European Armaments Market And Procurement Cooperation:

The European Armaments Market and Procurement Cooperation Pauline Creasey, Simon May, Pauline Creasey, 1988-06-18 **European Armaments Collaboration** Ron Matthews, 2013-10-15 First published in 1992 The changing strategic environment of the 1990s has been characterised by events such as the Middle East conflagration and super power disarmament which represent the two opposing ends of the present security spectrum The framing of appropriate defence policies now depends on increased NATO industrial defence restructuring and cooperation especially within Europe This book identifies explains and analyses the key issues involved in Europe's defence industrial reorganisation progress It tackles head on controversial issues such as divergences between practice and policy in NATO US European positions the high costs of collaborative ventures competition vs concentration and the complexities of adopting an European defence consensus within NATO At a time when the diminution of NATO's defence industrial base goes hand in hand with product reorientation and specialization this book provides concise critical and contemporary assessment of European and NATO collaborative issues **The Law of Collaborative Defence Procurement in the European Union** Baudouin Heuninckx, 2017 The book examines and makes proposals for improving the law and management of collaborative defence procurement programmes and provides practical examples to enhance efficiency of cooperation between states Covering a broad scope of legal issues it contains invaluable information for practitioners policy makers and academics aiming to analyse or improve these projects **British Weapons Acquisition Policy and the Futility of Reform** Warren A. Chin, 2019-09-17 Originally published in 2004 This incisive work reveals the causes of escalating costs and delays in British defence procurement from 1945 to the present Tackling a complex subject in a straightforward and readable manner it considers how successive British governments reacted to this problem why they adopted the reforms they did and why these reforms failed to have any meaningful effect on the operation of this process The study draws upon a number of disciplines such as economics politics and science and engineering to provide a broad synthesis that allows the reader to understand the technicalities of the process The conclusion reached is that there is no apparent solution to the problem of intergenerational costs of weapons but that a key to controlling the growing cost of projects during their development lies in the construction of a more effective research and development strategy a path followed by Margaret Thatcher's predecessors and one that is also being advocated today *Restructuring of Arms Production in Western Europe* Stockholm International Peace Research Institute, 1992 Profound changes are occurring in the structure of arms production in Western Europe Concentration is increasing at a fast pace Small producers are disappearing and even large ones are opting out of the market The various national arms industries long operating in protective environments are rapidly internationalizing Three factors combine to bring about this change East West detente the creation of the Single European Market and the constant pressure of increasingly complex technology In this book experts describe how the framework for producing arms in Western Europe

is altered and how various actors firms governments and trade unions are adapting to the new situation The book presents detailed analyses of all the arms producing countries in Western Europe In addition to describing recent changes the authors speculate on the implications of these for the balance of power in Western Europe the relations between Western Europe and the United States arms exports to the Third World and problems of converting from military to civilian production The appendices include the SIPRI list of the 50 largest arms producing companies in Western Europe data on mergers and acquisitions procurement expenditure and exports of major weapons selections from treaties and other official documents relevant to current and future regulation of West European arms production and a select bibliography European Defence Cooperation in EU Law and IR Theory T. Dyson,2013-05-07 This book offers a novel contribution to the study of post Cold War European defence Interdisciplinary in approach it uses European law to assess the utility of existing theoretical accounts By exploring the balance of threat theory it provides new insights into the forces driving and hindering European defence cooperation **Handbook of European Union Governance** Sonia Lucarelli,James Sperling,2025-05-14 This expansive Handbook compares the global milieu security economic and societal systems of EU governance It identifies the theoretical underpinnings and characteristics of each governance system and examines how these ensure public safety social welfare sustainability and economic competitiveness **Integration And Security In Western Europe** Mathias Jopp,2021-10-28 The contributors to this volume discuss how a West European security union would fit into the trans Atlantic and trans European settings Representatives from each of the West European NATO and EC member countries contribute their national views on the subject while representatives of major institutions European Political Cooperation the European Parliament NATO and the West European Union offer their international perspectives Weapons Procurement in Phase Considerations Glen Segell,1998 **The DISAM Journal of International Security Assistance Management** ,1988 Global Arms Trade ,1991 Europe and the United States Glennon J. Harrison,2016-09-16 A product of the Committee on Foreign Affairs of the US House of Representatives this text studies the emergence of a more unified Europe as an economic and political power and the implications of European integration for the United States *Global Arms Production* Ethan B. Kapstein,1992 Why do states collaborate in the production of advanced weaponry Under what conditions do such collaborative arrangements succeed What are the implications of armaments collaboration for the international economic and security environments Arms collaboration is not a new phenomenon but there is increasing debate both in the United States and abroad over the associated costs and benefits Critics charge that collaborative projects result in technology give aways the creation of defense industrial competitors and the loss of domestic jobs Supporters argue that the very same projects strengthen alliance relations provide access to new technology and result in arms sales which might otherwise have been lost to foreign competitors In *Global Arms Production* these issues are addressed by distinguished contributors such as Ethan B Kapstein Jacques S Gansler William Keller Joel L Johnson Jack Nun Robert H Trice C Michael Farr Grant T Hammond and

