focus on commonly used pricing schemes using incomplete contracting models Chapter 2 develops the basic symmetric information model to compare the performance of cost based and negotiated pricing in the absence of external input markets Chapter 3 considers market based pricing and the role of internal price adjustments it ignores investments and focuses solely on trading incentives Chapter 4 adds investments to the model of Chapter 3 and shows that investment opportunities further strengthen the case for internal adjustments Chapter 5 reconsiders the initial analysis of Chapter 2 for the case of asymmetrically informed divisional managers The book ends with the author's conclusions and an appendix including the mathematical proofs A key theme running through Internal Pricing is that the firm's central office i.e. headquarters plays a rather limited role in mediating individual transactions This captures the stylized empirical fact that in most firms headquarters designs the broad rules of the game by choosing a pricing mechanism and compensation contracts but usually does not get involved in pricing on a product by product basis
