## **Ethical Qaly Ethical Ibues In Healthcare Resource Allocations:**

*The Ethical QALY* Andrew Edgar, 1998      **The Allocation of Health Care Resources** John McKie, Peter Singer, Jeff Richardson, 2016-12-05 The competition for limited health care resources is intensifying We urgently need an acceptable method for deciding how they should be allocated But the goods that health care produces are of very different kinds Health care can extend the lives of children and of older people It can make it possible for a person to walk when without health care that person would be permanently bedridden and it can reduce the pain and distress of people who are terminally ill How can we possibly decide which of these and many more diverse achievements of health care are more deserving than others We need a common unit by which we might be able to measure these very different goods The Quality Adjusted Life Year or QALY is the most developed proposal for such a unit of measure In this book a distinguished team of ethicists and economists defend the core of the QALY proposal that health care resources should be used so as to produce more years of life of the highest possible quality This leads to a discussion of such fundamental questions as whether all lives are of equal value whether health care should be allocated on the basis of need and whether the QALY approach incorporates an adequate account of fairness or justice The result is the most thorough account yet of the ethical issues raised by the use of the QALY as a basis for allocating health care resources      **Medical Ethics and Law** Dominic Wilkinson, Julian Savulescu, Tony Hope, Judith Hendrick, BA, LLM, 2008-03-06 This is a short textbook of ethics and law aimed primarily at medical students The book is in two sections The first considers general aspects of ethics in the context of medicine the second section covers the topics identified in the consensus agreement The content of medical law is not intended to be comprehensive and relates very much to the ethical issues The law will be updated throughout including consent in light of Mental Capacity Act mental health law in light of Mental Health Act end of life depending on outcome of Burke case and the passage of the Joffe Bill assisted reproduction in light of expected changes in HFEA New guidelines to be added the guidelines and processes around medical research are under review and likely to develop and change GMC guidelines are under continual revision the Burke case in particular may have direct impact but it is also likely that the confidentiality guidelines will undergo revision particularly in view of the increasing importance of genetic data The new legal aspects outlined above will require some changes to the ethical analysis the ethical issues of new technology will be included cloning transgenesis and chimera i e forming organisms from more than one species and stem cells resource allocation ethics is moving on to examining a wider range of issues than covered in the first edition and this will be discussed the whole area of mental disorder and capacity to consent is an active area of ethical research and the second edition would cover some of this new work      *Medical Ethics: A Very Short Introduction* Tony Hope, 2004-09-23 Issues in medical ethics are rarely out of the media and it is an area of ethics that has particular interest for the general public as well as the medical practitioner This short and accessible introduction provides an invaluable tool with which to think about the ethical values that lie at the heart

of medicine Tony Hope deals with the thorny moral questions such as euthanasia and the morality of killing and also explores political questions such as how should health care resources be distributed fairly Each chapter in this book considers a different issue genetics modern reproductive technologies resource allocation mental health medical research and discusses controversial questions such as Who should have access to reproductive technology Who should pay Is it right to fund expensive drug treatment for individuals Should active euthanasia be legalized Should treatment for mental illness be imposed on patients without their consent Who should have access to information from genetic testing Should we require consent for the use of dead bodies or organs in medical research

100 Cases in Clinical Ethics Evaluating the Cost-Effectiveness of Counselling in Health Care Nancy Rowland, Keith Tolley, 2021-03-04 Limited resources in health care mean that the value of counselling is decided in a highly competitive economic arena Keith Tolley and Nancy Rowland have written a practical guide to the basic principles of evaluating cost effectiveness to enable counsellors and service providers to carry out analysis for themselves They provide helpful definitions of technical terms and use case studies to demonstrate how to apply the theory in different contexts

