Ethics And Economic Progress:

Ethics and Economic Progress James M. Buchanan, 1997-01 In *Ethics and Economic Progress* Nobel Prize winning economist James M Buchanan argues that ethical or moral constraints on human behavior exert important economic effects. He considers the question: Why are we better off by our own reckoning when we work harder, save more and deal honestly in markets and in politics? This nontechnical book opens up the entire economics ethics nexus for examination. Part I examines behaviors and standards that can be subsumed under the term Puritan ethics. The work ethic and the saving ethic may not be fashionable today but Buchanan asserts that many modern attitudes and habits relate to the decline in productivity growth in the economy. If we acknowledge that moral values are important to our economic well being it follows that we must all pay the preacher on strictly economic grounds. Part II extends the argument examining the implications for ethical norms that describe the behavior of taxpayers or public program users and the economics of the work ethic as it applies to nonlabor resources. The last chapter perhaps the most controversial suggests that Adam Smith's distinction between productive and nonproductive labor which has been almost universally dismissed by economists may indeed have economic relevance. Chapters 1, 2 and 3 were presented in 1991 as the first lectures in the W R Howell Sr Second Century Lecture Series at the University of Oklahoma.

Business and Economic Ethics Arthur Rich, 2006 This book is a fundamental and unique masterpiece which reflects the discussions on business and economic ethics over decades in German speaking countries and does so by systematically developing an Ethics of Economic Systems from a Christian theological perspective with a firm foundation in the western philosophical and economic literature. Neither in German speaking nor English speaking regions has this complex theme been dealt with in such a comprehensive and thorough manner. Ethics is a matter of doing justice to the human without twisting the facts and ignoring the constraints. The study introduces seven criteria of human justice that fundamentally relate to the Christian revelation and at the same time establish a humanistic and universal approach. Subsequently it focuses on the concrete economic systems and their problems. It describes and analyses various models of market and centrally planned economies and evaluates them in the light of middle level principles which are informed by both ethical criteria and economic knowledge. Thus the most legitimate economic system is the one which offers the most potential for reforms and self critique. The merits of this approach are considerable if the system of the market economy has the advantage of being thoroughly reformable it also requires regulations which are equitable and responsible. In this view one better understands the inescapable failure of Marxism but also the ethical ramifications of savage deregulations. Arthur Rich 1910-1992 was Professor of Systematic Theology and Director of the Institute of Social Ethics at the University of Zurich Switzerland. He worked in the field of business and economic ethics for nearly 40 years. Georges Enderle is Arthur and Mary O Neil Professor of International Business Ethics at the Mendoza College of Business University of Notre Dame Indiana USA.

and President of the International Society of Business Economics and Ethics 2001-2004 which organizes the ISBEE World Congress of Business and Economic Ethics every four years

The End of Economics? Cristovam Buarque, 1993 Cristovam Buarque argues that economic theory if it is to continue to command either public respect or intellectual confidence in its relevance to the realities of the modern world must incorporate the need for an ethical system to guide its endeavours and prescriptions At a time when our civilisational model is in crisis as a result of global environmental degradation and the failure of development to solve the problem of poverty economics must accept that there have to be limits to growth and that the increasing inequality between both classes and countries is neither morally tolerable nor politically sensible The very notion of economic progress needs to be rethought Technological advance must respect nature and the fetishism of applying economic theories without regard to their human consequences must be abandoned This powerful exploration provides an essential starting point for those economists who see the need for a breakthrough to a new and more enduring paradigm in their discipline

Positive Ethics in Economics Damien Bazin, 2017-09-08 Economics is often accused of being a ethical lacking a moral perspective if not altogether immoral Its detractors criticize economic models of pure and perfect competition and claim that economics should be concerned with social effects and strive to be equitable Yet these critics fail to understand that the discipline has many dimensions Economics has also developed a group of concerns directly related to ethics The presence of practical ethics is evident in the economic analysis of behaviour that incorporates ethical preference altruism and a responsible calculation based on norms It is fair today that economics differentiates ethics from purely
