This book provides a comprehensive survey of the social geography of Western Europe. It begins by outlining the character of the region and proceeds with an exploration of demographic and cultural features including migration and ethnic groups. The political organisation of nations and regions are analysed along with regional change and development. The study concludes with a consideration of key issues central to the geography of social well being such as regional convergence, divergence and the impact of public expenditure patterns.

Global Geostrategy Brian Blouet, 2020-09-23. This is a new examination of Halford Mackinder's seminal global geostrategic work from the perspective of geography, diplomatic history, political science, international relations, imperial history and the space age. Mackinder was a man ahead of his time. He foresaw many of the key strategic issues that came to dominate the twentieth century. Until the disintegration of the Soviet Union, western defence strategists feared that one power or alliance might come to dominate Eurasia. Admiral Mahan discussed this issue in *The Problem of Asia* 1900 but Mackinder made the most authoritative statement in *The Geographical Pivot of History* 1904. He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire. James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder's prophecy becoming reality. In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union. In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up. In World War II Britain and the US gave material support to Stalin's totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for world domination. The west, highly conscious of Mackinder's dictum 1919 that 'Who rules East Europe commands the Heartland', quickly adopted policies to contain the Soviet Union. History has therefore proved Mackinder's work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium. This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular.

A Guide to the Geography of Pliny the Elder Duane W. Roller, 2022-07-28. This is the first thorough English commentary on the geographical books of Pliny the Elder written in the AD 70s. Pliny's account is the longest in Latin and represents the geographical knowledge of that era when the Roman Empire was the dominant force in the Mediterranean world. The work serves both cultural and ideological functions; much of it is topographical but it also demonstrates the political need to express a geographical basis for the importance of the Roman state. In five books Pliny covers the entire world as it was known in his era and includes some of the first information on the extremities of the inhabited region.

including Scandinavia and the Baltic eastern Asia and sub Saharan Africa The commentary provides a detailed analysis of all the points Pliny raises his sources toponyms and understanding of the place of the earth in the cosmos Geological Survey of Ohio Ohio.
