sustainable future **The Publishers Weekly** ,1972 **Think!** Michael R. LeGault,2006-08-01 This isn't the time to Blink It's time to THINK before it's too late Outraged by the downward spiral of American intellect and culture Michael R LeGault offers the flip side of Malcolm Gladwell's bestselling phenomenon Blink which theorized that our best decision making is done on impulse without factual knowledge or critical analysis If bestselling books are advising us to not think LeGault argues it comes as no surprise that sharp incisive reasoning has become a lost art in the daily life of Americans Somewhere along the line the Age of Reason morphed into the Age of Emotion this systemic erosion is costing time money jobs and lives in the twenty first century leading to less fulfillment and growing dysfunction LeGault provides a bold controversial and objective analysis of the causes and solutions for the erosion of growth and market share at many established American companies big and small which appear to have less chance of achieving the dynamic expansion of the past permissive parenting and low standards that have caused an academic crisis among our children body weights rise while grades plummet America's growing political polarization which is a result of our reluctance to think outside our comfort zone faulty planning and failure to act on information at all levels that has led to preventable disasters such as the Hurricane Katrina meltdown a culture of image and instant gratification fed by reality shows and computer games that has rendered curiosity of the mind and spirit all but obsolete stress aversion to taking risks and therapy that are replacing the traditional American can-do mind set Far from perpetuating the stereotype of the complacent American LeGault's no-holds-barred analysis asks more of us than any other societal overview America can fulfill its greatest potential starting today and we need smart teachers smart health care workers smart sales representatives smart students smart mechanics and smart leaders to make it happen Now is the time to THINK because a mind truly is a terrible thing to waste LIFE ,1961-03-03 LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century It now lives on at LIFE.com the largest most amazing collection of professional photography on the internet Users can browse search and view photos of today's people and events They have free access to share print and post images for personal use *Innocent in Palo Alto: From the Diary of a Think Tank Dweller* , **Computers and Society in the Past Half Century** Abbe Mowshowitz,2024-04-17 Almost fifty years ago the author wrote the first comprehensive critical study of social issues in computing The Conquest of Will 1976 This new book revisits this seminal study featuring an overview of technological advances over the past half century and provides a unique comparison between what was believed and expected of computers back in 1976 and actual outcomes up to the present time Despite the extraordinary changes in technology much of what has emerged in contemporary society was anticipated fifty years ago and we are still grappling with some of the same basic challenges For example the computer's threat to privacy has been a constant issue ever since the late 1950s but the regulatory framework designed in the 1960s has been upended by the Internet Artificial Intelligence too has been a contentious issue since the late 1950s but until recently discussion was largely confined to academia and there was little urgency to regulate its further development and application

The comparisons offered in this book will highlight what we got right and wrong in the past and point to the sources of good and bad predictions While there have been many studies of social issues in computing published since *The Conquest of Will* appeared in 1976 this is an unusual and valuable longitudinal comparison of the current situation with what prevailed and was predicted half a century ago
