*The Ethics of Protection* Lincoln Rice, 2023-09-26 Gandhi famously argued that society's moral measure was its treatment of the vulnerable Few members of society experience vulnerability more than children When families fail their children government and civil society have a moral and legal charge to intervene But the road to hell is paved with good intentions In the United States there exists a fraught intersection between child welfare and anti Black racism that has its roots in chattel slavery and the Black Codes that restricted African American freedoms following the Civil War Today Black children are twice as likely to be deemed victims of child maltreatment compared to white children and even more likely to be removed from their parents and adopted out to strangers The Ethics of Protection responds to these dire realities with a liberationist approach to child welfare ethics This approach differs from traditional ethics in two ways It moves the social location of ethics from governing bodies boardrooms and institutions to the perspective of society's most

vulnerable And it critiques neoliberal politics and economics for their role in this injustice Drawing on historical analysis Catholic social teaching Scripture and the experience of the oppressed The Ethics of Protection reframes the ethical issues surrounding child welfare by centering the stories challenges failures and victories of Black families Authentic freedom will not be initiated by government officials Change will only come from the coordinated direct actions of parents children and activists supporting systemic change grounded in racial justice This book presents readers with an alternative story of the Black family to combat the anti Black narratives that dominate US culture      **Resources in Education** ,1994

**Moral Equality, Bioethics, and the Child** Claudia Wiesemann, 2016-08-18 Presenting real life cases from clinical practice this book claims that children can be conceived of as moral equals without ignoring the fact that they still are children and in need of strong family relationships Drawing upon recent advances in childhood studies and its key feature the agentic child it uncovers the ideology of adultism which has seeped into much what has been written about childhood ethics However this book also critically examines those positions that do accord moral equality to children but on grounds not strong enough to support their claim It lays the groundwork for a theory of moral equality by assessing the concepts of parenthood family best interest paternalism and above all autonomy and trust which are so important in envisioning what we owe the child It does not only show how children like adults should be considered moral agents from infancy but also how ethical theories addressing adults can significantly profit from recognizing this The analysis takes into account contributions from European as well as American scholars and makes use of a wide range of ethical psychological cultural and social scientific research

Perspectives from Young Children on the Margins Jane Murray, Colette Gray, 2020-06-29 In spite of our apparently connected global environment people are becoming less connected Digital communication leads to fewer face to face engagements and many young children are separated from their parents for extended periods The post truth phenomenon has resulted in mistrust between policymakers and the people they serve whilst increased immigration has led to some rich countries adopting a protectionist stance that transforms collaboration into separatism At its 2014 meeting the European Early Childhood Education Research Association s Young Children s Perspectives Special Interest Group considered how these issues were affecting young children particularly the many thousands entering Europe at that time as refugees and migrants escaping conflict in their home countries Many of those displaced young children found themselves situated on the margins of their new contexts The feeling of being othered can be existential for any young child experiencing liminality yet a sense of belonging is important for young children s well being and development of identity the feeling of belonging lies at the core of social inclusion This book the idea for which arose out of this meeting is drawn from leading edge empirical studies and reveals the diverse experiences of young children s marginalisation This book was originally published as a special issue of the European Early Childhood Education Research Journal

**Working Ethically in Child Protection** Bob Lonne, Maria Harries, Brid Featherstone, Mel Gray, 2015-08-20 In their day to day practice social work and human services practitioners frequently find themselves in confusing ethical quandaries trying to balance the numerous competing interests of protecting children from harm and promoting family and community capacity This book explores the ethical issues surrounding child protection interventions and offers a process oriented approach to ethical practice and decision making in child protection and family welfare practice Its aim is to prepare students and early career professionals for roles in the complex and challenging work of child protection and family support Beginning with a critical analysis and appreciation of the diverse organisational and cultural contexts of contemporary child protection and ethical decision making

frameworks the authors outline a practical real world model for reshaping frontline ethical practice Moving away from a focus on the child apart from the family the authors recognise that child safeguarding affects the lives not just of children but also of parents grandparents and communities Working Ethically in Child Protection eschews dominant rational technical models for relational ones that are value centred and focus on family well being as a whole Rather than a single focus on assessing risk and diagnosing deficit this book recognises that our child protection systems bear down disproportionately on those from disadvantaged and marginalised communities and argues that what is needed is real support and practical assistance for poor and vulnerable parents and children It uses real world case examples to illustrate the relevant ethical and practice principles and ways in which students and practitioners can practise ethically when dealing with complex multi faceted issues
