Postcolonial Perspectives on Postcommunism in Central and Eastern Europe Dorota Kołodziejczyk, Cristina Șandru, 2017-10-02 A quarter of a century after the fall of the Berlin Wall and from the vantage point of a post Cold War globalised world there is a need to address the relative neglect of postcommunism in analysis of postcolonial and neo colonial configurations of power and influence This book proposes new critical perspectives on several themes and concepts that have emerged within or been propagated by postcolonial studies These themes include structures of exclusion inclusion formations of nationalism structures of othering and representations of difference forms and historical realisations of anti colonial anti imperial struggle the experience of trauma involving issues of collective memory amnesia and the re writing of history resistance as a complex of cultural practices and concepts such as alterity ambivalence self colonisation dislocation hegemonic discourse minority and subaltern cultures Taken together this volume suggests that some of the methodological instruments of postcolonial criticism can be fruitfully applied to the study of postcommunist cultures and conversely that the experience of the Soviet brand of imperialist rule in the form of communism in East Central Europe can function as an ideological moderator in Third World oriented Marxist inspired postcolonial discourses This book was originally published as a special issue of the Journal of Postcolonial Writing

United States of America and Japan Plutopolitocracy Frederick M. Tampoe, 2009 The credit crunch has focused people's attention to the fact that Democracy is not working as it was intended to as a governance system that institutionalises power sharing between a country's government and its people. The people are being increasingly marginalised by career politicians and businessmen and women who have combined forces to create a plutopolitocracy that uses the power of the state to further their personal ambitions. Here Dr Frederick M Tampoe traces how this change came about. He describes the rise of the plutopolitocracy, the huge influence that money and celebrity is playing in democratic politics and how through its use businesses are increasingly dominating political agendas. He looks at the major role played by the nations that are the strongest advocates of democracy and how they have succumbed to the temptation to manipulate national and global political systems and institutions to advance narrow political agendas, individual careers and the business interests of their sponsors in big business. And he explores how the imposition of free market thinking on struggling nations has enriched global big business in developed nations at the cost of other nations and their people. Finally he examines how the reassertion of human worth, integrity in public and business life and a more neighbourly society with a reassertion of moral and ethical values would help the demos reverse the current drift towards a world that is dominated by the plutopolitocracy.

Boomgaard, 2007-01-01 Water in its many guises has always played a powerful role in shaping Southeast Asian histories, cultures, societies, and economies. This volume, the rewritten results of an international workshop with participants from eight countries, contains thirteen essays representing a broad range of approaches to the study of Southeast Asia with water as the central theme. As it was exposed to the sea, the region was more accessible to outside political, economic, and cultural influences than many landlocked areas. Easy access through sea routes also stimulated trade from an early age. However, the same easy access made Southeast Asia vulnerable to political control by strong outsiders. The sea is moreover a source of food but also of many hazards. At the same time, Southeast Asian societies and cultures are confronted with and permeated by water from heaven in the form of rain, flash floods, irrigation water, water in rivers, brooks, and swamps, water-driven power plants, and pumped or piped water in addition to water as a carrier of sewage and pollution. Finally, the volume deals with the role of water in classification systems, beliefs, myths, illness, and healing.
