## **European Citizenship Practice Building Institutions Of A Non State:**

*Citizenship and Collective Identity in Europe* Ireneusz Pawel Karolewski, 2009-12-04 This book is the first monograph to systematically explore the relationship between citizenship and collective identity in the European Union integrating two fields of research citizenship and collective identity Karolewski argues that various types of citizenship correlate with differing collective identities and demonstrates the link between citizenship and collective identity He constructs three generic models of citizenship including the republican the liberal and the caesarean citizenship to which he ascribes types of collective identity Using a multidisciplinary approach the book integrates concepts theories and empirical findings from sociology in the field of citizenship research social psychology in the field of collective identity legal studies in the chapter on the European Charter of Fundamental Rights security studies in the chapter on the politics of insecurity and philosophy in the chapter on pathologies of deliberation to examine the current trends of European citizenship and European identity politics This book will be of interest to students and scholars of European politics political theory political philosophy sociology and social psychology

*EU Citizenship and Federalism* Dmitry Kochenov, 2017-04-13 Leading experts in EU constitutional law examine the foundational importance of citizenship rights in delimiting the scope of EU law

*Europe's Functional Constitution* Turkuler Isiksel, 2016 Constitutionalism has become a byword for legitimate government but is it fated to lose its relevance as constitutional states relinquish power to international institutions This book evaluates the extent to which constitutionalism as an empirical idea and normative ideal can be adapted to institutions beyond the state by surveying the sophisticated legal and political system of the European Union Having originated in a series of agreements between states the EU has acquired important constitutional features like judicial review protections for individual rights and a hierarchy of norms Nonetheless it confounds traditional models of constitutional rule to the extent that its claim to authority rests on the promise of economic prosperity and technocratic competence rather than on the democratic will of citizens Critically appraising the European Union and its legal system this book proposes the idea of functional constitutionalism to describe this distinctive configuration of public power Although the EU is the most advanced instance of functional constitutionalism to date understanding this pragmatic mode of constitutional authority is essential for assessing contemporary international economic governance

## **Proliferation of International Organizations**

Niels M. Blokker, Henry G. Schermers, 2021-11-29 The proliferation of international organizations is presently a hot issue New international organizations have been created over the last few years such as the Organization for the Prohibition of Chemical Weapons and the World Trade Organization At the same time a certain reluctance may be observed to create new organizations Overlapping activities and conflicting competences occur frequently and the need for coordination is evident The events in former Yugoslavia are an example Both during the armed conflicts in Bosnia and Kosovo and afterwards in the era of reconstruction the need to coordinate the work of organizations such as the UN NATO the EU the World Bank OSCE

and the Council of Europe was vital Against this background a number of legal issues have become more important that have not yet been researched extensively perhaps the only exception being the proliferation of international tribunals Questions include the following Why were new organizations created while others already existed in the same or a related field What specific legal problems have arisen that are related to the coexistence of different organizations working partly in the same area What mechanisms or instruments have been developed to coordinate the activities and to solve legal problems These and other questions were discussed during a conference that took place from 18 to 20 November 1999 in the Academy Building of Leiden University The Netherlands A large number of experts both academics and practitioners participated The purpose of this book is to present the issues discussed during the Leiden conference to a larger audience This book contains the adapted papers for the conference and several other contributions

### **The European Union at an Inflection Point**

Alasdair Young, 2018-09-25 The cutting edge contributions to this book analyse different facets of the European Union EU closer integration among the member states policymaking within a normal political system and the implications of European integration for its member states This book also considers whether the challenges currently confronting the EU the lingering Eurozone debt crises the migrant refugee crisis the British decision to leave the EU and terrorist attacks in Belgium France and Germany mark an inflection point for the Union and for the study of the EU For the first time less Europe rather than closer integration has emerged as a serious option in response to crisis This possibility reignites questions of dis integration and calls into question the assumption of the EU as a normal political system This book was originally published as a special issue of the Journal of European Public Policy

*A Republican Europe of States* Richard Bellamy, 2019-01-31 Examines the

democratic legitimacy of international organisations from a republican perspective diagnoses the EU as suffering from a democratic disconnect and offers democracy as the cure

