Ethical Life The Past And Present Of Ethical Cultures:

Ethical Life Harry Redner, 2001 Australian philosopher of science Redner argues that cultural life consists of three fundamental aspects representation ethos and technics This is the second of four volumes setting out a comprehensive theory of human culture The first is *A New Science of Representation* the third and companion to the second will be *Aesthetic Life* and the third will be *The Triumph of Technics* His conclusion at the end of the series is that the contemporary global culture is a triumph of technics over representation and ethos c Book News Inc *African American Bioethics* Lawrence J. Prograis Jr., Edmund D. Pellegrino, 2007-05-03 Do people of differing ethnicities cultures and races view medicine and bioethics differently And if they do should they Are doctors and researchers taking environmental perspectives into account when dealing with patients If so is it done effectively and properly In *African American Bioethics* Lawrence J Prograis Jr and Edmund D Pellegrino bring together medical practitioners researchers and theorists to assess one fundamental question Is there a distinctive African American bioethics The book s contributors resoundingly answer yes yet their responses vary They discuss the continuing African American experience with bioethics in the context of religion and tradition work health and U S society at large finding enough commonality to craft a deep and compelling case for locating a black bioethical framework within the broader practice yet recognizing profound nuances within that framework As a more recent addition to the study of bioethics cultural considerations have been playing catch up for nearly two decades *African American Bioethics* does much to advance the field by exploring how medicine and ethics accommodate differing cultural and racial norms suggesting profound implications for growing minority groups in the United States ***Conserving Cultures*** Harry Redner, 2004-02-13 As the forests are felled cultures are destroyed In our technological civilization the forces of globalization are a threat to both nature and culture The many and varied cultures of the world are beset by the homogenizing impact of the global media which represents the triumph of technics The fate can only be averted by a concerted effort at culture conservation Nature and culture must be protected to preserve a humanly habitable world *Conserving Cultures* is the first book to link nature and culture conservation The threat to nature is now well understood how it relates to cultures is not This book both describes and analyzes theoretically the danger to culture and proposes practical remedial measures *Beyond Civilization* Harry Redner, 2020-03-26 For Harry Redner the phrase beyond civilization refers to the new and unprecedented condition the world is now entering specifically the condition commonly known as globalization Redner approaches globalization from the perspective of history and seeks to interpret it in relation to previous key stages of human development His account begins with the Axial Age 700 300 BC and proceeds through Modernity after AD 1500 to the present global condition What is globalization doing to civilization In answering this question Redner studies the role played by capitalism the state science and technology He aims to show that they have had a catalytic impact on civilization through their reductive effect on society culture and individualism However Redner is not content to diagnose the ills of civilization he also suggests how they might

be ameliorated by cultural conservation Above all it is to the problem of decline in the higher forms of literacy that he addresses himself for it is on the culture of the book that previous civilizations were founded This study will be of interest to sociologists historians and social and political theorists Its style makes it accessible also to general readers interested in civilization past present and future

Morality Jonathan Sacks,2020-09-01 A distinguished religious leader s stirring case for reconstructing a shared framework of virtues and values With liberal democracy embattled public discourse grown toxic family life breaking down and drug abuse and depression on the rise many fear what the future holds In *Morality* respected faith leader and public intellectual Jonathan Sacks traces today s crisis to our loss of a strong shared moral code and our elevation of self interest over the common good We have outsourced morality to the market and the state but neither is capable of showing us how to live Sacks leads readers from ancient Greece to the Enlightenment to the present day to show that there is no liberty without morality and no freedom without responsibility arguing that we all must play our part in rebuilding a common moral foundation A major work of moral philosophy *Morality* is an inspiring vision of a world in which we can all find our place and face the future without fear

Information Cultures in the Digital Age Matthew Kelly,Jared Bielby,2016-08-08 For several decades Rafael Capurro has been at the forefront of defining the relationship between information and modernity through both phenomenological and ethical formulations In exploring both of these themes Capurro has re vivified the transcultural and intercultural expressions of how we bring an understanding of information to bear on scientific knowledge production and intermediation Capurro has long stressed the need to look deeply into how we contextualize the information problems that scientific society creates for us and to re incorporate a pragmatic dimension into our response that provides a balance to the cognitive turn in information science With contributions from 35 scholars from 15 countries *Information Cultures in the Digital Age* focuses on the culture and philosophy of information information ethics the relationship of information to message the historic and semiotic understanding of information the relationship of information to power and the future of information education This Festschrift seeks to celebrate Rafael Capurro s important contribution to a global dialogue on how information conceptualisation use and technology impact human culture and the ethical questions that arise from this dynamic relationship

Politics, Ethics and Culture in Our Time Harry Redner,2023-01-30 Global capitalism is effecting changes in human life as momentous as those that occurred during the Neolithic Revolution the Axial Age 700 300 BC and the modern era post 1500 when industrial capitalism state power and science reshaped the civilized world The transformation is paradoxical however Science and technology ensure material progress but the market promotes cultural obsolescence and erodes belief in the Enlightenment ideals that inspired the quest for progress In Western democracies liberty and equality are proving irreconcilable citizens becoming demoralized fraternity fractured meanwhile despotic Eurasian states are recycling old faiths and concocting neo imperialist ideologies These contradictions must be confronted if the cultural values that sustain civilized life are to be conserved

