Ethical And Legal Issues In Aids Research:

Ethical and Legal Issues in AIDS Research Joni N. Gray, Phillip M. Lyons, Gary B. Melton, 1995 In recent years AIDS research has become the hottest topic in the fields of immunology epidemiology and related medical and public health disciplines Despite significant breakthroughs the disease continues to increase in prevalence geometrically It is clear that the problem of AIDS and the need for AIDS research will be with us for some time *Legal and Ethical Aspects of HIV-Related Research* Emmanuelle E. Wollmann, 2005-11-24 The motivation and inspiration for this book come directly from experiences with clients during the years that I practiced HIV related law at the Legal Aid Society of San Diego Inc The issues discussed in this work reflect issues that arose on a recurring basis with clients participating in HIV research studies with investigators calling for guidance on the legal implications of particular aspects of their proposed studies and with research institutions and health care facilities struggling to make sense of legal maneuvers aimed at obtaining the records of their HIV infected patients It is impossible to thank each of these persons individually for their provocative questions and their insights The discussion of ethical and legal issues relating to the design of clinical trials reflects questions raised during discussions with Donald J Slymen Ph D Don was one of the first researchers in my realm of experience to pay close attention to ethical concerns and I am greatly appreciative of his contribution to both my professional growth and the development of various scenarios discussed in this text The portions of this text dealing with confidentiality are the result of many hours of thoughtful discussion and analysis with Penn Lerblance J D now deceased and still missed Penn and I often participated together as presenters of in service training programs for health professionals Penn addressed discrimination and I focused on confidentiality

Methodological Issues in AIDS Behavioral Research David G. Ostrow, Ronald C. Kessler, 1993-10-31 We are pleased to introduce a new series Aids Prevention and Mental Health with the publication of this volume on methodology issues in AIDS mental health research The objective of the series is to publish high quality and up to date volumes that HIV prevention and mental health researchers clinicians policymakers and educators will find useful and that will thus contribute significantly to their work in these important areas *Case Studies in Ethics and HIV Research* Sana Loue, Earl C. Pike, 2007-10-05 This book represents the compilation of efforts by researchers across the country each of whom is dedicated not only to the prevention and elimination of HIV infection but also to the conduct of research according to the highest ethical principles The authors of the case studies have graciously agreed to share their experiences in conducting research which raised questions for them and will motivate us to further inquiry and examination The views that are presented in this text are diverse and readers may or may not agree with the analyses of the editor authors or the authors of the case studies We do not aim for agreement among readers but rather the studied analysis of the ethical issues raised in the conduct of HIV research We clearly emphasize the protection of the individuals participating in such research as well as their communities and view research not as an enterprise undertaken by researchers but rather as a negotiated exchange

between researchers participants and communities that also involves interplay with funding sources ancillary partners and governments

The Person with HIV/AIDS Felissa R. Lashley, Jerry D. Durham PhD, RN, FAAN, 2009-09-08 This is an excellent reference for those caring for clients with HIV AIDS I strongly recommend this book Doody's HIV AIDS is no longer a certain death sentence Patients fighting the chronic symptoms of HIV AIDS are now living longer fuller lives due to recent scientific and pharmaceutical breakthroughs As a result the new generation of caregivers must keep pace with cutting edge evidence based practices to better serve patients who may live with HIV AIDS for several decades This updated edition is a vital resource for nurses and other health care professionals providing care to HIV positive persons in the 21st century The contributors present essential information on the medical assessment and management of symptoms the prevention of infection ethical and legal dimensions of care and much more With a greater emphasis on the international dimensions of the HIV pandemic and the treatment of minority populations this book serves as an essential guide for nurses and health care practitioners serving patients with HIV AIDS Key topics include HIV screening testing and counseling HIV AIDS nursing case management within the global community HIV and gay lesbian bisexual and transgender persons Children and HIV prevention and management HIV in corrections facilities and the care of incarcerated patients Sex workers and the transmission of HIV