### **The Limits of Gendered Citizenship**

Elżbieta H. Oleksy, Jeff Hearn, Dorota Golańska, 2011-02-01 The underlying theme of this edited collection is gendered citizenship as well as the challenges and limits that confront the gendering of citizenship It critiques the notion of the genderless nation state citizen in both analytical and policy terms and contexts and necessarily engages with at least three major sets of contradictions or tensions limitations on achieving gender equal or gender equitable citizenship relations and differences between gender equality policy diversity policy and gender mainstreaming and interplays of academic analyses of and practical interventions on gendered citizenship Contributors from diverse scientific disciplines and academic backgrounds aim to provide a better understanding of the challenges that societies within Europe and elsewhere face vis vis diversity regionalism

transnationalism and migration

### **Opting Out of the European Union**

Rebecca Adler-Nissen, 2014-08-14 This book provides the first in depth account of how European Union opt outs and differentiated integration work in practice

Law and Citizenship Law Commission of Canada, 2011-11-01 Long confined to the study of nationality citizenship was not always considered a major concern of social scientists In recent decades however the concept of citizenship has generated

significant interest and intellectual debate in a variety of academic contexts Globalization is changing the relationships between actors on the national and international stage and shifting the balance of power between them These changes have spawned a wealth of scholarship across social science disciplines The essays in *Law and Citizenship* add to this lively discourse and provide a framework for analyzing citizenship in an increasingly globalized world A number of fundamental issues are addressed How are traditional notions of citizenship erecting borders against those who are excluded What are the impacts of changing notions of state borders and participation on our concepts of citizenship Within territorial borders to what extent are citizens able to participate given that the principles of accountability transparency and representativeness remain ideals There are numerous implications of the concept of citizenship for law and public policy in a number of different fields International law both private and public poverty law immigration law constitutional law history political science and sociology all reflect concepts of citizenship *Law and Citizenship* will appeal to scholars and students in law and politics as well as those interested in the idea of citizenship in contemporary society

Themes in Modern European History Since 1945 Rosemary Wakeman, 2003 Twelve chapters consider the key political cultural and economic changes of post 1945 Europe

*The Oxford Handbook of European Union Law* Anthony Arnall, Damian Chalmers, 2015-07-23 Since its formation the European Union has expanded beyond all expectations and this expansion seems set to continue as more countries seek accession and the scope of EU law expands touching more and more aspects of its citizens lives The EU has never been stronger and yet it now appears to be reaching a crisis point beset on all sides by conflict and challenges to its legitimacy Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact EU law always controversial continues to perplex not least because it remains difficult to analyse What is the EU An international organization or a federation Should its legal concepts be measured against national standards or another norm The Oxford Handbook of European Union Law illuminates the richness and complexity of the debates surrounding the law and policies of the EU Comprising eight sections it examines how we are to conceptualize EU law the architecture of EU law making and administering EU law the economic constitution and the citizen regulation of the market place economic monetary and fiscal union the Area of Freedom Security and Justice and what lies beyond the regulatory state Each chapter summarizes analyses and reflects on the state of play in a given area and suggests how it is likely to develop in the foreseeable future Written by an international team of leading commentators this Oxford Handbook creates a vivid and provocative tapestry of the key issues shaping the laws of the European Union

*Governing Public Health* Mark L Flear, 2015-07-30 This book contributes towards EU studies and the growing discourse on law and public health It uses the EU s governance of public health as a lens through which to explore questions of legal competence and its development through policy and concrete techniques processes and practices risk and security human rights and bioethics accountability and legitimacy democracy and citizenship and the nature essence and future trajectory of the European integration project These issues are explored first

by situating the EU's public health strategy within the overarching architecture of governance and subsequently by examining its operationalisation in relation to the key public health problems of cancer HIV AIDS and pandemic planning The book argues that the centrality and valorisation of scientific and technical knowledge and expertise in the EU's risk based governance means that citizen participation in decision making is largely marginalised and underdeveloped and that this must change if public health and the quality accountability and legitimacy of EU governance and its regulation are to be improved Subsequently the book goes on to argue that the legitimating discourses of ethics and human rights and the developing notion of EU supra stewardship responsibility can help to highlight the normative dimensions of governance and its interventions in public health These discourses and dimensions provide openings and possibilities for citizens to power technologies of participation and contribute important supplementary knowledge to decision making