Totalitarianism, Globalization, Colonialism Harry Redner, 2017-07-05 The century that began in 1914 with the outbreak of the First World War was catastrophic. Over the course of that one hundred year span civilizations were destroyed in the Old World, the New World and the Third World, the latter represented by China, India and Islam. In Europe the main agent of destruction was totalitarianism; in America it was globalization ushered in by modernity; and in the non-Western world it was colonialism, followed later by totalitarianism and globalization. Harry Redner examines each of these processes, providing theoretical and historical accounts of their emergence. He considers the effects of Nazism and Bolshevism on the morale and morals of Europe; studies the effects on the United States of the nation's emergence as a major world power; and describes the impact of modernization on China, India and Islam as they underwent Europeanization, Sovietization and Americanization. Redner confronts us with a paradox: in the midst of unprecedented material affluence and organizational efficiency, one that uses advanced technologies and cutting edge scientific knowledge, we are also sinking into an unprecedented cultural, moral, intellectual and spiritual decline. He locates the origins of this condition in the violently contradictory processes of the twentieth century.

American Arabesque Jacob Rama Berman, 2012-06-11 Part of the American Literatures Initiative Series, *American Arabesque* examines representations of Arabs, Islam and the Near East in nineteenth century American culture, arguing that these representations play a significant role in the development of American national identity over the century, revealing largely unexplored exchanges between these two cultural traditions that will alter how we understand them today. Moving from the period of America's engagement in the Barbary Wars through the Holy Land travel mania in the years of Jacksonian expansion and into the writings of romantics such as Edgar Allan Poe, the book argues that not only were Arabs and Muslims prominently featured in nineteenth century literature, but that the differences writers established between figures such as Moors, Bedouins, Turks and Orientals provide proof of the transnational scope of domestic racial politics. Drawing on both English and Arabic language sources, Berman contends that the fluidity and instability of the term Arab as it appears in captivity narratives, travel narratives, imaginative literature and ethnic literature simultaneously instantiate and undermine definitions of the American nation and American citizenship.

Care and Covenant Jason Weiner, 2023-03 The Jewish tradition has important perspectives, history and wisdom that can contribute significantly to crucial contemporary healthcare deliberations. This book is an attempt to show how numerous classic Jewish texts and ideas have significant things to say about some of the most urgent debates in the world of medicine today, with the potential to significantly expand and benefit the field of bioethics. But this book is not only about applying classical Jewish values to bioethical dilemmas; it seeks to develop an approach that is primarily informed by personal and communal obligations and social responsibilities. Jewish values focus on requirements, obligations and commandments and has thus sometimes been called an Ethics of Responsibility by advancing new relevant approaches that can encourage healthcare providers to remain dedicated to preventing harm and providing compassionate care to all based on these

inspiring and timeless values Each chapter of this book explores questions such as Are we expected to risk our lives on behalf of others When we can only help a limited number of people how do we prioritize What are the obligations and expectations of a society or government Are issues of cultural sensitivity relevant in how we discharge our obligations to others What should we do when obligations for others violate our own moral principles or commitments Are there limits to how far one can be expected to go for others These and other issues are addressed in this book as it attempts to describe a meaningful and compassionate Jewish bioethic of responsibility for our times

Traditional Ethics and Contemporary Society of China Guojie Luo,2023-04-28 Based on the ethical thinking of the pre Qin Dynasty this book discusses the formation and development of traditional Chinese ethics the refinement of the Confucian ethical normative system and the establishment of its orthodoxy as well as the deepening and maturation of feudal ethics The book is simple in style and clear in context It contains not only the essence of traditional Chinese morality but also the achievements of modern civilization It analyzes the implications of traditional Chinese ethics on the governance and moral construction of modern society and can be used as a reference for governance and revitalization of the country and moral development

Reading Bernard Williams Daniel Callcut,2009 When Bernard Williams died in 2003 the Times newspaper hailed him as the greatest moral philosopher of his generation This collection of essays on Williams work is essential reading for anyone interested in Williams ethics and moral philosophy and philosophy in general

Culture Wars: Past, Present, Future Bojan Žalec, Stjepan Štivić , Culture wars have decisively marked our past and are increasingly shaping our present and future The book covers events in Slovenia and Central Europe and temporally it touches on the period of the second half of the 19th century to the onset of the Second World War However the book s contributions extend beyond these limits addressing the present era and looking towards the future both of which are significantly shaped by modern algorithms and artificial intelligence technologies Another key emphasis is placed on religious aspects The broader relevance of the monograph lies in its integral and multidisciplinary scientific investigation of ideologies social doctrines and cultural currents all embedded in specific contexts that have played a decisive role on a global scale
