European Community Economics A Modern Introduction:

European Community Economics Theodore Hitiris, 1988
Commodity Tax Harmonization in the European Community Andreas Haufler, 2012-12-06 The book is concerned with the main issues that arise for general commodity taxation in the internal market the choice of a new international tax principle and the question of tax rate harmonization The book provides a thorough discussion of these issues and evaluates the choices made by the European Community from a welfare theoretic perspective by comparing them to feasible alternatives The discussion integrates a large number of recent theoretical and policy oriented contributions which have so far not been collected and summarized in a single volume Special features of the book are that a the analysis combines elements of international trade theory and public finance two economic disciplines which are rarely integrated b a dual general equilibrium framework is used throughout the analysis c a second best setting is consistently employed incorporating relevant policy constraints and integrating conflicting arguments in a single analytical framework d part of the theoretical analysis is supplemented by a computable general equilibrium approach The book shows that well known international trade models can be extended to model alternative principles for taxing international trade but also international differences in preferences for public goods and different views of government behavior issues which are directly relevant for the discussion of tax rate harmonization but are rarely treated in an analytical way

MA G v M *The European Fundamental Freedoms* Pedro Caro de Sousa, 2015 Law can be looked at from both an internal legal perspective

reflected in the official discourse supporting legal decisions and an external perspective which is pursued by studies that look at the law from the outside as the subject of sociological economic or philosophical analysis This external dimension related to extra legal factors that impact the law such as the institutional environment in which the law is applied is usually ignored or not addressed systematically by studies that focus on the internal perspective By systematically internalizing these external elements into legal theory and practice contextual approaches lead to the development of better descriptive theories and more attractive normative models of the law and specifically EU law than de contextualized approaches allow for Additionally contextual approaches are more self aware than de contextualized approaches since they are able to make sense of the role that legal practice by judges legal practitioners and academics plays in the development of the law It is through a contextual approach that Pedro Caro de Sousa develops a general theory of European constitutional law in particular free movement law and the EU fundamental freedoms As a contribution to the development of EU constitutionalism this monograph focuses on the interplay between the different normative concerns behind the EU s market freedoms identified in traditional legal discourse and the various extra legal and institutional factors that affect how that law is applied and develops in practice Moving away from traditional studies of free movement law Caro de Sousa s book offers a fresh approach to free movement law Rather than proposing normative approaches he uses this approach to construct a broader thesis that the EU law of free movement can best be understood as interplay of traditional legal doctrines and practices and the specific institutional environment where this law is applied and developed