**European Union Law** Damian Chalmers,Gareth Davies,Giorgio Monti,2014-06-19 As the preferred choice of both teachers and students this textbook offers an unrivalled combination of expertise accessibility and comprehensive coverage The new edition reflects the way the economic crisis has impacted the shape and nature of European Union law Materials from case law legislation and academic literature are integrated throughout to expose the student to the broadest range of views Additional online material on the application of EU law in non member states and on rulings on the Fiscal Compact ensures the material is completely current The new edition includes a timeline which charts the evolution of the EU project Written in a way which encourages sophisticated analysis the book ensures the student's full engagement with sometimes complex material More importantly it offers the clarity which is essential to understanding A required text for all interested in European Union law

**Encyclopedia of Race, Ethnicity, and Society** Richard T. Schaefer,2008-03-20 This encyclopedia offers a comprehensive look at the roles race and ethnicity play in society and in our daily lives Over 100 racial and ethnic groups are described with additional thematic essays offering insight into broad topics that cut across group boundaries and which impact on society

**The Rights of Immigrant Workers in the European Union** Joanna Apap,2002-09-25 6 Spain **Who Speaks for Roma?** Aidan McGarry,2010-05-01 **Citizens of Europe?** M. Bruter,2005-08-11 This book shows empirically for the first time how a mass European identity has emerged across the EU member states between 1970 and the present day Beyond this novel approach it also offers a whole new theory of political identities based on two civic and cultural components Michael Bruter shows how multiple identities reinforce rather than exclude each other and studies in depth the unsuspected impact of the media and political institutions on the emergence of new political identities **European Approaches to International Relations Theory** Jörg Friedrichs,2004-03 Jörg Friedrich presents an important new introduction to the existence and relevance of European approaches to IR theory and sets an agenda for the progressive development of a Eurodiscipline of IR studies *From Migrants to Citizens* T. Alexander Aleinikoff,Douglas Klusmeyer,2013-01-25 Citizenship policies are changing rapidly in the face of global migration trends and the inevitable ethnic and racial diversity that follows

The debates are fierce What should the requirements of citizenship be How can multi ethnic states forge a collective identity around a common set of values beliefs and practices What are appropriate criteria for admission and rights and duties of citizens This book includes nine case studies that investigate immigration and citizenship in Australia the Baltic States Canada the European Union Israel Mexico Russia South Africa and the United States This complete collection of essays scrutinizes the concrete rules and policies by which states administer citizenship and highlights similarities and differences in their policies From Migrants to Citizens the only comprehensive guide to citizenship policies in these liberal democratic and emerging states will be an invaluable reference for scholars in law political science and citizenship theory Policymakers and government officials involved in managing citizenship policy in the United States and abroad will find this an excellent accessible overview of the critical dilemmas that multi ethnic societies face as a result of migration and global interdependencies at the end of the twentieth century

*Citizens in Europe* Giovanni Moro, 2011-12-04 In the Community building process citizens are the most invoked and feared but at the same time the least known subject This lack of knowledge nourishes the citizens detachment from the European Union and itself emerged in well known cases such as the French and Dutch referenda on the Constitutional Treaty or the public concern towards the EU policy on immigration This gap is true especially for active citizenship organizations operating in the European policy making not only in Brussels but also and above all at national and local levels and this book is aimed at filling this knowledge gap The book is divided into two parts The first part of the book focuses on the way in which the literature on EU governance and citizenship and on participatory democracy deals with citizen activism in public policy making The second part discusses a number of empirical research projects on civic activism in Europe This book aims on the one hand to bridge the academic debate to more policy oriented debates in which active citizenship organizations and policy makers are involved and on the other hand to bridge theoretical discussion of the nature of the EU with the empirical literature based on the study of civic activism in Europe and at the national level The distinctiveness of the book is that it tries to overcome both the methodological nationalism that affects the research and public debate on the EU the normative attitude of most part of European studies in favor of an approach aimed at describing phenomena and the habit of dealing with civic associations in Europe by referring only to the Brussels Civil Society making it of interest to both policy makers as well as students and scholars in European Studies Political Science Sociology and International Relations