Biennial Report of the National Institutes of Health National Institutes of Health (U.S.), 1989 *The AIDS Research Program of the National Institutes of Health* Institute of Medicine, Committee to Study the AIDS Research Program of the National Institutes of Health, 1991-02-01 This book written at the request of the National Institutes of Health NIH to assist its AIDS program office in planning future directions contains a series of recommendations for ensuring that AIDS research is a well organized well planned and comprehensive long range program leading to the control and eventual eradication of the disease The recommendations are intended to strengthen the planning evaluation and coordination of AIDS research activities ensure their quality and cost effectiveness stimulate further development of promising research areas increase the level of support for AIDS research so that researchers can carry out a comprehensive program and provide the personnel and facilities at NIH needed to conduct and manage an effective efficient AIDS research program The book also identifies barriers in the delivery and financing of health care that are outside NIH's responsibility but that adversely affect its AIDS clinical research efforts and urges federal action to eliminate them

Handbook of HIV Prevention John L. Peterson, Ralph J. DiClemente, 2000-02-29 The Handbook of HIV Prevention is intended to provide a

comprehensive overview of the theories methods and approaches for reducing HIV associated risk behaviors It represents the first single source of information about HIV prevention research in developed and developing countries The Handbook addresses the subject of HIV prevention from two interrelated perspectives First it presents the seminal theories currently used to guide the development and implementation of HIV prevention interventions Second it describes prevention approaches for diverse populations at risk of HIV infection This Handbook provides a compilation of knowledge on HIV prevention by the leading authorities in the field and will be an important resource for students researchers and clinicians in the field

Gender, Ethnicity, and Health Research Sana Loue, 2007-05-08 Health researchers routinely evaluate health and illness across subgroups defined by their sex gender ethnicity and race All too often these classifications are proffered as an explanation for any differences that may be detected for example in access to care frequency of disease or response to treatment Relatively few researchers however have examined what these classifications mean on a theoretical level or in the context of their own research Assume for example that a researcher concludes from his or her data that African Americans utilize certain surgical procedures less frequently than whites This conclusion may mean little without an examination of the various underlying issues Is there such a construct as race at all How were whites and African Americans classified as such Does this finding reflect inappropriate overutilization of the specific procedures among whites or inappropriate underutilization among African Americans To what extent are socioeconomic status and method of payment related to the less frequent use Are there differences in the manner in which health care providers present the various treatment options to whites and to African Americans that could account for these differences in utilization Are there differences in health care seeking and health care preferences between the two groups that would explain the difference in utilization Is the racial classification a surrogate measure for another variable that has remained unidentified and unmeasured All too often unfortunately such issues are ignored or lightly dismissed with an entreaty for additional research

Counseling Clients with HIV Disease Mary Ann Hoffman, 1996-02-16 Counseling interventions are a proven and powerful way to help individuals with HIV cope with the enormous changes in their lives wrought by the disease Proposing an innovative conceptual model for HIV clinical work this book integrates empirical research on the psychosocial aspects of HIV with extensive case material It provides a framework for assessing clients psychosocial concerns and implementing interventions to facilitate adjustment reviews medical and neurocognitive aspects of HIV disease progression explores the psychotherapeutic context of HIV clinical work and addresses risk reduction and prevention

Researching Social Life Nigel Gilbert, 2008-03-17 This new edition of this excellent guide maintains the standard of the original whilst taking full account of developments in both methodological discussion and the techniques of social research The organization of the text around the research process is a great strength of the text David Byrne University of Durham Preview the Third Edition's opening chapter and guide to its teaching and learning features designed to stimulate student engagement with the content here The Third Edition of Nigel

Gilbert's hugely successful *Researching Social Life* covers the whole range of methods from quantitative to qualitative in a down to earth and unthreatening manner. Gilbert's text offers the best coverage of the full scope of research methods of any of the leading textbooks in the field making this an essential text for any student starting a research methods course or doing a research project. This thoroughly revised text is driven by the expertise of a writing team comprised of internationally renowned experts in the field. New to the Third Edition are chapters on Searching and Reviewing the Literature, Refining the Question, Grounded Theory and Inductive Research, Mixed Methods, Participatory Action Research, Virtual Methods, Narrative Analysis. A number of useful features such as worked examples, case studies, discussion questions, project ideas and checklists are included throughout the book to help those new to research to engage with the material. *Researching Social Life* follows the life cycle of a typical research project from initial conception through to eventual publication. Its breadth and depth of coverage make this an indispensable must have textbook for students on social research methods courses in any discipline.

