**Post-Modernism and the Social Sciences** Pauline Marie Rosenau, 1991-11-05 Post modernism offers a revolutionary approach to the study of society in questioning the validity of modern science and the notion of objective knowledge this movement discards history rejects humanism and resists any truth claims In this comprehensive assessment of post modernism Pauline Rosenau traces its origins in the humanities and describes how its key concepts are today being applied to and are restructuring the social sciences Serving as neither an opponent nor an apologist for the movement she cuts through post modernism s often incomprehensible jargon in order to offer all readers a lucid exposition of its propositions Rosenau shows how the post modern challenge to reason and rational organization radiates across academic fields For example in psychology it questions the conscious logical coherent subject in public administration it encourages a retreat from central planning and from reliance on specialists in political science it calls into question the authority of hierarchical bureaucratic decision making structures that function in carefully defined spheres in anthropology it inspires the protection of local primitive cultures from First World attempts to reorganize them In all of the social sciences she argues post modernism repudiates representative democracy and plays havoc with the very meaning of left wing and right wing Rosenau also highlights how post modernism has inspired a new generation of social movements ranging from New Age sensitivities to Third World fundamentalism In weighing its strengths and weaknesses the author examines two major tendencies within post modernism the largely European skeptical form and the predominantly Anglo North American form which suggests alternative political social and cultural projects She draws examples from anthropology economics geography history international relations law planning political science psychology sociology urban studies and women s studies and provides a glossary of post modern terms to assist the uninitiated reader with special meanings not found in standard dictionaries

**Criteria of Social Scientific Knowledge** Terrence E. Cook, 1994 Social scientists often do not agree on what is a solid contribution to knowledge and what is only the illusory appearance of knowledge In this work Terrence E Cook systematically compares and contrasts the main epistemological families within the social sciences interpretive predictive and praxeological examining strengths and weaknesses of each outlook In exceptionally clear language he shows how paradigms of thought are constructed and reveals the often unreflected presuppositions of each epistemological family He concludes with a move toward synthesis and a turn to the study of strategy     *Applied Social Research* Timothy P.

*Contemporary Society* John A Perry, Erna K Perry, 2015-10-02 This best selling text emphasizes that social and cultural changes are the pervasive realities of our era One of the main themes of *Contemporary Society* is that the transition from an industrial to a post industrial order in the modern world is fraught with difficulties as was the transition from an agricultural to an industrial order in an earlier era Within this framework we can observe the increasing fragmentation of the social order which tends to lead people away from community and a common purpose and often invites conflict and disunity At the same time countervailing social forces are also at work providing some stability some shelter in the storm Finally societies are faced with the rapid and transformative power of information technology a fact that propels separate groups of people into a global entity