The Ethics of Health Care Rationing: An Introduction Greg Bogner, Iwao Hirose, 2014-06-05 Should organ transplants be given to patients who have waited the longest or need it most urgently or those whose survival prospects are the best The rationing of health care is universal and inevitable taking place in poor and affluent countries in publicly funded and private health care systems Someone must budget for as well as dispense health care whilst aging populations severely stretch the availability of resources The Ethics of Health Care Rationing is a clear and much needed introduction to this increasingly important topic considering and assessing the major ethical problems and dilemmas about the allocation scarcity and rationing of health care Beginning with a helpful overview of why rationing is an ethical problem the authors examine the following key topics What is the value of health How can it be measured What does it mean that a treatment is good value for money What sort of distributive principles utilitarian egalitarian or prioritarian should we rely on when thinking about health care rationing Does rationing health care unfairly discriminate against the elderly and people with disabilities Should patients be held responsible for their health Why does the debate on responsibility for health lead to issues about socioeconomic status and social inequality Throughout the book examples from the US UK and other countries are used to illustrate the ethical issues at stake Additional features such as chapter summaries annotated further reading and discussion questions make this an ideal starting point for students new to the subject not only in philosophy but also in closely related fields such as politics

health economics public health medicine nursing and social work      *Respecting Life* Neil Messer,2013-01-25 Bioethical issues are rarely out of view in Western societies New developments in areas such as human embryology continually raise new ethical questions while more familiar issues frequently reappear in public debate These are issues of central concern for Christians and for a wider public because they raise questions about the value of life the meaning of suffering and death and humanity's place in the natural world      **Biomedical Ethics** Olinda Timms,2019-08-02 Each chapter focuses on a single area in a simple narrative Illustrative case reports and case studies of ethical dilemmas are provided with points for reflection discussion In step with the curriculum in Medical Ethics already established in several medical colleges The chapters can be used to develop modules in a medical ethics program Additional resources titles of relevant films readings and references are provided The chapters have been linked to the AETCOM modules for easy reference providing content for teaching modules This book provides the resource to create teaching modules in medical ethics In this way the book compliments the AETCOM modules and can be used to develop teaching learning sessions      *The Transformation of Contemporary Health Care* Tiago Moreira,2013-05-07 The past three decades have seen enormous changes in the organisation of health care This book explores the role of knowledge production and technology on these transformations focusing on the market attempts to embed principles of economic rationality and efficient use of resources in the shaping and delivery of health care the laboratory science experiments and evidence in the management of research practice and policy and the forum the application of deliberative procedures and other forms of public consultation to health care decision making      **Research Methods In Health: Investigating Health And Health Services** Bowling, Ann,2014-07-01 This bestselling book provides an accessible introduction to the concepts and practicalities of research methods in health and health services      *Medicine and Social Justice* Rosamond Rhodes,Margaret Battin,Anita Silvers,2012-09-13 This unique and comprehensive second edition of an important volume presents writing from renowned authors about achieving social justice in medicine Each of the 42 chapters addresses continuing and emerging policy challenges facing medicine They deepen our understanding of theoretical and practical aspects of issues in the contemporary debate      **Inspiring a Medico-Legal Revolution** Pamela R. Ferguson,Graeme T. Laurie,2016-03-09 This book marks the retirement of Professor Sheila McLean whose contribution to the discipline of medical law has been truly ground breaking As one of the pioneers of the discipline Sheila McLean inspired a revolution in the ways in which lawyers doctors courts and patients perceive the relationship between medicine and the law The first International Bar Association Professor of Law and Ethics in Medicine she has worked tirelessly to champion the importance of law's role in regulating medicine and protecting patients rights The span in content of this book reflects the range of contributions that Professor McLean has herself made Her work gave direction and shape to a new field of study at a time when few questioned the authority of medicine or thought much about the plight of the patient This collection brings together 21 leading scholars in healthcare law and ethics to honour the depth and significance

of her contribution Including authors from the US Australia Canada and New Zealand the contributions cover areas as diverse as start and end of life reproductive rights and termination of pregnancy autonomy of patients the protection of vulnerable patient groups and the challenges posed by new technologies      **Who Lives, who Dies, who Decides** United States.
