Social Identity and Conflict K. Korostelina, 2007-07-23 Looking at a variety of countries this book explores the influence of cultural dimensions on the interrelations between personal and social identity and the impact of identity salience on attitudes stereotypes and the structures of consciousness *Race and Ethnicity in Comparative Perspective* Georgia A. Persons, 2018-04-24 Contradictory forces are at play at the close of the twentieth century There is a growing closeness of peoples fueled by old and new technologies of modern aviation digital based communications new patterns of trade and commerce and growing affluence of significant portions of the world s population Television permits individuals around the

world to learn about the cultures and lifestyles of peoples of physically distant lands. These developments give real meaning to the notion of a global village. Peoples of the world are growing closer in new and increasingly important ways. Nonetheless, there are disturbing signs of a growing awareness of ethnic differences in all parts of the world. The United States included and a concomitant rise in ethnic based conflicts many of them extraordinarily violent in nature. Fear, resentment, intolerance and mistreatment of the other abound in world news accounts. Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent global village but its emergence in the post cold war era internationally and the post civil rights era in the United States raises significant and compelling questions. Why are such conflicts occurring now? How do analysts explain these developments? The essays in *Race and Ethnicity in Comparative Perspective* lucidly explore some of the complexities of the persistence and re emergence of race and ethnicity as major lines of divisiveness around the world. Contributors analyze manifestations of race based movements for political empowerment in Europe and Latin America as well as racial intolerance in these same settings. Attention is also given to the conceptual complexities of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity, nationalism, identity and ideology. The book greatly informs discussions of race and ethnicity in the international context and provides an interesting perspective against which to view America's changing problem of race. *Race and Ethnicity in Comparative Perspective* is a timely, thought provoking volume that will be of immense value to ethnic studies specialists, African American studies scholars, political scientists, historians and sociologists.

Sociologists in a Global Age Mathieu Deflem, 2016-04-01. Sixteen leading international sociologists are brought together in this volume to share their experiences of becoming practitioners in the field. Selected for their comparative and transnational interests and experiences, the contributors include Martin Albrow, Karin Knorr Cetina, Diane E. Davis, Pierpaolo Donati, Leon Grunberg, Horst J. Helle, Eiko Ikegami, Tiankui Jing, Hyun Chin Lim, Ewa Morawska, Richard Münch, Saskia Sassen, Joachim J. Savelsberg, Piotr Sztompka, Edward A. Tiryakian, and Ruut Veenhoven. Each contributor provides an autobiographical review of their journey into the discipline with special attention paid to the intellectual and social political contexts in which their work matured. Each chapter concludes with a commentary on the anticipated future direction of that particular sociological area. These original and reflective contributions provide fascinating and rare insights into the careers of sociologists living in a global age.

Modernity at the Beginning of the 21st Century Volker Schmidt, 2008-12-11. Modernity is back on sociology's agenda. From the beginnings of sociology as an academic discipline, questions surrounding the meaning and consequences of modernity have fascinated generations of sociologists. The initial interest in the concept was inspired by a sense of a deep rupture and crisis afflicting European society, a sense that society was approaching something fundamentally different from the past, an entirely new form of societal organization that bore little resemblance to anything known before. Where exactly this transformation was headed was by no means clear, but around the 18th century a growing number of European intellectuals and scholars realized that the changes

that had been in the making since the late 15th century were irreversible and could not be contained in any particular region or confined to particular sectors of society but would ultimately transform all spheres of life. Like other thinkers, sociologists observed this transformation with awe and their attitude towards it has always been ambivalent. The 20th century, during which modernity gradually began to break through globally, was also a century during which many sociologists became increasingly disillusioned with the promises of the modern project. But with the exhaustion of the energies of postmodernism, the intellectual movement that wanted to bury modernity, the interest in modernity began to resurface again, not least because it became increasingly clear that the world is far from approaching a societal condition pointing systematically beyond modernity. Instead, we are witnessing an intensification of modernization processes around the world. But what is modernity anyway? The aim of the present volume is to contribute to the ongoing discussion about the meaning of modernity and about the significance of modernization processes in non-Western societies. As befits a subject matter as controversial and complex as this one, the book's chapters offer no conclusive answers to the questions they raise and address. The debate about modernity must and will continue, and one hopes that it will be conducted in an atmosphere of mutual respect despite sometimes fierce disagreement between the participants. For only if we listen to each other can we make genuine intellectual progress.

Why They Die Daniel Rothbart, Karina Korostelina, 2011-06-09. When civilians are perceived as the enemy, atrocities and violence result beyond the battlefield.

Identity, Morality, and Threat Daniel Rothbart, Karina V. Korostelina, 2006-10-26. *Identity, Morality, and Threat* offers a critical examination of the social psychological processes that generate outgroup devaluation and ingroup glorification as the source of conflict. Dr. Daniel Rothbart and Dr. Karina Korostelina bring together essays analyzing the causal relationship between escalating violence and opposing images of the Self and Other. The essays confront the practice of demonizing the Other as a justification for violent conflict and the conditions that enable these distorted images to shape future decisions. The authors provide insight into the possibilities for transforming threat narratives into collaboration narratives and for changing past opposition into mutual understanding. *Identity, Morality, and Threat* is a strong contribution to the study of identity-based conflict and psychological defenses.

Radical Ethnic Movements in Contemporary Europe Stefan Troebst, Farimah Daftary, 2004-11-01. Nation states and minorities resort more and more to violence when safeguarding their political interests. Although the violence in the Middle East has been dominating world politics for some time now, European governments have had their share of ethnic violence to contend with, as this volume demonstrates. And as the case studies show, ranging as they do from the Basque Country to Chechnya, from Northern Ireland to Bosnia Herzegovina, this applies to western Europe as much as to eastern Europe. However, in contrast to other parts of the world, instances where political struggles for power and social inclusion between minorities and majorities lead to full-fledged inter-ethnic warfare are still the exception. In the majority of cases, conflicts are successfully de-escalated and even resolved. In a comprehensive conclusion, the volume offers a theoretical framework for the
