IMF and World Bank Sponsored Structural Adjustment Programs in Africa Kwadwo Konadu-Agyemang, 2018-10-24 This title was first published in 2001. Bringing together geographers, planners, political scientists, economists, rural development specialists, bankers, public administrators and other development experts, this volume questions the benefits of Structural Adjustment Programmes (SAPs). It critically assesses the impact of SAPs from a wider perspective than a purely economic one, highlighting concerns about impacts of adjustments on the more vulnerable elements of society such as social welfare, the environment, labour, gender and agriculture. Revealing both the costs and benefits of the economic restructuring programme, the book also suggests alternatives to current development models and how SAPs can be made more sustainable. An original and comprehensive addition to the collections of both students and practitioners of development.

Ageing Populations and Changing Labour Markets Stella Vettori, 2016-04-01 Talk of a demographic time bomb is not new. The notion first entered public consciousness some time ago but there is a lack of clarity about what such talk is really all about. Ageing populations are seen both as a threat and an opportunity. There is concern about discrimination against older workers at the same time as there is concern about a shortage of labour. Migration of labour from places with young populations to places with ageing populations is sometimes seen in a positive light and sometimes quite differently. With chapters reflecting different perspectives from around the world, this book constitutes a major contribution to serious informed debate on issues that all too often have been the subject of sensationalised media treatment. Professor Stella Vettori has assembled a collection of expert writers on the social, cultural, political and economic factors that have implications both for labour markets and the well being of older people both in developed and developing countries. As a result, anyone involved with workplace and employment policy and practice and issues of diversity and discrimination either at a corporate or societal level will want to read this book. Policy implications are considered and possible solutions to seemingly intractable problems are offered in a remarkable book that embraces serious academic debate and a practical focus on real issues.

Boko,2012-12-06 I woke up at 3 30 on a steamy December morning at my hotel at McCarthy Hill Accra to prepare to take the early morning Vanef STC bus operating on the Accra Kumasi line At 4am the front desk called to inform me that I had requested a 3 45am wake up time the night before I figured a 15 minute tardiness is still within acceptable limits in Africa Surprisingly my bus left on time Though it was filled to capacity I could only find a seat in the middle row the ride on state transport as it is called was as smooth as it could be given the dismal conditions of portions of the Accra Kumasi road and the very loud local music emanating from the bus speakers As we drove through the lush forests of the Eastern Region many thoughts crossed my mind regarding the effects of the current economic and democratic reforms including decentralization under way in the country on the average person in Ghana The bus company that I was patronizing Vanef STC was itself a product of government divestiture from and privatization an economic decentralization of the previous State Transport Cooperation I was informed that the perception by the users of state transport is that ever since the take over by Vanef STC the quality of service has declined This in turn was due to prolonged litigation by workers who felt that they had been wronged in the process of state divestiture **Foreign Operations, Export Financing, and Related Programs Appropriations for 2007, Part 1B, 109-2 Hearings, ***,2006 **Foreign Operations, Export Financing, and Related Programs Appropriations for 2006** United States.
