Goldman,Jeffrey A. Buck,Kenneth S. Thompson,2009-06-26 This compendium of 17 articles addresses the goals set forth by the President s New Freedom Commission on Mental Health in its 2003 report Achieving the Promise Transforming Mental Health Care in America The report represents the first time since the Carter Administration that such a high level group evaluated U S mental health care The report painted a dismal picture of the nation s mental health system saying the system was so broken that it was beyond simple repair The Commission said that current services focused on managing disabilities rather than helping patients achieve a meaningful life in their communities It also stated that mental health service providers ignored the preferences of consumers and their families The articles in Transforming Mental Health Services Implementing the Federal Agenda for Change originally published between 2006 and 2009 in Psychiatric Services journal of the American Psychiatric Association offer recommendations to assist adults with serious mental illness and children with serious emotional disturbances They include a series of reforms in which the emphasis is on recovery as an achievable goal and the need for a person centered orientation in service delivery There is also discussion of the reasons many service providers resist using a recovery orientation and how this can be remedied Transforming Mental Health Services Implementing the Federal Agenda for Change consists of updates of papers written by the Commission s subcommittees addressing issues fundamental to those living with mental illness It is organized into four sections The first focuses on the interface between mental health and general health and on employment housing and Medicaid financing The second continues addressing financing and Medicaid as well as issues related to school mental health recovery transformation of data systems and acceleration of research The third includes reports from four states with transformation initiatives designed to ensure that consumers have a strong voice in the development of recovery oriented services The final section describes progress five years after the President s Commission Report and concludes with a proposal by the current director of the Center for Mental Health Services for a public health model of mental health care for the 21st century This compilation of well researched and well written articles offers an excellent resource for frontline care providers facility administrators and advocates It serves as an equally valuable resource for state policy makers who wish to present a convincing case that change is happening and that the recommendations can be translated into effective policies Although consumers and their families will receive support for their perception that service providers ignore their needs they will also

be encouraged that change for the better is coming to the U S mental health care system The First Line ,1980 A newsletter for federal supervisors and midmanagers **Handbook of Home Health Care Administration** Harris,2015-10 Professional reference for Nurses on Home Health Care **Multiple first-line therapies as part of the response to antimalarial drug resistance** World Health Organization,2024-11-20 Effective malaria case management requires quick access to diagnostics and antimalarial treatments to reduce illness and death Artemisinin based combination therapy ACT has been essential to malaria treatment since 2001 as it combines artemisinin for rapid parasite reduction with a partner drug to ensure complete cure However resistance to antimalarial drugs where parasites survive standard doses threatens malaria control Partial resistance to artemisinin linked to Pfk13 mutations has recently emerged in several African countries leading to slower parasite clearance times Artemisinin partial resistance does not lead to ACT failure where the partner medicines are still effective However additional resistance to partner drugs would jeopardize ACT effectiveness To address this threat WHO launched a 2022 strategy to respond to drug resistance in Africa This strategy aims to improve detection enable timely responses and reduce resistance impact through evidence based measures The strategy with 20 approaches includes the measures such as multiple first line therapies MFT to extend the therapeutic useful life of the ACTs This implementation guide providing guidance for malaria programmes by defining MFT reviewing MFT s impact on resistance assessing implications for policy and implementation and identifying evidence gaps for future research *The Health Care Manager's Legal Guide* Charles McConnell,2011-08-24 The Health Care Manager s Legal Guide provides practical information on avoiding these and other common legal hazards encountered when managing a healthcare workforce Using straightforward language this book serves as an essential resource for aspiring and practicing healthcare managers Book Jacket The Health Care Manager's Human Resources Handbook Charles R.