National Institutes of Health Annual Report of International Activities John E. Fogarty, International Center for Advanced Study in the Health Sciences, 1989 **Cumulated Index Medicus**, 1988 *Princeton Alumni Weekly* Jesse Lynch Williams, Edwin Mark Norris, 1986 HIV Mental Health for the 21st Century Mark G. Winiarski, 1997-03-01. As we approach the 21st century we also approach the third decade of the AIDS epidemic. Mental health care providers must face the crucial fact that the human immunodeficiency virus HIV and the condition it causes Acquired Immune Deficiency Syndrome AIDS is the leading cause of death among Americans aged 25-44 years. *HIV Mental Health for the 21st Century* provides a roadmap for mental health professionals who seek to develop new strategies aimed at increasing the longevity and quality of life for people living with HIV/AIDS as well as at controlling the future spread of the disease. Divided into five sections, this volume covers basic concepts in HIV/AIDS mental health, specialized aspects of HIV/AIDS clinical care, models of clinical care, program evaluation and HIV mental health policy and programs. Chapters treat issues such as feelings of caregivers, the role of spirituality in mental health care, rural practice, mental health home care and working with children.

The Oxford Textbook of Clinical Research Ethics Ezekiel J. Emanuel, Christine C. Grady, Robert A. Crouch, Reidar K. Lie, Franklin G. Miller, David D. Wendler, 2011-02. The Oxford Textbook of Clinical Research Ethics is the first comprehensive and systematic reference on clinical research ethics. Under the editorship of experts from the U.S. National Institutes of Health of the United States, the book's 73 chapters offer a wide ranging and systematic examination of all aspects of research with human beings. Considering the historical triumphs of research as well as its tragedies, the textbook provides a framework for analyzing the ethical aspects of research studies with human beings. Through both conceptual analysis and systematic reviews of empirical data, the contributors examine issues ranging from scientific validity, fair subject selection, risk/benefit ratio, independent review and informed consent to focused consideration of international research ethics, conflicts of interests and other aspects of responsible conduct of research. The editors of *The Oxford Textbook of Clinical Research Ethics* offer a

work that critically assesses and advances scholarship in the field of human subjects research Comprehensive in scope and depth this book will be a crucial resource for researchers in the medical sciences as well as teachers and students *AIDS Bibliography* ,1995-08 *Islam and Biomedical Research Ethics* Mehrunisha Suleman,2020-07-07 This book is a contribution to the nascent discourse on global health and biomedical research ethics involving Muslim populations and Islamic contexts It presents a rich sociological account about the ways in which debates and questions involving Islam within the biomedical research context are negotiated a perspective which is currently lacking within the broader bioethics literature The book tackles some key understudied areas including role of faith in moral deliberations within biomedical research ethics the moral anxiety and frustration experienced by researchers when having to negotiate multiple moral sources and how the marginalisation of women the prejudice and abuse faced by groups such as sex workers and those from the LGBT community are encountered and negotiated in such contexts The volume provides a valuable resource for researchers and scholars in this area by providing a systematic review of ethical guidelines and a rich case based account of the ethical issues emerging in biomedical research in contexts where Islam and the religious moral commitments of Muslims are pertinent The book will be essential for those conducting research in low and middle income countries that have significant Muslim populations and for those in Muslim minority settings It will also appeal to researchers and scholars in religious studies social sciences philosophy anthropology and theology as well as the fields of biomedical ethics Islamic ethics and global health *AIDS* Elliot D. Cohen,1994-04 Professionals face tough questions raised by the AIDS pandemic
