SERI-SP, 1979 *Electronic String Art* Stephen Erfle, 2024-02-20 String art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities This activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds The downside of this highly tactile activity is that it is quite time consuming and rigid By contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously *Electronic String Art Rhythmic Mathematics* invites readers to use the author s digital resources available on the ESA website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change Readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections Features Readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections Sections are lessons that were created so that they could be digested in a single sitting These sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting An open ended inherently flexible teaching resource for elementary middle and high school level mathematics The most mathematically challenging sections or portions of a section are designated MA and may not be accessible to elementary and middle school readers Will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics Includes exercises solutions and many online digital resources These QR codes take you to these digital resources One takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in Section 25 5 The other takes you to the ESA web page with additional links to a variety of resources

Sexual Bargaining in the Digital Era John H. Scanzoni, 2021-10-05 Sexual Bargaining in the Digital Era follows the evolution of genders sexualities and so on away from their Old Normal ON pattern which prevailed during the Agricultural Age and the Industrial Age and into the New Normal NN pattern which is currently surfacing in concert with an emerging Digital Era ON was based on the ancient traditional script governing how women men children ought to behave within the spheres of genders marriages families relationships sexualities Over the centuries ON eventually modified into the familiar 1950s style nuclear patriarchal cisgender husband wife with children and family And now that style itself is fading away into NN NN is based not on script but on improvisation it is essentially a continual work in progress To make it function the partners engage in ongoing negotiation governed by the principle that everything is negotiable except the principle that everything is negotiable NN has thus far been pursued most frequently by persons New Lights who are educated and relatively advantaged ON has been pursued mostly by persons Old Lights who are less educated and relatively

less advantaged ON is also strongly embraced by persons of a traditional religious bent persons who tend to be rigid and unbending in their religious views Currently they tend to be extremely right wing evangelicals and extremely right wing Catholics Importantly their political clout far exceeds their relatively modest numbers within the larger population In brief the shift from ON to NN is a move away from the sanctity of a particular structure to the primacy of persons engaged in ongoing processes of inventing and reinventing certain arrangements of genders marriages families relationships sexualities enabling them to fulfil their needs for primary intrinsic emotional satisfactions such as liking loving empathy companionship sexual and so forth Among other things this shift replaces the preeminence of the historic binary or cisgender approach heterosexual legal children and so on in favor of the diversity variety multiplicity approach which incorporates under one conceptual umbrella all persons of whatever genders sexualities and so on All persons are thus engaged in a common struggle to achieve personal satisfactions as well as contribute to the Greater Good

Bach's Cycle, Mozart's Arrow Karol Berger,2007-10-02 In this erudite and elegantly composed argument Karol Berger uses the works of Monteverdi Bach Mozart and Beethoven to support two groundbreaking claims first that it was only in the later eighteenth century that music began to take the flow of time from the past to the future seriously second that this change in the structure of musical time was an aspect of a larger transformation in the way educated Europeans began to imagine and think about time with the onset of modernity a part of a shift from the premodern Christian outlook to the modern post-Christian worldview Until this historical moment as Berger illustrates in his analysis of Bach's St Matthew Passion music was simply in time Its successive events unfolded one after another but the distinction between past and future earlier and later was not central to the way the music was experienced and understood But after the shift as he finds in looking at Mozart's Don Giovanni the experience of linear time is transformed into music's essential subject matter the cycle of time unbends and becomes an arrow Berger complements these musical case studies with a rich survey of the

Subcommittee on Domestic and International Scientific Planning and Analysis,1976 *How to Fight Back from Big Debt* S. A. Brown,2011 **A to Z Word Potpourri** Dick Pellek,2019-02-01 The Chronicles of a Footloose Forester were compiled over a number of years one story at a time Events observations encounters and episodes were the ingredients in the mix that got filed into his memory banks and extracted years later but only after it was decided to make them into his memoirs Afghanistan to Zambia Chronicles of a Footloose Forester published in 2010 was the first distillation of those memories and was based on an alphabetical recounting of places he had been In the beginning there was no intention of putting his chronicles into a book the alphabetical listing of countries he had visited was at the time in the early 1960s only a device to properly respond to inquiries about his travels pursuant to obtaining and updating a yearly security clearance At one time or another the FBI the Army Security Agency the Department of Agriculture and the Department of State all wanted his biographical information which included the places and the addresses where he had lived since 1931 Obviously that meant every place since he was born Thus it was easier to compile a logical listing and to keep that list in his records for easier updating The countries of Afghanistan and Zambia eventually worked their way into the list thus his first book Afghanistan to Zambia Chronicles of a Footloose Forester was chosen as the title of his first book of memoirs The process is ongoing Since the travel history to other counties swelled to 106 countries and territories of the United States the A to Z listing was also a way to compartmentalize some of his fond memories of people places and events As a forester who worked in domestic and international locales the A to Z listing had other applications for a footloose forester who had a lifelong interest in forest trees and tropical fruits Accordingly the second book of chronicles had a title that reminded him that the very common red maple tree *Acer rubrum* could be seen daily from Maine to Florida and everywhere in between in the states he had visited forty nine of fifty during his career A suitable title for the second book thus began to emerge An A to Z theme led to bookend tree species names that were also a part of his reveries It was gratifying to settle on a subtropical fruit tree commonly known as the jujube and with the botanical name *Zyzyphus jujuba* Two jujube trees are growing and thriving right next to his house

in Virginia Thus another A to Z listing became the receptacle that included personal anecdotes about a potpourri of things in other countries and in the natural world in general The eventual name of his second book of memoirs emphasized his forestry interests except that the stories that he wanted to share did not dwell solely on trees or on peoples places animals or events Dreams and viewpoints about abstract subjects that he wanted to share were also summoned sorted out and organized into volume 1 Essays Dreams that was published in 2015 And the personal blogs regarding tangible physical sometimes hair raising real time episodes in reality were written into volume 2 Stories Adventures that was published in early 2016 Of the 340 blogs that still reside in computer archives there are perhaps a hundred or so that have not yet been selected for inclusion in another book This book and its title A to Z Word Potpourri Chronicles of a Footloose Forester is the final product The next job is to make another list and decide which stories essays dreams and adventures might become a suitable fifth book of memoirs that does not require chronology background history logical train of thought or other raison d tre
