the ties between historic preservation and natural resource conservation Remaking Wormsloe Plantation connects this distinct Georgia place to the broader world adding depth and nuance to the understanding of our own conceptions of nature and history *Make It a Green Peace!* Frank Zelko,2013-04-03 Make it a Green Peace explores the complex intellectual and cultural roots of Greenpeace tracing the development of the organization from its emergence amidst the various protest movements of the 1950s and 1960s to the end of its volatile dramatic and at times quirky first decade in 1980 **Living Above the Store** Martin Melaver,2009 Not Merely Sustainable Restorative A viable business is a living thing embedded in the complex web of economy community and ecology Done right business can help correct the modern stresses of environmental degradation and social fragmentation and create value for workers shareholders and additional stakeholders in the community Living Above the Store explores a road less traveled and chronicles how business can navigate a new path toward successful restorative practices Book jacket Spaceship Earth in the Environmental Age, 1960-1990 Sabine Höhler,2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War Höhler's study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades

Environmental Ethics, Ecological Theology, and Natural Selection Lisa H. Sideris,2003 Lisa Sideris proposes a new way of thinking about the natural world an environmental ethic that incorporates the ideas of natural selection and values the processes rather than the products of nature Such an approach encourages us to take a minimally interventionist approach to nature Only when the competitive realities of evolution are faced squarely Sideris argues can we generate practical environmental principles to deal with such issues as species extinction and the relationship between suffering and sentience Complex Ecology Charles G. Curtin,Timothy F. H. Allen,2018-05-31 Research papers from the end of twentieth century have been assembled alongside expert commentary for the first collected volume on complexity based ecology
