Museums, Equality and Social Justice Richard Sandell, Eithne Nightingale, 2013-05-20 The last two decades have seen concerns for equality diversity social justice and human rights move from the margins of museum thinking and practice to the core The arguments both moral and pragmatic for engaging diverse audiences creating the conditions for more equitable access to museum resources and opening up opportunities for participation now enjoy considerable consensus in many parts of the world A growing number of institutions are concerned to construct new narratives that represent a plurality of lived experiences histories and identities which aim to nurture support for more progressive ethically informed ways of seeing and to actively inform contemporary public debates on often contested rights related issues At the same time it would be misleading to suggest an even and uncontested transition from the museum as an organisation that has been widely understood to marginalise exclude and oppress to one which is wholly inclusive Moreover there are signs that momentum towards making museums more inclusive and equitable is slowing down or in some contexts reversing Museums Equality and Social Justice aims to reflect on and crucially to inform debates in museum research policy and practice at this critical time It brings together new research from academics and practitioners and insights from artists activists and commentators to explore the ways in which museums galleries and heritage organisations are engaging with the fast changing equalities terrain and the shifting politics of identity at global national and local levels and to investigate their potential to contribute to more equitable fair and just societies **Handbook of Research on Social Justice and Equity in Education** Keengwe,

Jared, 2022-05-06 There is growing pressure on teachers and other educators to understand and adopt the best ways to work with the various races cultures and languages that diverse learners represent in the ever increasing culturally diverse learning environments Establishing sound cross cultural pedagogy is also critical given that racial cultural and linguistic integration has the potential to increase academic success for all learners To that end there is also a need for educators to prepare graduates who will better meet the needs of culturally diverse learners as well as support their students to become successful global citizens The Handbook of Research on Social Justice and Equity in Education highlights cross cultural perspectives challenges and opportunities pertaining to promoting cultural competence equity and social justice in education It also explores multiple concepts of building a bridge from a monocultural pedagogical framework to cross cultural knowledge Covering topics such as diversity education and global citizenship this major reference work is ideal for academicians researchers practitioners policymakers instructors and students Diversity and Cultural Competence in Health Care Janice L.
