academic benefits of assessment driven teaching and the growing accountability context of educational systems around the
world there is a rapidly developing need to educate teachers in effectively using assessments to promote monitor and report
on student learning However assessment has historically been a neglected area in teacher education programmes and
empirical research has consistently shown assessment as an area of challenge for many teachers While there is an increased
focus across teacher education and professional literature on enhancing the assessment capacity of educators there remains
little empirical research on innovative and data based strategies to effectively achieve this goal The purpose of this text is to
consolidate existing research on assessment education and to provoke innovative and effective approaches to educating
teachers and teachers in training about assessment Given the dearth of relevant research this text also considers the matter
of retention and extension of initial assessment learning into teaching careers Combined the articles in this text provide a
foundation for novel thinking about developing teachers assessment capacity from pre service to in service contexts This
