20-22 March 2002, Toronto Canada

Introduction

There are a variety of rules and regulations in the many milk-producing countries of the world governing the production of raw milk, including the general areas of:

- Milk Quality and Safety
- Milking Machine Performance, and
- Worker and Animal Welfare.

The existing rules and regulations for milk production have been developed over many years and are meant to apply to the types milking equipment and management practices commonly used in the field. Automatic milking (AM), particularly when it is unattended by a person (as is the common implementation), has required that these regulatory structures be re-examined to clarify the desired end goal and determine how they might be best applied to this new technology and management situation. This paper will present an overview of the challenges in adapting existing rules and regulations to the situations in which AM is employed.

The Regulatory Process in the European Union

EEC Directive 92/46/EEC defines the requirements for animal health and the milk quality parameters of Somatic Cell Count and Bacteria Count in the EU (EEC, 1992). EEC Directive 89/362/EEC establishes the general conditions for hygiene on dairy farms (EEC, 1989). This directive states that:

Before the milking of the individual cow, the milker must inspect the appearance of the milk. If any physical abnormality is detected, milk from the cow must be withheld from delivery.

Milk from cows with clinical udder disease must be milked last or by a separate machine or hand-stripped and the milk withheld from delivery.

Before milking of a cow is started, the teats, udder and if necessary adjacent parts of the groin, thigh and abdomen of the cow must be clean.

Two proposals to change of 89/362/EEC were made to exempt AM from the requirement to examine foremilk before putting milk from any cow into the bulk milk storage tank. Neither proposal obtained a qualified majority in preliminary voting at the May 2001 meeting of the Commission resulting in no formal vote and no action on the proposals. The current Directives, therefore, are still active, and individual national authorities must decide how to apply the
