Reframing Europe's Future Jody Jensen,Ferenc Mislivetz,2014-09-19 The global financial crisis which erupted in 2008 had an astounding yet varied impact on the European Union EU with some countries benefiting from the crisis while others suffered Today many more and varied voices articulate increasing frustration dissatisfaction distrust and cynicism with the current state of affairs in Europe This book addresses the challenges and failures of the European construction today from an interdisciplinary perspective It seeks to identify the deeper structural causes of the failure of the European project by investigating a variety of aspects placing Europe in a historical perspective and interpreting its trajectory in a global context In doing so it argues that the EU the unfinished European polity the single European market and the set of supranational institutions are not sustainable in their present forms This text will be of key interest to students and practitioners of international relations economics European studies democracy and contemporary European and global challenges

The Balkans: Foreign Direct Investment and EU Accession Aristidis Bitzenis,2016-03-23 The fall of communism and subsequent developments have put a renewed spotlight on the potential of the Balkan economies Bulgaria Albania Serbia Montenegro Romania and the Former Yugoslav Republic of Macedonia are countries which have attracted low levels of investment and poor political leadership in most of the countries has delayed much needed reforms However there are now signs of improvement and this timely book fills a significant gap in the available literature Demonstrating that these countries must engage as fully as

possible with the world economy via EU accession this book explores the implications of the specific characteristics of these countries which have made the transition process more difficult This exciting new volume is valuable reading for students academics and business professionals interested in international development in the Balkans **Poland and European Integration** T. Lane, M. Wolanski, Marian Wolański, 2015-12-17 Today's Euroscepticism contrasts sharply with the idealism of the thousands of Poles thrust out of their country after 1939 by war occupation and communism How could a future Poland find security and progress but by membership in a union of European states This book explores how Poles in exile attempted to shape opinion in Poland and the West Eastern Europe in the Twentieth Century – And After R. J. Crampton, 2002-04-12 Covering all key Eastern European states and their history right up to the collapse of communism this second edition of *Eastern Europe in the Twentieth Century And After* is a comprehensive political history of Eastern Europe taking in the whole of the century and the geographical area Focusing on the attempt to create and maintain a functioning democracy this new edition now examines events in Bosnia and Herzegovina includes a new consideration of the evolution of the region since the revolutions of 1989-91 surveys the development of a market economy analyzes the realignment of Eastern Europe towards the West details the emergence of organized crime discusses each state individually includes an up to date bibliography *Eastern Europe in the Twentieth Century And After* provides an accessible introduction to this key area which is invaluable to students of modern and political history **The Eastern Bloc and Sub-Saharan Africa** Barbora Buzásová, 2024-06-03 This book analyses the shifting patterns of Czechoslovak educational aid programmes for sub-Saharan African countries within the broader framework of the global debates on the nature of development aid in education discussed on the UNESCO grounds during the three development decades Starting in the early 1960s Czechoslovakia sent abroad hundreds of experts hoping to stimulate the development of local educational and scientific institutions However over the years the development aid to African countries transformed into a special form of foreign trade and distribution of experts turned into a profitable business Yet the tendencies towards sustainability and higher return on investment in the field of development aid were not limited just to the socialist bloc but emerged globally This book therefore not only revisits the roles of Czechoslovakia and Africa in the Cold War history but also reflects on the function of aid in international politics The Eastern Bloc and Sub-Saharan Africa will appeal to students and historians specializing in the global Cold War and particularly those curious about development international organizations economic history and transfers of knowledge in transnational networks **Borders in Post-Socialist Europe** Tassilo Herrschel, 2016-04-08 Borders have attracted considerable attention in public and academic debates in light of the impact of globalisation and in Europe the end of the divisions of the Cold War era Instead being inside or outside of the EU has become a major paradigmatic divide between claimed spheres of influence by Brussels and Moscow respectively In the aftermath of the end of communism established certainties no longer seemed to apply And this included many of the borders within the former eastern Bloc with some losing

their relevance while others re assert themselves As its particular contribution this book adopts a symbiotic approach to the analysis of borders drawing on a political economy perspective while also recognising the importance of the socio cultural dimension as found in border studies This seeks to do greater justice to the complex composite nature of borders as geo political state legal and cultural historic constructs in both theory and practice In addition the book s approach stretches across spatial scales to capture the multi level nature of borders The first part of the book presents the conceptual framework as it sets out to embrace this multi faceted multi layered nature of borders In the second part case studies from north central Europe including the Baltic Sea Region exemplify the complexity of borders in the context of post socialist transformation and continuing EU isation

The Economic History of Central, East and South-East Europe Matthias Morys, 2020-12-29 The collapse of communism in Central East and South East Europe CESEE led to great hopes for the region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies

The Unknown Europe James R. Payton Jr., 2021-11-03 The fascinating history of Eastern Europe includes highs of soaring cultural achievement and lows of almost unimaginable repression But we in the West don t know much about Eastern Europe or its history this book helps us see why We got interested when the region became a threat during the Cold War but what we learned focused on the Communist period after World War II not Eastern Europe itself or its deep history a history that continues to live in the hearts of its peoples James Payton offers an accessible treatment of the history of the region an opportunity to learn about Eastern Europeans as they are He overviews that story from pre history to the present examining eleven turning points that profoundly shaped Eastern European history His treatment considers the backgrounds to the turning points the events and the long lasting impacts they had for the various Eastern European nations This helps us understand how Eastern Europeans themselves see their history the long haul over the centuries with the influence and impact of events of the sometimes distant past shaping how they see themselves their neighbors and their place in the world
