fathered their nation as a whole These pariahs numbering more than two million are segregated by caste just as firmly as the Negro is in the United States The present volume to which several Japanese and American social scientists have contributed offeres an interdisciplinary description and analysis of this strangely persistent phenomenon inherited from feudal times Its main thesis is that caste and racism are derivatives of identical psychological processes in human personality however differently structure they may be in social institutions It finds that what it terms status anxiety related to defensively held social values leads to a need to segregate disparaged parts of the population on grounds of innate inferiority Until the time of their official emancipation in 1871 the so called eta were distinguished visibly by their special garb Today few clues to their identity are visible yet they remain a distinguishable segregated segment of the population and bear inwardly in a psychological sense the stigma resulting from generations of oppression This volume traces the story of the outcastes in complete detail their origin their stormy post emancipation history and their present leftist political significance Large populations of outcasts live in urban ghettos within the major cities of south central Japan In some of these metropolitan centers they comprise up to 5 percent of the population but contribute 60 to 65 percent of unemployment and relief roles They have periodic trouble with the police they manifest a delinquency rate more than three times that of the ordinary population their children do poorly in school they are subject to various forms of job discrimination and few marriages are successfully consummated across the caste barrier Some try to escape their past identity by becoming prostitutes or by entering the underworld Those who survive discrimination to achieve status in society either live in fear of exposure if they are passing or overtly maintain their identity in proud isolation Some who live in rural communities have achieved equal economic status with their neighbors but not full social acceptance In their theoretical closing discussion the authors offer a challenging critique of Marxian class theory in introducing the concept of expressive exploitation that is the psychological use of a subordinate group as a repository of what is disavowed by the values of a culture in a caste society as distinct in form and function from the instrumental economic or political exploitation of subjected minorities in class societies Contributors Gerald Berreman John B Cornell John Donoghue Edward Norbeck John Price Yuzuru Sasaki George O Totten This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966

Lebron,2013-08-08 For many Americans the election of Barack Obama as the country's first black president signaled that we had become a post racial nation some even suggested that race was no longer worth discussing Of course the evidence tells a very different story And while social scientists are fully engaged in examining the facts of race normative political thought has failed to grapple with race as an interesting moral case or as a focus in the expansive theory of social justice Political thought's under participation in the debate over the status of blacks in American society raises serious concerns since the main academic task of political theory is to adjudicate discrepancies between the demands of ideal justice and social realities Christopher J Lebron contends that it is the duty of political thought to address the moral problems that attend racial inequality and to make those problems salient to a democratic polity Thus in *The Color of Our Shame* he asks two major questions First given the success of the Civil Rights Act and the sharp decline in overt racist norms how can we explain the persistence of systemic racial inequality Second once we have settled on an explanation what might political philosophy have to offer in terms of a solution In order to answer these questions Lebron suggests that we reconceive of racial inequality as a condition that marks the normative status of black citizens in the eyes of the nation He argues that our collective response to racial inequality ought to be shame While we reject race as a reason for marginalizing blacks on the basis of liberal democratic ideals we fail to live up to those ideals a situation that Lebron sees as a failure of national character Drawing on a wide array of resources including liberal theory virtue ethics history and popular culture Lebron proposes a move toward a perfectionist politics that would compel a higher level of racially relevant moral excellence from individuals and institutions and enable America to meet the democratic ideals that it has set for itself *White on White/Black on Black* George Yancy,2005-03-25 *White on White Black on Black* is a unique contribution to the philosophy of race The book explores how fourteen philosophers seven white and seven black philosophically understand the dynamics of the process of racialization

Combined the contributions demonstrate different and similar conceptual trajectories of raced identities that emerge from within and across the racial divide Each of the fourteen philosophers who share a textual space of exploration name blackness whiteness revealing significant political cultural and existential aspects of what it means to be black white Through the power of naming and theorizing whiteness and blackness **White on White Black on Black** dares to bring clarity and complexity to our understanding of race identity

The Skin Game Michael Burnett Miller,2020-08-18 This book is about racism and colorism in the African American community It will inform you on how colorism was founded by racism throughout the 17th century with Europeans It also will show you how we as Black people hold on to traits that were given to us during slavery This book will get into how so many things we perceive to be good and even holy started from racism things such as religion and the hate and separation we have as descendants of enslaved Africans toward each other This book is more than just food for thought but it will dig deep into the very core of your heart and soul In this book I will convince you that we as a people cannot do anything to help support and promote ourselves unless we are looked at as nationalist or a cult but every other group of people who are white Chinese Hispanics Arabs or any other group of people can make it a necessity to help their own

Integrative Antiracism Edith P. Samuel,2005-01-01 From both a theoretical and practical standpoint racism is one of the most important topics that has engaged the attention of social scientists in North America in recent years As societies become more ethnically diverse people from different cultures are increasingly coming into contact with each other resulting in ever greater opportunities for racism to manifest itself In this work Edith Samuel examines the educational experiences of South Asian students and faculty members from the perspective of integrative antiracism the study of how the dynamics of social difference are mediated in people s daily lives Specifically she analyses perceptions of and responses to racism in four critical areas faculty student relationships peer group interactions curriculum and the psychosocial dimension Antiracism scholars maintain that racism is widespread on Canadian university campuses Drawing on the available literature and extensive interviews with students and faculty Samuel looks at both overt and covert forms of racism as well as structural racism that results in discrimination in admissions and employment She also looks at race class gender history and culture and how these interlocking systems produce unique experiences of racism for South Asians in academe Through the exploration of the intricate patterns of South Asians assimilation into university life Integrative Antiracism identifies the numerous barriers racial minorities encounter and suggests a variety of approaches to fostering a more equitable education system

What Blood Won't Tell Ariela J. Gross,2010-05-01 Is race something we know when we see it In 1857 Alexina Morrison a slave in Louisiana ran away from her master and surrendered herself to the parish jail for protection Blue eyed and blond Morrison successfully convinced white society that she was one of them When she sued for her freedom witnesses assured the jury that she was white and that they would have known if she had a drop of African blood Morrison s court trial and many others over the last 150 years involved high stakes freedom property and civil rights And they all turned on the

question of racial identity Over the past two centuries individuals and groups among them Mexican Americans Indians Asian immigrants and Melungeons have fought to establish their whiteness in order to lay claim to full citizenship in local courtrooms administrative and legislative hearings and the U S Supreme Court Like Morrison s case these trials have often turned less on legal definitions of race as percentages of blood or ancestry than on the way people presented themselves to society and demonstrated their moral and civic character Unearthing the legal history of racial identity Ariela Gross s book examines the paradoxical and often circular relationship of race and the perceived capacity for citizenship in American society This book reminds us that the imaginary connection between racial identity and fitness for citizenship remains potent today and continues to impede racial justice and equality