Stanley Sienkiewicz Co published with the Center for International Affairs of Harvard University *The Naval Arms Trade* Ian Anthony, 1990 This book offers a sober appraisal of the world trade in naval weapon systems at a time when recent attacks on merchant shipping in the Persian Gulf have kept maritime security at the centre of global attention At the same time India outside the international non proliferation regime has become the first ever customer for a nuclear attack submarine In 1987 88 the most expensive and controversial arms sales were related to naval systems and yet while regional navies are busy increasing their firepower the traditional naval powers remain dependent on their sea borne trade In particular the book highlights critical areas in which trade in naval systems differs from the sale of land or air systems and it discusses the implications of these differences **Program Manager**, 1990 Toward a European Army Trevor C. Salmon, Alistair J. K. Shepherd, 2003 A comprehensive analysis of the European defence project its origins purpose and goals

The New Security Concept and German-French Approaches to the European "Pillar of Defence," 1990-2000

Siret Hürsoy, 2002 A historic opportunity without precedent is gradually becoming reality in the 21st Century with the chance taken to pave the way in the period 1990 2000 towards the organisation of defence in Europe The corresponding conditions have been brought about by concrete steps taken at the Masstricht Amsterdam Cologne Helsinki and Nice European Council meetings In the end the EU WEU is developing into an equal partner to the US by assuming greater responsibility in the security and defence sphere The French and German bilateral relationship which is the driving force behind every European integration process is the historical force behind this development of the ultimate desire to reach a robust European Pillar of Defence through reconfiguration of the transatlantic relationship This book provides the first comprehensive and up to date analysis of German and French approaches to the European Pillar of Defence from the view of Europeanisation emanating from the process of integration *Defence Industrial Cooperation in the European Union* Daniel Fiott, 2019-03-28 This book provides an empirical understanding of how EU level defence industrial cooperation functions in practice Using the Liberal Intergovernmental theoretical model the book argues that while national economic preferences are an essential factor of government interests they only explain part of the dynamic that leads to the development of defence industrial policy at EU level Moving beyond a simple adumbration of economic preferences it shows how the EU s institutional framework and corpus of law are used by governments to reaffirm their position as the ultimate arbiter and promoter of national economic preferences in the defence industrial sector To this end the work asks why and how EU member state governments European defence firms and EU institutions developed EU level defence industrial policy between 2003 and 2009 The book also analyses significant policy developments including the establishment of a European Defence Agency and two EU Directives on equipment transfers and defence procurement This book will be of much interest to students of EU policy defence studies security studies and International Relations in general Essays on Civil-military Relations, Military-industrial Relations, Weapon Procurement, and International Relations Glen Segell, 1997 **The Global Arms Trade** Andrew T. H.

Tan,2014-05-22 The Global Arms Trade is a timely comprehensive and in depth study of this topic a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001 It provides a clear description and analysis of the demand for and supply of modern weapons systems and assess key issues of concern This book will be especially useful to scholars policy analysts those in the arms industry defence professionals students of international relations and security studies media professionals government officials and those generally interested in the arms trade
