First Helicopter War Logistics And Mobility In Algeria 1954 1962:

The First Helicopter War Charles R. Shrader,1995 **The French Experience In Algeria, 1954-1962: Blueprint For U.S. Operations In Iraq** Major Greg Peterson,2015-11-06 In 1954 the French Armed Forces began a campaign in Algeria against the insurgent Front de Liberation Nationale FLN which had started a bloody uprising against French sovereignty Initially the French military did not have a viable counterinsurgency doctrine that was effective in defeating the FLN and destroying its network It took them four years of trial and error to develop a doctrine and operational concept able to defeat the FLN inside Algeria and prevent outside assistance from reconstituting the FLN By 1960 it was apparent the FLN could not win the liberation of Algeria militarily However the political situation respective to France and Algeria internally and internationally by then had changed to the point that military operations in the field were not going to affect the political outcome in Algeria The French Armed Forces took too long to adopt an effective doctrine to combat the insurgent threat and by the time they were effective it was irrelevant Currently the U S is in occupation of Iraq and exercising sovereignty in that state The U S Armed Forces are conducting counterinsurgency operations to defeat and dismantle the Former Regime Loyalists and various Islamic fundamentalist organizations inside the country U S Armed Forces do not have an overarching counterinsurgency doctrine that is applicable to their operations in Iraq and similar to the French in Algeria they are going through a learning process It is the author s assertion that by studying the French experience in Algeria the U S Armed Forces can learn from the mistakes and victories of the French and hasten the learning process for counterinsurgency operations in Iraq The French experience in Algeria demonstrates what can happen when a military takes too long to adapt to a changed battlefield The First Helicopter War Charles R. Shrader,1999-06-30 Using recently released French official documents and a variety of other sources this study explains how the French Army so recently defeated by the Viet Minh insurgents in Indochina was able to successfully defeat the Algerian nationalist rebels on the battlefield while nevertheless losing the war at the conference table This French success between 1954 and 1962 was due in large part to the superior logistical system of the French Army and the use of the helicopter to enhance French operational mobility French counter mobility measures particularly the construction of heavily defended interdiction zones on the eastern and western borders of Algeria proved highly effective against the rebels Such methods essentially cut off the rebel forces from their bases and from sources of supply located outside Algeria and consequently strangled and destroyed the rebel forces within Algeria No other work on the Algerian War focuses upon the role of logistics in the outcome of the conflict The detailed statistical data and comprehensive description and analysis of the logistical organizations and methods of both the French and the nationalist rebels are supplemented by excellent maps This study also provides useful insights into the nature of the wars of national liberation and counter insurgency doctrines that dominated military affairs in the mid 20th century **France and the Algerian War, 1954-1962** Martin S. Alexander,J.F.V. Keiger,2013-10-14 The French

Army's war in Algeria has always aroused passions This book does not whitewash the atrocities committed by both sides rather it focuses on the conflict itself a perspective assisted by the French republic's official admission in 1999 that what happened in Algeria was indeed a war

Romanian Counterinsurgency and its Global Context, 1944-1962 Andrei Miroiu, 2016-07-15 This book analyses the nationalist rebellion which emerged in Romania following the Second World War The first two decades after the end of the war were times of rebellion in imperial peripheries Armed movements sometimes communist but nearly always nationalist in orientation rose in opposition to retreating or advancing imperial powers One such armed revolt took place in Romania pitting nationalist partisans against a communist government This book is an analysis of how the authorities crushed this rebellion set in the context of parallel campaigns fought in Europe and the Third World It focuses on population control through censorship propaganda and deportations It analyses military operations particularly patrols checkpoints ambushes and informed strikes Intelligence operations are also discussed with an emphasis on recruiting informants on interrogation torture and infiltration Bullets brains and barbed wire not hearts and minds approaches crushed internal rebels in post 1945 campaigns

Crisis of the State Bruce Kapferer, Bjørn Enge Bertelsen, 2009 Analyzing both historical contexts and geographical locations this volume explores the continuous reformation of state power and its potential in situations of violent conflict The state otherwise understood as an abstract and transcendent concept in many works on globalization in political philosophy is instead located and analyzed here as an embedded part of lived reality This relationship to the state is exposed as an integral factor to the formation of the social whether in Africa the Middle East South America or the United States Through the examination of these particular empirical settings of war or war like situations the book further argues for the continued importance of the state in shifting social and political circumstances In doing so the authors provide a critical contribution to debates within a broad spectrum of fields that are concerned with the future of the state the nature of sovereignty and globalization

