Finn,2013-08-01 What does the history of Christian views of economic life mean for economic life in the twenty first century Here Daniel Finn reviews the insights provided by a large number of texts from the Bible and the early church to the Middle Ages and the Protestant Reformation to treatments of the subject in the last century Relying on both social science and theology Finn then turns to the implications of this history for economic life today Throughout the book invites the reader to engage the sources and to develop an answer to the volume s basic question **The Political Economy of Business Ethics in East Asia** Ingyu Oh,Gil Sung Park,2016-09-28 The Political Economy of Business Ethics in East Asia A Historical and Comparative Perspective deals with modes of ethical persuasion in both public and private sectors of the national economy in East Asia from the periods of the fourteenth century to the modern era Authors in this volume ask how and why governments in pre modern Joseon Korea modern Korea and modern Japan used moral persuasion of different kinds in designing national economic institutions Case studies demonstrate that the concept of modes of exchange first developed by John Lie 1992 provides a more convincing explanation on the evolution of pre modern and modern economic institutions compared with Marx s modes of production as historically specific social relations or Smith s free market as a terminal stage of human economic development The pre modern and modern cases presented in this volume reveal that different modes of exchange have coexisted throughout human history Furthermore business ethics or corporate social responsibility is not a purely European economic ideology because manorial market entrepreneurial and mercantilist moral persuasions had widely been used by state rulers and policymakers in East Asia for their programs of advancing dissimilar modes of exchange In a similar vein the domination of the market and entrepreneurial modes in the twenty first century world is also complemented by other competing modes of change such as state welfarism public sector economies and protectionism Compares Chinese Japanese and Korean business ethics from a comparative and historical context Explores recent theoretical approaches to capitalist development in modern history in non Western regions Discusses the theoretical usefulness of new institutionalism modes of exchange and neoclassical discussions of business ethics Evaluates historical texts in their own languages in its attempt to compare Chinese Japanese and Korean business ethics in the pre modern and modern times **The British National Bibliography** Arthur James Wells,2009 **Handbook on Electricity Markets** Glachant, Jean-Michel,Joskow, Paul

L., Pollitt, Michael G., 2021-11-12 With twenty two chapters written by leading international experts this volume represents the most detailed and comprehensive Handbook on electricity markets ever published [Development Ethics](#) Nikos Astroulakis, Nikolaos Karagiannis, 2024-12-06 This book provides a fresh perspective on international development By integrating ethical concepts and moral philosophy with political economy Nikos Astroulakis and Nikolaos Karagiannis explore three levels of ethical analysis meta ethical normative ethical and applied ethical This approach underscores the importance of ethics in shaping development goals and strategies tailored to an individual society The book uses a framework rooted in heterodox political economy to redefine what it means to be a good society It challenges conventional economic models and proposes development ethics as a compelling alternative Readers will discover new ways to understand the purpose of development and innovative methods to evaluate its success Development Ethics explains how ethical principles can transform development policies making it an essential read for those committed to building a more just and equitable world

[The Routledge Companion to Ethics, Politics and Organizations](#) Alison Pullen, Carl Rhodes, 2015-06-05 The Routledge Companion to Ethics Politics and Organizations synthesizes and extends existing research on ethics in organizations by explicitly focusing on ethico politics where ethics informs political action It draws connections between ethics and politics in and around organizations and the workplace examines cutting edge areas and sets the scene for future research Through a wealth of international and multidisciplinary contributions this volume considers the broad range of ways in which ethics and politics can be conceived and understood The chapters look at various ethical traditions as well as the discursive deployment of ethical terminology in organizational settings and they also examine large scale political structures and processes and how they relate to different forms of politics which affect behaviour in organizations These many possibilities are united by a focus on how ethics can be used to inform and justify the exercise of power in organizations This collection will be a valuable reference source for students and researchers across the disciplines of organizational studies ethics and politics
