Ethics And Human Relationships:

Ethics and Human Relationships Norman D. Hirsh, 1976 *Moral Relativism, Moral Diversity, and Human Relationships* James Kellenberger, 2010-11-01 This book aims to clarify the debate between moral relativists and moral absolutists by showing what is right and what is wrong about each of these positions by revealing how the phenomenon of moral diversity is connected with moral relativism and by arguing for the importance of relationships between persons as key to reaching a satisfactory understanding of the issues involved in the debate *Encyclopedia of Human Relationships* Harry T. Reis, Susan Sprecher, 2009-03-15 Library Journal Best Reference 2009 An excellent gateway to further examination of any of the subdisciplines of relationship science or as a research tool in its own right Library Journal Relationships are fundamental to nearly all domains of human activity from birth to death When people participate in healthy satisfying relationships they live work and learn more effectively When relationships are distressed or dysfunctional people are less happy less healthy and less productive Few aspects of human experience have as broad or as deep effects on our lives The Encyclopedia of Human Relationships offers an interdisciplinary view of all types of human associations friends lovers spouses roommates coworkers teammates parents and children cousins siblings acquaintances neighbors business associates and so forth Although each of these connections is unique in some respect they share a common core of principles and processes These three volumes provide a state of the art review of the extensive theories concepts and empirical findings about human relationships Key Features Compiles leading edge information about how people think feel and act toward each other Presents the best in the field authors who have contributed significant scientific knowledge about personal relationships over the past several decades Offers a diverse approach to relationship science with contributions from psychology sociology communication family studies anthropology physiology neuroscience history economics and legal studies Key Themes Cognitive Processes in Relationships Communication Processes Creating and Maintaining Closeness Dating Courtship and Marriage The Dark Side of Relationships Emotion Processes in Relationships Family Friendship and Caregiving in Adulthood Health and the Biology of Relationships Methods for Studying Relationships Personality and Individual Differences Prevention and Repair of Relationship Problems Psychological Processes Sexuality Social Context of Relationships Social Relations in Childhood and Adolescence Theoretical Approaches to Studying Relationships Types of Relationships Our relationships influence virtually all aspects of our everyday existence and are of deep interest to students researchers academics and laypeople alike This Encyclopedia is an invaluable addition to any academic or public library *The Human Relationship to Nature* Matthew R. Foster, 2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the

interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time
