The Electronic Oracle Donella H. Meadows, Jenny M. Robinson, 2007-01-01 [The Electronic Oracle](#) D. H. Meadows, J. M. Robinson, 1985-05-27 An in depth analysis of the strengths and limitations of computer models in helping solve social economic and political problems using nine recent models as examples Addressing the growing disillusionment with models among researchers and policymakers the authors discuss what has been done and what still needs to be done to make modeling a more viable and realistic analytical tool

The Sounding of the Whale D. Graham Burnett, 2022-12-22 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with *The Sounding of the Whale* D Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research *The Sounding of the Whale* tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below

[Simulation-Based Analysis of Energy and Carbon Emissions in the Housing Sector](#) Michael Gbolagade Oladokun, Clinton Ohi Aigbavboa, 2018-04-20 This book describes the development of a system dynamics based model that can capture the future trajectories of housing energy and carbon emissions It approaches energy and carbon emissions in the housing sector as a complex socio technical problem involving the analysis of intrinsic interrelationships among dwellings occupants and the environment Based on an examination of the UK housing sector but with relevance worldwide the book demonstrates how the systems dynamics simulation can be used as a learning laboratory regarding future trends in housing energy and carbon emissions The authors employ a pragmatic research strategy involving the collection of both qualitative and quantitative data to develop a model The book enriches readers understanding of the complexity involved in housing energy and carbon emissions from a systems thinking perspective As such it will be of interest

to researchers in the fields of architectural engineering housing studies and climate change while also appealing to industry practitioners and policymakers specializing in housing energy 2052 Jorgen Randers,2012-06-13 With clarity conscience and courage global systems pioneer Jorgen Randers and his distinguished contributors map the forces that will shape the next four decades Forty years ago The Limits to Growth study addressed the grand question of how humans would adapt to the physical limitations of planet Earth It predicted that during the first half of the 21st century the ongoing growth in the human ecological footprint would stop either through catastrophic overshoot and collapse or through well managed peak and decline So where are we now And what does our future look like In the book 2052 Jorgen Randers one of the coauthors of Limits to Growth issues a progress report and makes a forecast for the next forty years To do this he asked dozens of experts to weigh in with their best predictions on how our economies energy supplies natural resources climate food fisheries militaries political divisions cities psyches and more will take shape in the coming decades He then synthesized those scenarios into a global forecast of life as we will most likely know it in the years ahead The good news we will see impressive advances in resource efficiency and an increasing focus on human well being rather than on per capita income growth But this change might not come as we expect Future growth in population and GDP for instance will be constrained in surprising ways by rapid fertility decline as result of increased urbanization productivity decline as a result of social unrest and continuing poverty among the poorest 2 billion world citizens Runaway global warming too is likely So how do we prepare for the years ahead With heart fact and wisdom Randers guides us along a realistic path into the future and discusses what readers can do to ensure a better life for themselves and their children during the increasing turmoil of the next forty years

Software Engineering and Formal Methods Gilles Barthe,Alberto Pardo,Gerardo Schneider,2011-10-21 This book constitutes the refereed proceedings of the 9th International Conference on Software Engineering and Formal Methods SEFM 2011 held in Montevideo Uruguay in November 2011 The 22 revised regular papers presented together with 1 short paper 2 tool papers and 4 keynote talks were carefully reviewed and selected from 105 initial abstracts and 85 full submissions Besides the regular session the conference held a special track devoted to Modeling for Sustainable Development with 5 accepted papers selected from 7 submissions that are also part of this volume The aim of SEFM is to advance the state of the art in formal methods to scale up their application in software industry and to encourage their integration with practical engineering methods **Structured Analytic Techniques for Intelligence Analysis** Richards J. Understanding Game-based Approaches for Improving Sustainable Water Governance Wietske Medema, Chengzi Chew, Jan Franklin Adamowski, Igor Mayer, Arjen Wals, 2020-04-28 The sustainable governance of water resources relies on processes of multi stakeholder collaborations and interactions that facilitate knowledge co creation and social learning Governance systems are often fragmented forming a barrier to adequately addressing the myriad of challenges affecting water resources including climate change increased urbanized populations and pollution Transitions towards sustainable water governance will likely require innovative learning partnerships between public private and civil society stakeholders It is essential that such partnerships involve vertical and horizontal communication of ideas and knowledge and an enabling and democratic environment characterized by informal and open discourse There is increasing interest in learning based transitions Thus far much scholarly thinking and to a lesser degree empirical research has gone into understanding the potential impact of social learning on multi stakeholder settings The question of whether such learning can be supported by forms of serious gaming has hardly been asked This Special Issue critically explores the potential of serious games to support multi stakeholder social

learning and collaborations in the context of water governance Serious games may involve simulations of real world events and processes and are challenge players to solve contemporary societal problems they therefore have a purpose beyond entertainment They offer a largely untapped potential to support social learning and collaboration by facilitating access to and the exchange of knowledge and information enhancing stakeholder interactions empowering a wider audience to participate in decision making and providing opportunities to test and analyze the outcomes of policies and management solutions Little is known about how game based approaches can be used in the context of collaborative water governance to maximize their potential for social learning While several studies have reported examples of serious games there is comparably less research about how to assess the impacts of serious games on social learning and transformative change
