

Marine Fisheries Ecology

A large school of fish, likely sardines or anchovies, swimming in clear blue water. The fish are silvery and elongated, moving in a coordinated pattern. Bright sunlight filters down from the top, creating a shimmering effect on the water's surface and illuminating the scene.

Ecosystem-Based Management for the Oceans Karen McLeod, Heather Leslie, 2012-09-26 Conventional management approaches cannot meet the challenges faced by ocean and coastal ecosystems today Consequently national and international bodies have called for a shift toward more comprehensive ecosystem based marine management Synthesizing a vast amount of current knowledge Ecosystem Based Management for the Oceans is a comprehensive guide to utilizing this promising new approach At its core ecosystem based management EBM is about acknowledging connections Instead of focusing on the impacts of single activities on the delivery of individual ecosystem services EBM focuses on the array of services that we receive from marine systems the interactive and cumulative effects of multiple human activities on these coupled ecological and social systems and the importance of working towards common goals across sectors Ecosystem Based Management for the Oceans provides a conceptual framework for students and professionals who want to understand and utilize this powerful approach And it employs case studies that draw on the experiences of EBM practitioners to demonstrate how EBM principles can be applied to real world problems The book emphasizes the importance of understanding the factors that contribute to social and ecological resilience the extent to which a system can maintain its structure function and identity in the face of disturbance Utilizing the resilience framework professionals can better predict how systems will respond to a variety of disturbances as well as to a range of management alternatives Ecosystem Based Management for the Oceans presents the latest science of resilience while it provides tools for the design and implementation of responsive EBM solutions