Understanding

Non-State Actors Eran Zohar, 2023-10-24 Understanding Non State Actors aims to reduce the scarcity of academic literature on armed non state actors NSAs that have always been a part of world politics and wars This monograph offers possibly for the first time a systematic historical review as well as a substantive theory of NSAs and their arming efforts The world has been astonished by the ability of the well armed Hamas to inflict heavy losses on the powerful Israel Thus from the Jewish rebellion against Rome to the war between the Ukrainian separatists and the Ukrainian government NSAs weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability While weapons are not necessarily the most important factor in military build up NSAs need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons Conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition A major theme of this monograph is that in spite of dramatic political and technological changes armed NSAs in different periods have employed similar methods to acquire weapons Self production looting and stealing external support and the arms trade were always the major ways for NSAs to acquire weapons though the importance of each method and the type of arms has changed remarkably over

time Understanding Non State Actors discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of NSAs to acquire arms Especially lecturers and students of Military Terrorism Conflict studies War and peace studies will benefit from this study *History of operations research in the United States Army* Charles R. Shrader, 2006 *Saharan Jews and the Fate of French Algeria* Sarah Abrevaya Stein, 2014-05-06 The history of Algerian Jews has thus far been viewed from the perspective of communities on the northern coast who became to some extent beneficiaries of colonialism But to the south in the Sahara Jews faced a harsher colonial treatment In *Saharan Jews and the Fate of French Algeria* Sarah Abrevaya Stein asks why the Jews of Algeria s south were marginalized by French authorities how they negotiated the sometimes brutal results and what the reverberations have been in the postcolonial era Drawing on materials from thirty archives across six countries Stein tells the story of colonial imposition on a desert community that had lived and traveled in the Sahara for centuries She paints an intriguing historical picture of an ancient community trans Saharan commerce desert labor camps during World War II anthropologist spies battles over oil and the struggle for Algerian sovereignty Writing colonialism and decolonization into Jewish history and Jews into the French Saharan one *Saharan Jews and the Fate of French Algeria* is a fascinating exploration not of Jewish exceptionalism but of colonial power and its religious and cultural differentiations which have indelibly shaped the modern world *United States Army Logistics* Steve R. Waddell, 2009-12-22 You can train men to fight You can plan for the invasion But you can t have success on the battlefield if you cannot move the men and material into position Success is not possible without logistical support and capabilities The U S Army s logistics system began with practically nothing and through numerous conflicts and periods of peace has developed into a first rate supply system capable of supporting the global military commitments of the present day This work presents the history of U S Army logistics as one of evolution trial and error and occasionally revolutionary change over a period of two hundred plus years It is important that logisticians and combat leaders alike understand how the United States Army logistical system developed the challenges that had to be overcome and the successes and failures encountered along the way Creating the U S Army in 1775 proved to be easy compared to the task of keeping the army adequately supplied over the short and long term The availability of resources industrial capacity size of the army geographic scope of operations organization of the logistics system competent leadership congressional support funding and new technology have and continue to impact the logistical system on a daily basis Each new period of peace or war has brought new challenges and requirements This work is broken into two key parts First to inform the reader on the basic history of U S Army Logistics Second to identify the key factors that influenced the development of the logistical system

Genocide, Ethnonationalism, and the United Nations Hannibal Travis, 2013-01-17 *Genocide Ethnonationalism and the United Nations* examines a series of related crises in human civilization growing out of conflicts between powerful states or empires and indigenous or stateless peoples This is the first book to attempt to explore the causes of genocide and other

mass killing by a detailed exploration of UN archives covering the period spanning from 1945 through 2011 Hannibal Travis argues that large states and empires disproportionately committed or facilitated genocide and other mass killings between 1945 and 2011 His research incorporates data concerning factors linked to the scale of mass killing and recent findings in human rights political science and legal theory Turning to potential solutions he argues that the concept of genocide imagines a future system of global governance under which the nation state itself is made subject to law The United Nations however has deflected the possibility of such a cosmopolitical law It selectively condemns genocide and has established an institutional structure that denies most peoples subjected to genocide of a realistic possibility of global justice lacks a robust international criminal tribunal or UN army and even encourages security cooperation among states that have proven to be destructive of peoples in the past Questions raised include What have been the causes of mass killing during the period since the United Nations Charter entered into force in 1945 How does mass killing spread across international borders and what is the role of resource wealth the arms trade and external interference in this process Have the United Nations or the International Criminal Court faced up to the problem of genocide and other forms of mass killing as is their mandate
