also presents a nearly complete bibliography of Agrippa's primary sources revealing Agrippa as a mainstream scholar of his day. Presenting the first new English translation of Three Books of Occult Philosophy in more than 350 years, this three-volume hardcover boxed set repairs the gaps in knowledge pervasive in the original translation and restores the magical spirit of Agrippa's masterpiece, allowing us to hear Agrippa speak again. *Passing on the Faith* James L. Heft, 2009-08-25

From the beginning, the Abrahamic faiths—Judaism, Christianity, and Islam—have stressed the importance of transmitting religious identity from one generation to the next. Today, that sustaining mission has never been more challenged. Will young people have a faith to guide them? How can faith traditions anchor religious attachments in this secular, skeptical culture? The fruit of a historic gathering of scholars and religious leaders across three faiths and many disciplines, this important book reports on the religious lives of young people in today's world. It's also a unique inventory of creative and thoughtful responses from churches, synagogues, and mosques working to keep religion a significant force in those lives. The essays are grouped thematically. Opening the book, Melchor Sanchez de Toca and Nancy Ammerman explore fundamental issues that have an impact on religion from the cultural effects of global consumerism and personal technology to pluralism and individualism. In Part Two, leading investigators present three leading studies of religiosity among young people and college students in the United States, illuminating the gap between personal values and organized religion and the emergence of new, different forms of spirituality and faith. How religious institutions deal with these challenges forms the heart of the book, in portraits of best practices developed to revitalize traditional institutions: from a synagogue in New York City and a Muslim youth camp in California to the famed French Catholic community of the late Brother John of Taizé. Finally, Jack Miles and Diane Winston weave the findings into a broader perspective of the future of religious belief, practice, and feeling in a changing world. Filled with real-world wisdom, *Passing the Faith* will be an essential resource for anyone seeking to understand what religions must and can do to inspire a vigorous faith in the next generation. **First Light** Walter Hugh Boore, 1973

Parapsychology David Groome, Ron Roberts, 2016-11-07. Containing contributions from leading paranormal researchers, this edition of *Parapsychology* continues to challenge and provoke readers with some of psychology's most puzzling phenomena. Whether believers or skeptics, the book provides readers with the opportunity to further their understanding of the paranormal, bridging the gap between traditional psychology and its so-called fringe areas. Featuring updates to many of the original chapters, this book brings readers up to date with the wealth of radical research in the field. This edition also includes several new chapters covering subjects as diverse as possession and exorcism, conspiracy theories, reincarnation, and religious belief, many of which are extremely relevant in the world today. Drawing on a range of research, the book provides a balanced introduction to parapsychology, exploring the strengths and limitations of scientific investigation itself. *Parapsychology* is for readers from a variety of backgrounds: professionals in the field, students, lay readers, and anyone who wants to understand what the paranormal can tell us about ourselves. A variety of viewpoints are on offer.

Overing,Ulrike Wiethaus,2019-10-07 One of the great virtues of American Medieval Goes North is ist wide range of contributors with fascinatingly diverse relationships to the main terms of analysis There are academic scholars poets filmmakers tribal elders teachers at various levels there are Indigenous people

people from settler colonial cultures expats immigrants Their analytic and imaginative encounters with the North catch at the intensely symbolic and political charge of that locus At a time when Medieval Studies cannot afford to ignore the period s popular uptake cannot continue with business as usual in the face of white supremacists brazen appropriations of the Middle Ages this volume points to new possibilities for grappling with the uneasy relationships between the American and the medieval Prof Carolyn Dinshaw New York University

In Search of the I Ramón Lugo, 2016-07-25 This unbelievable yet true story reminds one of biblical struggles it echoes the story of Jacob wrestling with the Angel of God Throughout a long dark night in the middle of the Atlantic a lone man in a kayak braves ruthless tropical storm Franklin Nothing is there to help him no media no helicopters no rescue teams and yet his life is spared The book describes much more than this capturing imagination and awe inspiring ordeal In 2005 the author Ramon Lugo set off to kayak alone across the Atlantic Ocean from the Chesapeake Bay to Spain He considered this crossing a means of finding his inner self He sought to experience times when pure courage is needed to let spirit take over The narrative conveys the raw sense of a seemingly impossible attempt to cross the ocean in a kayak in hurricane season As we join Ramon David Lugo on his breathtaking odyssey we get a taste of his unimaginable courage which is a sister to faith

Seagrasses of Australia Anthony W. D. Larkum, Gary A. Kendrick, Peter J. Ralph, 2018-07-27 This book takes the place of Biology of Seagrasses A Treatise on the Biology of Seagrasses with Special Reference to the Australian Region co edited by A W D Larkum A J MaCComb and S A Shepherd and published by Elsevier in 1989 The first book has been influential but it is now 25 years since it was published and seagrass studies have progressed and developed considerably since then The design of the current book follows in the steps of the first book There are chapters on taxonomy floral biology biogeography and regional studies The regional studies emphasize the importance of Australia having over half of the world s 62 species including some ten species published for Australia since the previous book There are a number of chapters on ecology and biogeography fish biology and fisheries and dugong biology are prominent chapters Physiological aspects again play an important part including new knowledge on the role of hydrogen sulphide in sediments and on photosynthetic processes Climate change pollution and environmental degradation

this time gain an even more important part of the book Decline of seagrasses around Australia are also discussed in detail in several chapters Since the first book was published two new areas have received special attention blue carbon and genomic studies Seagrasses are now known to be a very important player in the formation of blue carbon i e carbon that has a long turnover time in soils and sediments Alongside salt marshes and mangroves seagrasses are now recognized as playing a very important role in the formation of blue carbon And because Australia has such an abundance and variety of seagrasses their role in blue carbon production and turnover is of great importance The first whole genomes of seagrasses are now available and Australia has played an important role here It appears that seagrasses have several different suites of genes as compared with other land plants and even in comparison with freshwater hydrophytes This difference is leading to important molecular biological studies where the new knowledge will be important to the understanding and conservation of seagrass ecosystems in Australia Thus by reason of its natural abundance of diverse seagrasses and a sophisticated seagrass research community in Australia it is possible to produce a book which will be attractive to marine biologists coastal scientists and conservationists from many countries around the world *The Anglo-Welsh Review* ,1974 Modern Church ,1892

Freedom All The Way Up Christian J. Barrigar,2017-05-19 Freedom All The Way Up proposes four intertwined elements that make up the meaning of life self worth purpose identity and hope Materialism atheism claim the universe has no meaning so there is no larger purposeful story into which we can place ourselves we are left on our own to construct meaning for our lives Barrigar argues though that the universe possess God s meaning and purpose to provide the space and conditions by which to bring about the existence of agape capable beings in agape loving relationships with God and with others In effect the universe is a great freedom system designed by God with freedom built in all the way up from the Big Bang to the emergence of big brains and free will Barrigar describes the emergence of this system through his novel agape probability account of God s design for the universe which integrates such disciplines as quantum physics statistical mechanics probability theory evolutionary psychology neuroscience and game theory This system sets up the conditions for a fundamental choice between autonomous freedom which focuses principally on self and agapic freedom which focuses principally on God and on others Materialism chooses autonomous freedom but thereby introduces nihilism into each of the elements of meaning In turns out that nihilism is a much greater problem for Materialism than suffering is for Theism In contrast agapic freedom infuses self worth purpose identity and hope with God s agape love dispelling Materialism s inherent nihilism Freedom All The Way Up provides a dramatic new proposal for God and the meaning of life in our scientific and humanist age
