**Nature and Culture** Lester G. Crocker, 2019-12-01 Originally published in 1963 Perhaps the most generative ethical question of eighteenth century France was how to live a virtuous and happy life at the same time During the Age of Enlightenment Christianity fell out of vogue as the dominant and authoritative moral code In place of Christianity's emphasis on sin and redemption in light of a supposed afterlife present happiness became recognized as an appropriate end goal among French Enlightenment thinkers French intellectuals struggled to find equilibrium between nature a person's individual goals and needs and culture the political economic and social organization of humans for a collective good Enlightenment discourse generated a unique cultural moment in which thinkers addressed the problems of humans moral coexistence through the dichotomy of nature and culture Lester Crocker addresses these questions in an overview of ethical thought in eighteenth century France Ethics of Enlightenment Ronald Y. by the translator a timeline of Kant's life and works and a helpful index of Kant's key concepts and intellectual rivals This translation is designed for readability rendering Kant's enigmatic German into the simplest equivalent possible and removing the academic footnotes to make this critically important historical text as accessible as possible to the modern reader Kant defines enlightenment as the process of freeing oneself from self-imposed immaturity caused primarily by a lack of courage to use one's intellect without the guidance of others This is an inherently dialectal process a foundation of his theory of right laying the foundation of Hegel's theories The essay emphasizes the role of individual reason and the importance of independent thought criticizes the tendency of people to rely on others for understanding and moral guidance and advocates the public use of reason as a pathway to enlightenment distinguishing between the public and private use of reason and emphasizing the social implications of enlightenment and the limitations on individual freedom     Encounter with Enlightenment Robert E. Zhang,2021-07-30 Educational philosophies of self cultivation as the cultural foundation and philosophical ethos for education have strong and historically effective traditions stretching back to antiquity in the classical cradle civilizations of China and East Asia India and Pakistan Greece and Anatolia focused on the cultural traditions in Confucianism Taoism and Buddhism in the East and Hellenistic philosophy in the West This volume in East West dialogues in philosophy of education examines both Confucian and Western classical traditions revealing that although each provides its own distinct figure of the virtuous person they are remarkably similar in their conception and emphasis on moral self cultivation as a practical answer

to how humans become virtuous The collection also examines self cultivation in Japanese traditions and also the nature of Michel Foucault's work in relation to ethical and aesthetic ideals of Hellenistic self cultivation      Foundations for African Theological Ethics James Nkansah-Obrempong, 2013-05-14 Having taught on ethics in Africa for almost a decade James Nkansah Obrempong presents a work that goes some way to addressing the dearth of materials on ethics that combine African social religious cultural and moral values with biblical and theological values Integrating these from African Western and biblical contexts Nkansah demonstrates how important they are for dealing with contemporary moral and social issues facing the church in Africa and African societies The book develops a theoretical biblical and theological foundation for Theological Ethics and uses this to address the broader issues that affect the socio political and economic life of African people and the church      **The Ethics of Precaution** Levente Szentkirályi, 2019-11-22 There are thousands of substances manufactured in the United States to which the public is routinely exposed and for which toxicity data are limited or absent Some insist that uncertainty about the severity of potential harm justifies implementing precautionary regulations while others claim that uncertainty justifies the absence of regulations until sufficient evidence confirms a strong probability of severe harm In this book Levente Szentkirályi overcomes this impasse in his defense of precautionary environmental risk regulation by shifting the focus from how to manage uncertainty to what it is we owe each other morally He argues that actions that create uncertain threats wrongfully gamble with the welfare of those who are exposed and neglect the reciprocity that our equal moral standing demands If we take the moral equality and rights of others seriously we have a duty to exercise due care to strive to prevent putting them in possible harm's way The Ethics of Precaution will be of great interest to researchers educators advanced students and practitioners working in the fields of environmental political theory ethics of risk and environmental policy      *Historical Understanding and Ethics in Social Science* Leonidas Tsilipakos, 2025-03-13 Can social scientific description capture the historically individual Is the idea of an ethically committed social science morally defensible This book offers a critical historically grounded perspective on these perennial methodological and ethical problems in their current forms It provides a series of in depth examinations of recent work by prominent authors in sociology and philosophy The book draws on the thought of Peter Winch to provide a coherent response to the core issues that underlie past and present debate in social science and to provide a solid basis for future inquiry It will be of particular interest to social scientists philosophers and historians and to anyone seeking a clear grasp of the demands made by historical understanding and ethics on the study of society      Cutting-edge Issues in Business Ethics Mollie Painter-Morland, Patricia Werhane, 2008-07-22 Business ethics originated in the United States as an offshoot of theoretical ethics and as part of a movement in applied ethics that was initiated with medical ethics Although a few small religious based colleges and universities offered courses in business ethics just after the Second World War business ethics as an academic field developed most seriously in many universities in the early 1970s The field of medical ethics was well developed by then

and it was a natural step to think about ethical issues in business as well. There was also a public reaction to a number of corporate scandals e.g. price fixing, the Lockheed Japanese bribery allegations, the Goodyear airbrake scandal etc. that encouraged universities to begin teaching the subject. Business ethics as an academic field was originally developed by philosophers, most of whom had come out of the analytic or Anglo American philosophical traditions and who had been trained in classical ethics on Aristotle, Kant, Mill, Bentham and perhaps Dewey. The resulting field then has been dominated by this thinking. Although to date there are over 50 textbooks in business ethics, most textbooks in business ethics do not take into account contemporary continental philosophy. Although Marxism is sometimes taught in these courses, other more contemporary continental thinkers who could contribute substantially to the field have been ignored. This phenomenon is iterated in the professional journals and in theoretical books on the topic.

Ethics and Enlightenment Swami Bodhananda, 2024-07-02 Swami Bodhananda in his book *Ethics and Enlightenment* critically examines the role of ethics and spiritual discipline for enlightenment. Religious fundamentalism and cultural arrogance that spurn reason and commonsense give added force and justification for all kinds of social and sexual perversions in the name of religious freedom and cultural uniqueness. Swami Bodhananda raises questions such as: What is the truth? Is spiritual experience merely a flowering of uninhibited libidinal energy? Are society's rules of conduct, moral behaviour, rationality, relationships and social responsibilities unnecessary and an unacceptable imposition on the spirit? If so, are all forms of discipline and authority based on suppressed libido and sexuality? And can one, by free sexual expression, remove those superimpositions and live eternally in the spirit? Is self-discipline and moral discrimination actually a hindrance to spiritual flowering? With a detailed set of arguments based on Vedantic scriptures, he critiques the tenets of New Ageism and emphasizes the role of moral, physical and emotional discipline central to spiritual progress. Finally, in the book Swami Bodhananda concludes that a spiritually awakened person lives in the infinite Spirit, mindful of an endless parade of body-mind events.

A Primer on German Enlightenment Sabine Roehr, 1995 A translation into English of the work of late German Enlightenment thinker Karl Leonhard Reinhold, 1757-1823, best known for his interpretations of Kant and whose writings on theoretical philosophy were significant for the development of philosophy after Kant. Roehr prefaces the translation with an approximately 150-page analysis of the relevant moral, religious, political and philosophical thought of the German Enlightenment. **Aspects of Enlightenment** Thomas Osborne, 1998 An examination of the concept of enlightenment and the Enlightenment relating to the social sciences and social theory. Attempts to avoid the quarrels of modernists and post-modernists, appealing to Foucault's sense of enlightenment as a critical ethos rather than a fixed rationalism.
