- Conscience, this theory goes,
  - provides **knowledge** about right and wrong,
  - **motivates** us to do what is right,
  - and **demands** that we act in accord with it.
  - Some refer to as a “moral sense” comparable to other cognitive faculties.
  - Some identify conscience with an external entity (e.g. Socrates’ Daimon)

## **Ethics For Life An Interdisciplinary And Multicultural Introduction:**

*Ethics for Life* Judith A. Boss,1998      Ethical Issues in Business Peg Tittle,2000-04-13 The core of this text comprises chapters on all the key issues of business in Canada today Each chapter includes a hypothetical case study and an introduction highlighting key ethical points two academic essays and a real life case study Questions for discussion accompany the essays and case studies The author has also included a general introduction to ethical issues and an overview of ethical theory a section on institutionalizing ethics discussing ethics officers programs codes etc and appendices providing excerpts from important classic contributions to ethical theory and from relevant Canadian law      Qualitative Research Practice Clive Seale,2007 Aimed at the student reader this book demonstrates the benefits of using particular methods from the viewpoint of real life experience It contains chapters written by leading internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others      *Handbook of Moral Motivation* Karin Heinrichs,Fritz Oser,Terence Lovat,2013-06-12 The Handbook of Moral Motivation offers a contemporary and comprehensive appraisal of the age old question about motivation to do the good and to prevent the bad From a research point of view this question remains open even though we present here a rich collection of new ideas and data Two sources helped the editors to frame the chapters first they looked at an overwhelmingly fruitful research tradition on motivation in general attribution theory performance theory self determination theory etc in relationship to morality The second source refers to the tension between moral judgment feelings beliefs and the real moral act in a twofold manner a as a necessary duty and b as a social but not necessary bond In addition the handbook utilizes the latest research from a wide range of disciplinary perspectives wishing to suggest by this that the answer to the posed question will likely not come from one discipline alone Furthermore our hope is that the implicit criticism that the narrowly constructed research approach of the recent past has contributed to closing off rather than opening up interdisciplinary lines of research becomes in this volume a strong counter discourse The editors and authors of the handbook commend the research contained within in the hope that it will contribute to better understanding of humanity as an inherently moral species      **Ethical Issues in Business - Second Edition** Peg Tittle,2016-12-15 Peg Tittle s ambitious business ethics text brings together readings cases and the author s own informed opinions The second edition includes over a dozen new readings and case studies as well as a new chapter on issues in Information and Communication Technology Includes Canonical and topical readings on issues ranging from whistleblowing and advertising to international business the nature of capitalism and the environment Engaging overviews from the author encourage careful reflection and critical examination of conventional assumptions What to Do scenarios and Case Studies illustrate the practical relevance of each topic Comprehensive introductions to ethical theory and the ethics of business Questions following each selection test understanding and promote active reading A primer on ethical institutions examines the role of ethics consultants codes of ethics and more      The Ethical Teacher Campbell,

Elizabeth,2003-09-01 This text combines teachers beliefs and practices with a discussion of the connections between the moral dimensions of schooling and professional ethics applied in teaching It presents the concept of ethical knowledge as it is revealed as it is challenged and as it may be used in schools

**The Psychologically**

**Literate Citizen** Dana Dunn,2013-01-01 The concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education They pose a basic question What attributes and capabilities should undergraduate psychology majors acquire Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years educators have only recently explicitly delineated attributes and learning outcomes and sought to develop appropriate learning teaching and assessment strategies including whole program approaches The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem solve in ethical and socially responsible ways that directly benefit their communities In this book a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen Authors provide practical guidance for classroom psychology educators as well as curriculum developers and reviewers Ultimately they make the case for a paradigm shift in psychology education
