Its coverage ranges from legal definitions and practices to popular stereotyping by the public and the media covering such diverse topics as racial profiling workplace discrimination mob violence treatment at border crossings barriers to success in schools and many more It shows how government and social processes of racializing are too seldom understood by mainstream society and the implication of attendant policies are sorely neglected

Mixed Race Students in College

Kristen A. Renn, 2012-02-01 It's kind of an odd thing really because it's not like I'm one or the other or like I fit here or there but I kind of also fit everywhere And nowhere All at once You know Florence My racial identity I would have to say is multiracial I am of the future I believe there is going to come a day when a very very large majority of everybody in the world is going to be mixed with more than one race It's going to be multiracial for everybody Everybody and their mother Jack Kristen A. Renn offers a new perspective on racial identity in the United States that of mixed race college students making sense of the paradox of deconstructing racial categories while living on campuses sharply divided by race and ethnicity Focusing on how peer culture shapes identity in public and private spaces the book presents the findings of a qualitative research study involving fifty six undergraduates from a variety of institutions Renn uses an innovative ecology model to examine campus peer cultures and documents five patterns of multiracial identity that illustrate possibilities for integrating notions of identity construction and deconstruction with the highly salient nature of race in higher education One of the most ambitious scholarly attempts to date to portray the diverse experiences and identities of mixed race college students the book also discusses implications for higher education practice policy theory and research

Cambodian American Youth, Identity, and Schooling

Vichet Chhuon, 2025-06-27 This book examines how Cambodian American high school youth reconcile stereotypes identities and school opportunities and the ways these factors impact academic achievement and well being through ethnographic research The backdrop for Cambodian American life is intimately embedded within how Asians and Asian Americans are imagined within U.S. society This book argues that how Cambodian American students negotiate certain identities are in relation to perceived advantages associated with ethnic and panethnic labels across varying social contexts It highlights how the embrace of the model minority stereotype can come at a psychological cost for Asian Americans including increased feelings of internalized racism The chapters draw on ethnographic research collected across two years in one Southern California community Through students' own meaning making it shows readers how Cambodian American youth are simultaneously invisible and hyper visible in their school and community which shapes access to important identities and relationships This work invites interrogation of the Asian American category itself and seeks to move the fields of Asian American and educational studies forward by critically examining not only how the model minority stereotype is constructed and imposed but also how it can be adopted and affirmed by Asian American youth themselves Practitioners who work with marginalized and underrepresented students and students of courses such as Asian American studies anthropology cultural studies and education and psychology will find this to be a helpful and enlightening text The

Boundaries of Love Chinyere K. Osuji, 2019-05-21 How interracial couples in Brazil and the US navigate racial boundaries How do people understand and navigate being married to a person of a different race Based on individual interviews with forty seven black white couples in two large multicultural cities Los Angeles and Rio de Janeiro *Boundaries of Love* explores how partners in these relationships ultimately reproduce negotiate and challenge the us versus them mentality of ethno racial boundaries By centering marriage Chinyere Osuji reveals the family as a primary site for understanding the social construction of race She challenges the naive but widespread belief that interracial couples and their children provide an antidote to racism in the twenty first century instead highlighting the complexities and contradictions of these relationships Featuring black husbands with white wives as well as black wives with white husbands *Boundaries of Love* sheds light on the role of gender in navigating life married to a person of a different color Osuji compares black white couples in Brazil and the United States the two most populous post slavery societies in the Western hemisphere These settings she argues reveal the impact of contemporary race mixture on racial hierarchies and racial ideologies both old and new

What's the Use of Race? Ian Whitmarsh, David S. Jones, 2010-04-16 How race as a category reinforced by new discoveries in genetics is used as a basis for practice and policy in law science and medicine The post civil rights era perspective of many scientists and scholars was that race was nothing more than a social construction Recently however the relevance of race as a social legal and medical category has been reinvigorated by science especially by discoveries in genetics Although in 2000 the Human Genome Project reported that humans shared 99.9 percent of their genetic code scientists soon began to argue that the degree of variation was actually greater than this and that this variation maps naturally onto conventional categories of race In the context of this rejuvenated biology of race the contributors to *What's the Use of Race* investigate whether race can be a category of analysis without

reinforcing it as a basis for discrimination Can policies that aim to alleviate inequality inadvertently increase it by reifying race differences The essays focus on contemporary questions at the cutting edge of genetics and governance examining them from the perspectives of law science and medicine The book follows the use of race in three domains of governance ruling knowing and caring Contributors first examine the use of race and genetics in the courtroom law enforcement and scientific oversight then explore the ways that race becomes implicitly or explicitly part of the genomic science that attempts to address human diversity and finally investigate how race is used to understand and act on inequities in health and disease Answering these questions is essential for setting policies for biology and citizenship in the twenty first century

Race and the Obama Phenomenon G. Reginald Daniel,Hettie V.
