Ethnology ,1975 **International Journal of Anthropology** ,1993 *The Palgrave International Handbook of Mixed Racial and Ethnic Classification* Zarine L. Rocha,Peter J. Aspinall,2020-01-03 This handbook provides a global study of the classification of mixed race and ethnicity at the state level bringing together a diverse range of country case studies from around the world The classification of race and ethnicity by the state is a common way to organize and make sense of populations in many countries from the national census and birth and death records to identity cards and household surveys As populations have grown diversified and become increasingly transnational and mobile single and mutually exclusive categories struggle to adequately capture the complexity of identities and heritages in multicultural societies State motivations for classification vary widely and have shifted over time ranging from subjugation and exclusion to remediation and addressing inequalities The chapters in this handbook illustrate how differing histories and contemporary realities have led states to count and classify mixedness in different ways for different reasons This collection will serve as a key reference point on the international classification of mixed race and ethnicity for students and scholars across sociology ethnic and racial studies and public policy as well as policy makers and practitioners *New Directions in Educational Ethnography* Akashi Kaul,William Rodick,2016-12-22 The primary objective of Studies in Educational Ethnography is to present original research monographs based on ethnographic perspectives and methodologies *The Anthropology of East Europe Review* ,2003 Militarization and the Global Rise of Paramilitary Culture Brad West,Thomas Crosbie,2021-10-12 This edited book demonstrates a new multidimensional comprehension of the relationship between war the military and civil society by exploring the global rise of paramilitary culture Moving beyond binary understandings that inform the militarization of culture thesis and examining various national and cultural contexts the collection outlines ways in which a process of paramilitarization is shaping the world through the promotion of new warrior archetypes It is argued that while the paramilitary hero is associated with military themes their character is in tension with the central principals of modern military organization something that often challenges the state s perceived monopoly on violence As such paramilitization has profound implications for institutional military identity the influence of paramilitary organizations and broadly how organised violence is popularly understood **Handbook of Research on Teaching in Multicultural and Multilingual Contexts** Charamba, Erasmos,2022-06-24 Several factors have resulted in increased intra and inter state migration This has led to an increase in the enrollment of students with diverse linguistics backgrounds placing more academic demands on educators Linguistic diversity presents both opportunities and challenges for educators across the educational spectrum Language ideologies profoundly shape and constrain the use of language as a resource for learning in multilingual or linguistically diverse classrooms While English has become the world language most communities remain and are becoming more and more multicultural multilingual and diverse The Handbook of Research on Teaching in Multicultural and

Multilingual Contexts moves beyond the constraints of current language ideologies and enables the use of a wide range of resources from local semiotic repertoires. It examines the phenomenon of language use, language teaching, multiculturalism and multilingualism in different learning areas, giving practitioners a voice to spotlight their efforts in order to keep their teaching afloat in culturally and linguistically diverse situations. Covering topics such as Indigenous languages, multilingual deaf communities and intercultural competence, this major reference work is an essential resource for educators of both K-12 and higher education, pre-service teachers, educational psychologists, linguists, education administrators and policymakers, government officials, researchers and academicians.

Primate Research and Conservation in the Anthropocene Alison M. Behie, Julie A. Teichroeb, Nicholas Malone, 2019-01-31 This book takes a new approach to understanding primate conservation research, adding a personal perspective to allow readers to learn what motivates those doing conservation work. When entering the field over a decade ago, many young primatologists were driven by evolutionary questions centered in behavioural ecology. However, given the current environment of cascading extinctions and increasing threats to primates, we now need to ensure that primates remain in viable populations in the wild before we can simply engage in research in the context of pure behavioural ecology. This has changed the primary research aims of many primatologists and shifted our focus to conservation priorities such as understanding the impacts of human activity, habitat conversion or climate change on primates. This book presents personal narratives alongside empirical research results and discussions of strategies used to stem the tide of extinction. It is a must-have for anyone interested in conservation research.

New Perspectives on Mixed Languages Maria Mazzoli, Eeva Sippola, 2021-06-08 A growing number of language varieties with diverse backgrounds and structural typologies have been identified as mixed. However, the debate on the status of many varieties and even on the existence of the category of mixed languages continues still today. This volume examines the current state of the theoretical and empirical debate on mixed languages and presents new advances from a diverse set of mixed language varieties. These cover well-known mixed languages such as Media Lengua, Michif, Gurindji Kriol and Kallawaya, and varieties whose classification is still debated such as Reo Rapa, Kumzari, Jopar and Wutun. The contributions deal with different aspects of mixed languages, including descriptive approaches to their current status and origins, theoretical discussions on the language contact processes in them, and analysis of different types of language mixing practices. This book contributes to the current debate on the existence of the mixed language category, shedding more light onto this fascinating group of languages and the contact processes that shape them.

Divergence with Genetic Exchange Michael Lynn Arnold, 2016 This book is an investigation into processes associated with evolutionary divergence and diversification, focussing on the role played by the exchange of genes between divergent lineages.

Contested Tongues Laada Bilaniuk, 2005 During the controversial 2004 elections that led to the Orange Revolution in Ukraine cultural and linguistic differences threatened to break apart the country *Contested Tongues* explains the complex linguistic and cultural politics in a bilingual country where the two main languages are closely related but their statuses are hotly contested Laada Bilaniuk finds that the social divisions in Ukraine are historically rooted ideologically constructed and inseparable from linguistic practice She does not take the labeled categories as givens but questions what Ukrainian and Russian mean to different people and how the boundaries between these categories may be blurred in unstable times Bilaniuk s analysis of the contemporary situation is based on ethnographic research in Ukraine and grounded in historical research essential to understanding developments since the fall of the Soviet Union Mixed language practices surzhyk in Ukraine have generally been either ignored or reviled but Bilaniuk traces their history their social implications and their accompanying ideologies Through a focus on mixed language and purism the author examines the power dynamics of linguistic and cultural correction through which people seek either to confer or to deny others social legitimacy The author s examination of the rapid transformation of symbolic values in Ukraine challenges theories of language and social power that have as a rule been based on the experience of relatively stable societies
